Mammoth Jill Baguchinsky, 2018-11-06 The summer before her junior year, paleontology geek Natalie Page lands a coveted internship at an Ice Age dig site near Austin, Texas. Natalie, who's also a plus-size fashion blogger, depends on the retro style and persona she developed to shield herself from her former bullies, but vintage dresses and designer heels aren't compatible with digging for fossils. But nothing is going to dampen her spirit. She's exactly where she wants to be, and gets to work with her hero, the host of the most popular paleontology podcast in the world. And then there's Chase, the intern, who's seriously cute, and Cody, a local boy who'd be even cuter if he were less of a grouch. It's a summer that promises to be about more than just mammoths. Until it isn't. When Natalie's paleontologist hero turns out to be anything but, and steals the credit for one of her accomplishments, she has to unearth the confidence she needs to stand out in a field dominated by men. To do this, she'll have to let her true self shine, even if that means defying the rules and risking her life for the sake of a major discovery. While sifting through dirt, she finds more than fossils—she finds out that she is truly awesome.

Mammoth John Varley, 2020-09-22 A “rollicking, bittersweet tale of time travel and ecology” from the Nebula and Hugo Award-winning author of the Gaea Trilogy (Publishers Weekly, starred review). “H. G. Wells meets Jurassic Park” in this novel about a multibillionaire, a time machine, and a baby woolly mammoth named Little Fuzzy (The Best Reviews). The discovery of a perfectly preserved frozen mammoth in the Canadian wilderness gives wealthy visionary Howard Christian the opportunity of a lifetime: to clone it. But what really piques Christian's curiosity is what he finds next to the mammoth: a metal box—and the mummified body of a man wearing a watch. Working to discover the box's purpose and clone the mammoth, a top physicist and an elephant veterinarian will be flung thousands of years into the past and back again—bringing a baby mammoth along for the ride—in this “imaginative and engaging” adventure that shows “Varley . . . in top form” (San Francisco Chronicle). Praise for John Varley “John Varley is the best writer in America.” —Tom Clancy “There are few writers whose work I love more than John Varley's, purely love.” —Cory Doctorow “One of science fiction's most important writers.” —The Washington Post “Inventive.” —The New York Times “One of the genre's most accomplished storytellers.” —Publishers Weekly

The Mammoth Book of Cthulhu Paula Guran, 2016-04-14 For more than 80 years H. P. Lovecraft has inspired writers of horror and supernatural fiction with his dark vision of humankind's insignificant place in a vast, uncaring cosmos. At the time of his death in 1937, Lovecraft was virtually unknown, but from early cult status his readership expanded exponentially; his nightmarish visions laying down roots in the collective imagination of his readers. Now this master of the macabre is accepted as part of the literary mainstream, as an American author of note, and the impact of his work on modern popular culture - in literature, film, television, music, the graphic arts, gaming and theatre - has been profound. As Stephen King wrote in *Danse Macabre*, the shadow of H. P. Lovecraft 'underlies almost all of the important horror fiction that has come since.' Today, Lovecraft's themes of cosmic indifference, the utter insignificance of humankind, minds invaded by the alien, and the horrors of history remain not only viable motifs for modern speculative fiction, but are more relevant than ever as we explore the mysteries of a universe in which our planet is infinitesimal. This outstanding anthology of original stories - from both established award-winning authors and exciting new voices - collects tales of cosmic horror inspired by Lovecraft from authors who do not merely imitate, but reimagine, re-energize, and renew the best of his concepts in ways relevant to today's readers, to create fresh new fiction that explores our modern fears and nightmares. From the depths of R'lyeh to the heights of the Mountains of Madness, some of today's best weird fiction writers traverse terrain created by Lovecraft and create new eldritch geographies to explore . . . With stories by: Laird Barron, Nadia Bulkin, Amanda Downum, Ruthanna Emrys, Richard Gavin, Lois H. Gresh, Lisa L. Hannett, Brian Hodge, Caitlín R. Kiernan, John Langan, Yoon Ha Lee, Usman T. Malik, Helen Marshall, Silvia Moreno, Norman Partridge, W. H. Pugmire, Veronica Schanoes, Michael Shea, John Shirley, Simon Strantzas, Sandra McDonald, Damien Angelica Walters, Don Webb, Michael Wehunt and A.C. Wise Praise for the editor: 'For fans of Lovecraftian fiction and well-wrought horror' - Library Journal 'Guran smartly selects stories that evoke the spirit of Lovecraft's work without mimicking its style.' - Publishers Weekly 'It's a pretty impressive line-up, with nary a clunker to be found. . . . You don't have to be a Lovecraft fan to enjoy this anthology... You'll find alienation, inhumanity, desperation, cruelty, insanity, hopelessness and despair, all set against the backdrop of a vast, unknowable universe filled with vile, indifferent monstrosities. You'll also find beauty, hope, redemption, and the struggle for survival. What more can you ask for?' - Tor.com 'I highly recommend this collection... If you have even the slightest interest in contemporary horror fiction, you'll want to try this one on for size!' - BookGuide

