365 Aircraft You Must Fly Robert F. Dorr,2015-05-01 A fascinating, entertaining, and amusing plane-by-plane journey through aviation history. Aviation has come a long way since the Wright Brothers built their glider in Kitty Hawk, North Carolina, in 1903. From among the thousands of different types of military and commercial aircraft constructed over the past 100 years , aviation expert Robert F. Dorr profiles the most important, fascinating, and famous aircraft ever made. Your opinions might differ, but you wouldn't want to miss out on the planes Dorr identifies as flights of a lifetime. The book covers 365 of the most iconic aircraft in world history that enthusiasts, serious-minded hobbyists, and casual fans would love to fly if given the chance. Clear photography, historical context, and specs get you as close as possible to these planes without setting foot in a hangar. While covering every era of aviation history, many of the planes in 365 Aircraft You Must Fly were flown during World War II, a time unmatched in aviation for

its technological advances, romance, and clarity of purpose. During this golden age of flying, propellers gave way to jet engines, and the Greatest Generation fought gallantly in them. Explore the history, thrills, and joy of flying the world's most amazing 365 aircraft.

The British Carrier Strike Fleet after 1945 David Hobbs,2015-10-30 “A comprehensive study of the bittersweet post WWII history of British naval

aviation . . . will become a standard reference for its subject.”—Firetrench

In 1945 the most powerful fleet in the Royal Navy’s history was centered on nine aircraft carriers. This book charts the post-war fortunes of this potent strike force; its decline in the face of diminishing resources, its final fall at the hands of uncomprehending politicians, and its recent resurrection in the form of the Queen Elizabeth class carriers, the largest ships ever built for the Royal Navy. After 1945 “experts” prophesied that nuclear weapons would make conventional forces obsolete, but British carrier-borne aircraft were almost continuously employed in numerous conflicts as far apart as Korea, Egypt, the Persian Gulf, the South Atlantic, East Africa and the Far East, often giving successive British Governments options when no others were available. In the process the Royal Navy invented many of the techniques and devices crucial to modern carrier operations angled decks, steam catapults and deck-landing aids while also pioneering novel forms of warfare like helicopter-borne assault, and tactics for countering such modern plagues as insurgency and terrorism. This book combines narratives of these poorly understood operations with a clear analysis of the strategic and political background, benefiting from the author's personal experience of both carrier flying and the workings of Whitehall. It is an important but largely untold story, of renewed significance as Britain once again embraces carrier aviation. “Makes a timely and welcome appearance . . . will make compelling reading for those with serious concern for our naval affairs.”—St. Andrews in Focus

In Fury Born David Weber, 2006-04 Captain Alicia DeVries, Imperial Cadre, has been many things in her life. An Imperial Marine, dedicated to the protection and preservation of the Terran Empire she loves. An Imperial Cadre

drop commando, personal liegwoman of Emperor Seamus II, whom she honors and reveres. Hero of the Terran Empire, one of only three living holders of the Banner of Terra. And now, outcast, rogue, pirate ... and madwoman. From the time she graduated from high school, Alicia DeVries knew what she wanted to do with her life, and she did it well. On planets like Gyangtse, Chengchou, Fuller, and Louvain - in cities like Zhikotse and Shallingsport - she's put her life on the line in defense of her Empire and Emperor again and again. She's given her blood, and the lives of men and women closer to her than brothers and sisters. But her dead have been betrayed in the name of political expediency. The justice they deserved has been denied, and a brokenhearted Alicia DeVries has resigned her commission and retired to the colony world of Mathison with her family to begin a new life. Yet Alicia is still a warrior, and the pirates who attacked Mathison, tortured and murdered her family, and left her for dead, are about to discover just how big a mistake they made. Imperial Intelligence can't find them. The Imperial Fleet can't catch them. Local defenses can't stop them. But Alicia has stolen an imperial A1 starship from the bleeding edge of technology and set out to teach them what vengeance truly is. Her fellow veterans think she's gone mad, the Fleet has shoot-on-sight orders, and the pirates have allies at the highest levels of the Imperial government. But Alicia DeVries has two allies of her own. Allies no one knows about. Allies as implacable as she is: a self-aware computer, and a creature from the mists of Old Earth's most ancient legends.--BOOK JACKET.
