Pacific Payback Stephen L. Moore, 2015-06-02 "Deeply researched and well written....By far the most detailed account of USS Enterprise's dive-bombers and their decisive role at the Battle of Midway."* Sunday, December 7, 1941, dawned clear and bright over the Pacific.... But for the Dauntless dive-bomber crews of the USS Enterprise returning to their home base on Oahu, it was a morning from hell. Flying directly into the Japanese ambush at Pearl Harbor, they lost a third of their squadron and witnessed the heart of America's Navy broken and smoldering on the oil-slicked waters below. The next six months, from Pearl Harbor to the Battle of Midway—a dark time during which the Japanese scored victory after victory—this small band of aviators saw almost constant deployment, intense carrier combat, and fearsome casualties. Many were killed by enemy Zero fighters, antiaircraft fire, or deadly crash landings in the Pacific, while others were captured and spent years in POW camps. Yet the Enterprise's Dauntless crews would be the first to strike an offensive blow against Japanese installations in the Marshall Islands, would be the first to sink a Japanese warship, and would shepherd the Doolittle Raiders' bombing of Tokyo. Not until Midway, though, would Dauntless crews get the chance to settle the score...and change the course of World War II. Drawing on dozens of new interviews and oral histories, author Stephen L. Moore brings to life inspiring stories of individual sacrifice and bravery—and the sweeping saga of one of America's greatest triumphs. INCLUDES PHOTOS

Victory at Midway James M. D'Angelo, 2018-01-13 In the five months after Pearl Harbor, the Imperial Japanese Navy won a string of victories in a campaign to consolidate control of Southeast Asia and the South Pacific. In June of 1942, Japan suffered a devastating defeat at the Battle of Midway and was never again able to take the offensive in the Pacific. Bringing fresh perspective to the battle and its consequences, the author identifies Japan's operational plan as a major factor in its Navy's demise and describes the profound effects Midway had on the course of the war in Europe.

The Aircraft Carrier Hiryu Stefan Draminski, 2022-07-07 A uniquely detailed study of a Japanese aircraft carrier that took part in the attack on Pearl Harbor, before being sunk at Midway. Superbly illustrated with line drawings, full-colour artwork of the ship through its career, internal reconstructions of deck layouts, and 3D illustrations of every detail of the ship from its rigging to its aircraft to its anchors, this book reconstructs and dissects one of the most prominent carriers of the early Pacific War. Built in the late 1930s, Hiryu took part in the attack on Pearl Harbor and most of the operations of Japan's triumphant first months of the war, before being sunk at Midway. Drawing on Stefan Draminski's new research and making the best use yet of his acclaimed 3D illustration techniques, this is the most comprehensive examination of Hiryu ever published. It includes a complete set of detailed line drawings with fully descriptive keys and full-color 3D artwork, supported by technical details, photographs, and a concise history of the ship's construction and service.

Into the Dark Water John J. Domagalski, 2014-04-19 The complete World War II record of one of the most celebrated warships in American history—made famous by her final commanding officer, John F. Kennedy. Fleshing out the little-known chronicle of this patrol torpedo boat under two officers during the swirling battles around Guadalcanal, "John Domagalski brings PT-109 and her crew back to life once again and, in doing so, honors all who served in the patrol torpedo service" (Military Review). In these mainly nocturnal fights, when the Japanese navy was at its apex, America's small, fast-boat flotillas darted in among the enemy fleet, like a "barroom brawl with the lights turned out." Bryant Larson and Rollin Westholm preceded Kennedy as commanders of PT-109, and their fights leading the ship and its brave crew hold second to none in the chronicles of US Navy daring. As the battles moved on across the Pacific, the PT-boat flotillas gained confidence, even as the Japanese, too, learned lessons on how to destroy them. Under its third and final commander, Kennedy, PT-109 met its fate as a Japanese destroyer suddenly emerged from a dark mist and rammed it in half. Two crewmen were killed immediately, but Kennedy, formerly on the swim team at Harvard, was able to shepherd his wounded and others to

refuge. His unsurpassed gallantry cannot resist retelling, yet the courage of the book's previous commanders have not until now seen the light of day. This book provides the complete record of PT-109 in the Pacific, as well as a valuable glimpse of how the American Navy's daring and initiative found its full playing field in World War II.

Shattered Sword Jonathan Parshall, Anthony Tully, 2011 Many consider the Battle of Midway to have turned the tide of the Pacific War. It is without question one of the most famous battles in history. Now, for the first time since Gordon W. Prange's bestselling *Miracle at Midway*, Jonathan Parshall and Anthony Tully offer a new interpretation of this great naval engagement. Unlike previous accounts, *Shattered Sword* makes extensive use of Japanese primary sources. It also corrects the many errors of Mitsuo Fuchida's *Midway: The Battle That Doomed Japan*, an uncritical reliance upon which has tainted every previous Western account. It thus forces a major, potentially controversial reevaluation of the great battle. The authors examine the battle in detail and effortlessly place it within the context of the Imperial Navy's doctrine and technology. With a foreword by leading WWII naval historian John Lundstrom, *Shattered Sword* will become an indispensable part of any military buff's library. Winner of the 2005 John Lyman Book Award for the Best Book in U.S. Naval History and cited by *Proceedings* as one of its Notable Naval Books for 2005.