Discovering the Mammoth: A Tale of Giants, Unicorns, Ivory, and the Birth of a New Science John J. McKay, 2017-08-08 The fascinating saga of solving the mystery of this ancient animal who once roamed the north country—and has captivated our collective imagination ever since. Today, we know that a mammoth is an extinct type of elephant that was covered with long fur and lived in the north country during the ice ages. But how do you figure out what a mammoth is if you have no concept of extinction, ice ages, or fossils? Long after the last mammoth died and was no longer part of the human diet, it still played a role in human life. Cultures around the world interpreted the remains of mammoths through the lens of their own worldview and mythology. When the ancient Greeks saw deposits of giant fossils, they knew they had discovered the battle fields where the gods had vanquished the Titans. When the Chinese discovered buried ivory, they knew they had found dragons' teeth. But as the Age of Reason dawned, monsters and giants gave way to the scientific method. Yet the mystery of these mighty bones remained. How did Enlightenment thinkers overcome centuries of myth and misunderstanding to reconstruct an unknown animal? The journey to unravel that puzzle begins in the 1690s with the arrival of new type of ivory on the European market bearing the exotic name mammoth. It ends during the Napoleonic Wars with the first recovery of a frozen mammoth. The path to figuring out the mammoth was traveled by merchants, diplomats, missionaries, cranky doctors, collectors of natural wonders, Swedish POWs, Peter the Great, Ben Franklin, the inventor of hot chocolate, and even one pirate. McKay brings together dozens of original documents and illustrations, some ignored for centuries, to show how this odd assortment of characters solved the mystery of the mammoth and, in doing so, created the science of paleontology.

The Mammoth Book of Extreme Science Fiction Mike Ashley, 2010-07-31 Here are 25 stories of science fiction that push the envelope, by the biggest names in an emerging new crop of high-tech futuristic SF - including Charles Stross, Robert Reed, Alastair Reynolds, Peter Hamilton and Neal Asher. High-tech SF has made a significant comeback in the last decade, as bestselling authors successfully blend the super-science of 'hard science fiction' with real characters in an understandable scenario. It is perhaps a reflection of how technologically controlled our world is that readers increasingly look for science fiction that considers the fates of mankind as a result of increasing scientific domination. This anthology brings together the most extreme examples of the new high-tech,

far-future science fiction, pushing the limits way beyond normal boundaries. The stories include: A Perpetual War Fought Within a Cosmic String, A Weapon That Could Destroy the Universe, A Machine That Detects Alternate Worlds and Creates a Choice of Christs, An Immortal Dead Man Sent To The End of the Universe, Murder in Virtual Reality, A Spaceship So Large That There is An Entire Planetary System Within It, and An Analytical Engine At The End of Time, and Encountering the Untouchable.

The Mammoth Book of Vampire Romance Trisha Telep,2009-06-01 Paranormal romance is a supernatural force to be reckoned with. Although packed with a menagerie of werewolves, shapeshifters and assorted demons, its undisputed king is none other than our favourite centuries-old bloodsucker - the vampire. But it doesn't stop there. This Mammoth collection opens a vein to reveal the mind-boggling scope of the supercharged phenomenon created when vampires met romance. Let the biggest and brightest names in the paranormal romance business take you hot on the haemoglobin trail of the sexiest creatures of the night. Bubble Chamber Dave Kress,2019-08-20 Fiction. The book BUBBLE CHAMBER is comprised of two complimentary novellas: Buda and Pest follows a group of Hungarian rebels through invasion and occupation, first by the Nazis and, later, the Soviets. Their story rides the fault lines of life and death, myth and history, peace and war, futures and pasts, folk wisdom and science, the hush of the unspeakable and the irresistible rummage for words equal to a thorny truth. Every juncture of this adventure compels the friends to broker yet another radical split. Fads and Fallacies in the Name of Science re-imagines Martin Gardner's 1957 masterpiece of scientific skepticism as a murder mystery and narrative puzzle. A lab technician has been arrested for the murder of Muriel Arkade, Director of the Center for Applied Science and Engineering. But why did he do it? The answer may lie in his obsession not only with Arkade, but with a host of crackpot theories, from Dianetics to Lysenkoism to ufology to general semantics to... His colorful elaborations on these theories, which he uses to rationalize his heinous act, form part of an unpublishable annotated bibliography he calls Myth After All. But what is myth? What is all?

The Mammoth Book of Time Travel Romance Trisha Telep,2009-10-29 Time travel romance is not the same thing as sci-fi romance, though some stories may be set in an imagined future; it is romantic fiction set in various different eras, usually from around the sixteenth to the eighteenth centuries. A woman may fall asleep in Central

Park in the present to wake up in the arms of a Scottish laird in the sixteenth century. The Mammoth Book of Time Travel Romance contains 25 stories of adventure and love; settings include medieval Scotland, sixteenth-century England, the nineteenth-century 'Wild West'. Some stories are set in the present and a few in the future. Stories include an Elizabethan nobleman whisked into the present day, a troubled young woman who lands in the sixteenth century able to break a curse of lost love. Includes stories from: Nina Bangs, Jude Deveraux, Sandra Hill, Linda Howard, Lynn Kurland, Karen Marie Moning, and many more.

The Mammoth Book of Alternate Histories Ian Watson, Ian Whates, 2010-02-25 Every short story in this wonderfully varied collection has one thing in common: each features some alteration in history, some divergence from historical reality, which results in a world very different from the one we know today. As well as original stories specially commissioned from bestselling writers such as James Morrow, Stephen Baxter and Ken MacLeod, there are genre classics such as Kim Stanley Robinson's story of how World War II atomic bomber the Enola Gay, having crashed on a training flight, is replaced by the Lucky Strike with profoundly different consequences. Praise for the editors: 'Mr Watson wreaks havoc with what is accepted - and acceptable.' The Times 'One of Britain's consistently finest science fiction writers.' New Scientist
