Goya Lane Rich Jackson,2015-04-09 When detective Hidaka investigates the murder of a young, Tokyo student, he recognizes it as the handiwork of Misaki Okano, the Saitama Murderer. Okano first came under police scrutiny as a member of Aum Shinrikiyo, the urban terrorist group that released Sarin gas in the Tokyo subway system. He was one of four who escaped through the labyrinthine, complex subway beneath the city. Goya Lane was inspired by the bombing of Japan in 1945 and the clear and present reality of a looming nuclear winter. In a growing climate of jihadist terrorism, ethnic fascism and geopolitical aggression, the world is in a race to acquire and stockpile nukes. The flashpoint will occur when radical extremists finally come into possession of a three-phase, stratospheric missile. That will be the last jihad. In Goya Lane, that reality is addressed. While in pursuit of Tokyo's infamous Saitama Murderer and child abductor Misaki Okano, detective Hidaka and Captain Saito come up against Ryodan, a radical terrorist group dedicated to avenging Japan's loss of imperial glory in the wake of Hiroshima and Nagasaki. In the extensive, underground railway systems of Tokyo, the largest in the world, the two men discover a society of third-generation bomb survivors, governed by the strict, jihadist-like control of Ryodan. The capture of Okano becomes all the more critical when it is discovered that he and his Ryodan counterparts have come into possession of a nuclear warhead. With forty-eight hours to locate the device, the detectives embark on a harrowing, underground odyssey. The time frame for detective Hidaka becomes all the more critical when he learns that his own daughter has just gone missing and the evidence points to Misaki Okano, the Saitama Murderer.

**Portland North** Rich Jackson,2018-12-05 While investigating a homicide in an upscale section of Portland, Detective Ramos finds an envelope that connects the murder to his home town of Portillo, Mexico. Two days later, he and his partner, Mai Hidaka, are called to a car bombing in an equally exclusive part of the city. When a connection is made between the two murders, they find themselves embroiled in a dangerous war between rival drug cartels. As the mystery intensifies and the body count mounts, the two detectives follow clues to the border town of Portillo, a town that has special significance for Ramos and hides a dark secret from his past. It is the town of his birth and the place where, as an eleven-year-old boy, he found his mother and sister brutally murdered by cartel members. The story opens with eleven-year-old Armando tracking the two murderers through the Chihuahua Desert and executing them with a single shot of a .22-caliber rifle. He crosses the border with an older woman who, likewise, was the victim of cartel violence and takes him north to Portland, Oregon.

**Valsul florilor** Yasunari Kawabata ,2014-09-12 Nouă povestiri, dintre cele mai frumoase creații literare ale lui Yasunari Kawabata, traduse pentru prima dată în limba română. Valsul florilor este povestea emoționantă a pasiunii obsesive pentru dans. Hoshie, Suzuko și Nanjō au crescut în spiritul sacrificării personale în numele unui scop mai înalt, cel artistic. Personajele povestirii sunt prinse ca într-un dans al vieții, uneori hieratic și spectaculos, alteori morbid și frizând pierderea lucidității, pentru ca, la final, disciplina de fier a acestei arte, reflectate asupra personalității fiecăruia, să-și spună cuvântul. Având frumusețea echivocă și enigmatică a stampelor lui Hiroshige, maestrul peisajului nipon, Un șir de copaci dezvăluie, dincolo de metafora inexplicabilei desfrunziri a unor arbori de ginkgo, drama din sânul unei familii. Prima zăpadă pe Fuji relatează întâlnirea dureroasă a unui cuplu despărțit de mult, care a trecut, separat, prin tragedia celui de-al Doilea Război Mondial, dar și printr-o serie de drame personale. Tăcerea, una dintre cele mai acute proze ale volumului, e o poveste-în-poveste, despre pasiunea pentru scris și consecințele, uneori dramatice, ale acesteia, iar Norii de dimineață surprinde dragostea unei eleve pentru profesoara sa de literatură japoneză. Povestirile din volum au, în ciuda dimensiunilor reduse, calitățile stilistice ale unor capodopere, în care fiecare cuvânt are forța de a evoca un întreg univers.

**Intelligent Memory Systems** Frederic T. Chong,Christoforos Kozyrakis,Mark Oskin,2003-06-29 We are pleased to present this collection of papers from the Second Workshop on Intelligent Memory Systems. Increasing die densities and inter chip communication costs continue to fuel interest in intelligent memory systems. Since the First Workshop on Mixing Logic and DRAM in 1997, technologies and systems for computation in memory have developed quickly. The focus of this workshop was to bring together researchers from academia and industry to discuss recent progress and future goals. The program committee selected 8 papers and 6 poster session abstracts from 29 submissions for inclusion in the workshop. Four to five members of the program committee reviewed each submission and their reviews were used to numerically rank them and guide the selection process. We believe that the resulting program is of the highest quality and interest possible. The selected papers cover a wide range of research topics such as circuit technology, processor and memory system architecture, compilers, operating systems, and applications. They also present a mix of mature projects, work in progress, and new research ideas. The workshop also included two invited talks. Dr. Subramanian Iyer (IBM Microelectronics) provided an overview of embedded memory technology and its potential. Dr. Mark Snir (IBM Research) presented the Blue Gene, an aggressive supercomputer system based on intelligent memory technology.