Blazing Star, Setting Sun Jeffrey Cox, 2020-06-25 From popular Pacific Theatre expert Jeffrey R. Cox comes this insightful new history of the critical Guadalcanal and Solomons campaign at the height of World War II. Cox's previous book, *Morning Star, Rising Sun*, had found the US Navy at its absolute nadir and the fate of the *Enterprise*, the last operational US aircraft carrier at this point in the war, unknown. This second volume completes the history of this crucial campaign, combining detailed research with a novelist's flair for the dramatic to reveal exactly how, despite missteps and misfortunes, the tide of war finally turned. By the end of February 1944, thanks to hard-fought and costly American victories in the first and second naval battles of Guadalcanal, the battle of Empress Augusta Bay, and the battle of Cape St George, the Japanese would no longer hold the materiel or skilled manpower advantage. From this point on, although the war was still a long way from being won, the American star was unquestionably on the ascendant, slowly, but surely, edging Japanese imperialism towards its sunset. Jeffrey Cox's analysis and attention to detail of even the smallest events are second to none. But what truly sets this book apart is how he combines this microscopic attention to detail, often unearthing new facts along the way, with an engaging style that transports the reader to the heart of the story, bringing the events on the deep blue of the Pacific vividly to life.

USN Destroyer vs IJN Destroyer Mark Stille, 2012-11-20 This book covers the fierce night naval battles fought between the US Navy and the Imperial Japanese Navy during late 1943 as the Allies advanced slowly up the Solomons Islands toward the major Japanese naval base at Rabaul. During this period, several vicious actions were fought featuring the most modern destroyers of both navies. Throughout most of 1942, the Imperial Navy had held a marked edge and a key ingredient of these successes was their destroyer force, which combined superior training and tactics with the most capable torpedo in the world. Even into 1943 mixed Allied light cruiser/destroyer forces were roughly handled by Japanese destroyers. After these

battles, the Americans decided to stop chasing Japanese destroyers with cruisers so the remainder of the battles in 1943 (with one exception) were classic destroyer duels. The Americans still enjoyed the technical edge provided to them by radar, and now added new, more aggressive tactics. The final result was the defeat of the Imperial Navy's finely trained destroyer force and the demonstration that the Japanese were unable to stop the Allies' advance.

Great Naval Battles of the Pacific War, 2022-06-20 This volume of U.S. Navy reports offers an authoritatively detailed, refreshingly immediate perspective on the major battles of WWII in the Pacific. Scores of historians have chronicled the naval battles fought against Imperial Japan during the Second World War. But as we know, hindsight gives us 20/20 vision. The accounts collected in this volume were written during or immediately after the war—before historians had begun to interpret these momentous events. These accounts were never intended for the general public and are therefore unburdened by jingoistic bias or literary posturing. The authors simply relate each battle accurately and dispassionately, producing a document that reads like a running commentary. Action follows action, minute by minute. Clear, thorough, and utterly impartial, this is the permanent record of these five major battles, each of which represents a dramatic turning point in the struggle for the Pacific.

Midway: Dauntless Victory Peter C. Smith, 2008-03-25 This is an in-depth study of the battle of Midway that reviews the many previous accounts and compares their accuracy and veracity with fresh documentation that has been released recently, including new material on the post-war analysis made by a US select committee. There are new viewpoints on the muddle among the US Admirals; the total failure of the USAAF, despite elaborate claims; fresh thinking on the part played by the US Navy Dauntless dive-bombers in the action; the mystery of the carrier *Saratoga*'s presence; Hollywood's totally wrong take on the battle in all the films since made about it. Also, included are new eyewitness accounts the author has obtained and information from Japanese sources that has never been previously published. The lengthy Appendices will include statistical details of the ships, the planes and the men.

Tin Cans and Greyhounds Clint Johnson, 2019-02-12 For men on destroyer-class warships during World War I and World War II, battles were waged “against overwhelming odds from which survival could not be expected.” Those were the words Lieutenant Commander Robert Copeland calmly told his crew as their tiny, unarmored destroyer escort rushed toward giant, armored Japanese battleships at the Battle off Samar on October 25, 1944. This action-packed narrative history of destroyer-class ships brings readers inside the half-inch-thick hulls to meet the men who fired the ships' guns, torpedoes, hedgehogs, and depth charges. Nicknamed tin cans or greyhounds, destroyers were fast escort and attack ships that proved indispensable to America's military victories. Beginning with destroyers' first incarnation as torpedo boats in 1874 and ending with World War II, author Clint Johnson shares the riveting stories of the Destroyer Men who fought from inside a tin can—risking death by cannons, bombs, torpedoes, fire, and drowning. The British invented destroyers, the Japanese improved them, and the Germans failed miserably with them. It was the Americans who perfected destroyers as the best fighting ship in two world wars. *Tin Cans & Greyhounds* compares the designs of these countries with focus on the old, modified World War I destroyers, and the new and numerous World War II destroyers of the United States. *Tin Cans & Greyhounds* details how destroyers fought submarines, escorted convoys, rescued sailors and airmen, downed aircraft, shelled beaches, and attacked armored battleships and cruisers with nothing more than a half-inch of steel separating their crews from the dark waves.

Imperial Japanese Navy Destroyers 1919-45 (2) Mark Stille, 2013-09-20 During the Pacific War the most successful component of the Imperial Japanese Fleet was its destroyer force. These ships were larger and, in most cases, better-equipped than their Allied counterparts. Armed with a powerful, long-ranged torpedo, these ships proved formidable opponents. Initially, they were instrumental in an unbroken string of Japanese victories, but it was not until the Guadalcanal campaign that these ships fully demonstrated their power. In a series of daring night actions, they devastated

Allied task forces with their deadly torpedoes. This volume details the history, weapons and tactics of the Japanese destroyers built just before and throughout the war, including the famous Kagero and Yugumo classes, the experimental destroyer Shimakaze that boasted a top speed of almost 40 knots and 15 torpedo tubes, and the Matsu class that represented the Japanese equivalent to an Allied destroyer escort. These ships were designed to be built quickly and cheaply, but proved to be very tough in combat.

Santa Cruz 1942 Mark Stille, 2012-09-20 Despite myth, the Japanese carrier force was not destroyed at Midway but survived to still prove a threat in the Pacific Theater. Nowhere was this clearer than in the battle of Santa Cruz of October 1942. The stalemate on the ground in the Guadalcanal campaign led to the major naval forces of both belligerents becoming inexorably more and more involved in the fighting, each seeking to win the major victory that would open the way for a breakthrough on land as well. The Japanese were able to gain a tactical victory at Santa Cruz and came very close to scoring a strategic victory, but they paid a very high price in aircraft and aircrew that prevented them from following up their victory. In terms of their invaluable aircrew, the battle was much more costly than even Midway and had a serious impact on the ability of the Japanese to carry out carrier warfare in a meaningful manner.

Operation KE Dennis R Letourneau, J. A. R Letourneau, 2012-11-15 Operation KE explores the air combat that attended the Japanese evacuation of Guadalcanal in early 1943—a topic which has hitherto received very little attention. Operation KE was successful largely because Japanese strategic planning and tactical execution was basically sound. The traditional view holds that the Japanese got away with the initiative largely because the Americans let them; the US Pacific high command felt it was not worth the effort to try and stop them. Letourneau contends that this was not entirely the case. He argues that the Cactus Air Force and Guadalcanal-based naval units did their best to disrupt the evacuation, still believing that the Tokyo Express was bringing reinforcements and supplies to the 17th Army. Other US forces in the South Pacific did make a half-hearted and questionably-executed attempt to stop the Japanese, but were bluffed into adopting a wait-and-see posture. Operation KE focuses on the air war fought between the Cactus and US 13th Air Forces on the one hand and the Japanese Navy and Army Air Forces on the other, from mid-December, 1942 to mid-February, 1943. The book scrutinizes the US air strikes against the six KE-related Tokyo Express destroyer runs, plus related air strikes against the Japanese merchant marine, as well as air and naval base-suppression missions undertaken by both sides, to determine what actually happened in order to analyze why the Japanese evacuation succeeded and why Cactus failed to stop it. Background chapters attempt to assess the respective states of readiness of the Japanese and US air arms in the South Pacific to support on the one hand and counter on the other the execution of Operation KE. The central portion of the book narrates in some detail what actually occurred in the air and at sea—including air strikes, fighter sweeps, base suppression missions, and naval sorties—during the crucial prelude to and the actual playing out of the interrelated events that comprised the evacuation operation. Concluding chapters analyze, on both strategic and tactical levels, the Japanese planning and execution of Operation KE, and Cactus' initiatives to interdict KE's successful prosecution. The authors conclude that both the Japanese and the American states of readiness on the eve of Operation KE suffered in such matters as optimizing both resources and operating procedures, and combating a hostile environment. Consequently, both combatants were somewhat handicapped in their abilities respectively to carry out and contest Operation KE. The author contends that the Japanese developed a reasonably sound strategy that exploited those methods and tools of war then in use in the South Pacific; to achieve success, they maximized their own strengths while taking advantage of their adversary's limitations. Contrary to the traditional view, the authors are of the opinion that Japanese utilization of their newly-built airstrip at Munda in the Central Solomons played an important role in the success of Operation KE, which was in keeping with the long-range intention of developing Munda and Vila airstrips as major forward airbases to defend against any Allied push toward Rabaul through the Solomons. The U.S., on the other hand, by consistently misreading Japanese intent regarding Operation KE and pursuing a

cautious offensive strategy, blunted the tactical impact of their initiatives to counter the evacuation. Several imprudent tactical decisions and a misallocation of resources further diluted the strength of US efforts.
