Economical Bridge Solutions based on innovative composite dowels and integrated abutments Edward Petzek,Radu Băncilă,2014-08-26 The bridges are vital structures for the transport infrastructure. It is a fact that, in the last decades, composite bridges became a well-liked solution in many European countries as a cost-effective and aesthetic alternative to concrete bridges. Their competitiveness depends on several circumstances such as site conditions, local costs of material and staff and the contractor's experience. Beside the classical solutions, the new ones with efficient design and construction improve and consolidate the market position of steel construction and steel producing industry. The book contains the technical description, the construction details, economic aspects and the results of monitoring and testing of already executed bridge structures implementing composite dowels realised within the research RFCS project entitled Eco Bridge.

Advances in Applied Digital Human Modeling and Simulation Vincent Duffy,2020-07-19 This book, *Advances in Applied Digital Human Modeling*, is concerned with Modeling, Biomechanics and Simulation. The benefit of this area of research is to aid in the design of systems. Human modeling and simulation can reduce the need for physical prototyping and incorporate ergonomics and human factors earlier in design processes. These models provide a representation of some human aspects that can be inserted into simulations or virtual environments and facilitate prediction of safety, satisfaction, usability, performance and sustainability. These may consider the physiological, cognitive, behavioral, emotional and environmental aspects. The math and science provides a foundation for visualizations that can facilitate decision making by technical experts, management or those responsible for public policy.

Guy Martin: My Autobiography Guy Martin,2014-05-08 The Phenomenal Sunday Times No1 Bestseller 'It was the start of the third lap of the 2010 Senior TT, the last race of the fortnight. The last chance to get a TT win for another year, and I was pushing hard. Ballagarey. The kind of corner that makes me continue road racing. A proper man's corner. You go through the right-hander at something like 170mph, leant right over, eyes fixed as far down the road as I can see. But this time something happened. This time the front end tucked ...' Guy Martin, international road-racing legend, maverick star of the Isle of Man TT, truck mechanic and TV presenter, lives on the edge, addicted to speed, thoroughly exhilarated by danger. In this book we'll get inside his head as he stares death in the face, and risks his life in search of the next high. We'll discover what it feels like to survive a 170mph fireball at the TT in 2010, and come back to do it all again. He'll sweep us up in a gritty sort of glory as he slogs it out for a place on the podium, but we'll also see him struggle with the flipside of fame. We'll meet his friends and foes, his family, his teammates and bosses and we'll discover what motivates him, and where his strengths and weaknesses lie. For the first time, here is the full story in Guy's own words. From the boy who

learned to prep bikes with his dad, to the spirited team mechanic, paying his way by collecting beer glasses in pubs, to the young racer at the start of his first race and the buzz he's been chasing ever since. This thrilling autobiography is an intense and dramatic ride.

Malcolm McDonald on Value Propositions Malcolm McDonald,Grant Oliver,2018-10-03 While many organizations understand the importance of having a clearly defined value proposition to help them become more profitable, many businesses struggle to use them effectively. This book will show you how to develop a financially quantified value proposition that drives growth. A value proposition is an innovation or feature that clarifies a company's core purpose and identity. In the same way profit lies at the heart of every business, so does the value proposition, communicating how its service or products fulfil the needs of their customers. Malcolm McDonald on Value Propositions is a step-by-step guide to understanding exactly why financially quantified value propositions will help readers to increase revenue and deliver tangible results. Highly practical and filled with useful tools and checklists, this succinct guide explains the process of developing a value proposition from start to finish, how to use segmentation appeal to the relevant key accounts, and to ensure it is both financially grounded and has resonance with customers. From understanding how buying decisions are made, through to financial dashboards and value quantification tools, Malcolm McDonald on Value Propositions is perfect for anyone looking to integrate financial success into their proposition, and gain understanding of how it can be used to deliver and communicate value.

Speed Guy Martin,2014-01-02 Guy Martin, lorry mechanic, motorcycle racing legend and favourite of the Isle of Man TT, lives for the buzz he feels racing his bike round terrifying bends at 200mph. Nothing, he claims, can match it. Or can it? Guy is about to find out ... Guy faces four dangerous and thrilling speed record challenges, pushing the boundaries of speed, and his body, to determine just how fast one man can go. Together with the best of British engineering and design, scientific research, ground breaking technology and a Gold-medal-winning athlete or two, Guy attempts to pedal a bicycle over 100mph by using the slipstream of an articulated lorry; build the world's fastest human-powered aircraft; hydroplane a modified motocross bike across a two kilometre lake and become the fastest man on a toboggan. Tying in with the Channel 4 television series, Speed offers the inside track - the feats of engineering, the science behind the speed, the history of the challenges and Guy's adrenaline fuelled, jaw-dropping attempts to break the records. How do you create an aeroplane frame that's super light but safe enough to crash? What should you fill your bicycle tyres with if common air will explode under the heat of

100mph speeds? And why is the shape of a peregrine falcon the ideal model for a toboggan? Exploring aerodynamics, surface tension, friction, gravity and ground effect, Guy discovers how and why things go really fast.

The Road to Zero Emissions Dennis Evans, Des Evans, Alistair Williamson, 2020-09-10 The transport industry has an important role to play in addressing climate change and the environmental challenges facing governments, businesses and individuals. Achieving net zero emissions by 2050 will require this sector, which is a large contributor of emissions, to innovate, adapt and drive positive change. New technologies including batteries and alternative fuels will all be significant, as will developing different approaches and outlooks. The Road to Zero Emissions is the comprehensive guide for those in the transport industry to understanding what can and is being done to tackle climate change. Through examining established companies and new entrants in the automotive space, readers are provided with examples of the importance of infrastructure, business innovation and financing for the future. In addition to this, the role of governments in establishing policies, such as zero-emission zones, is also discussed. Progressing towards zero emissions requires immediate change and this book will start you on the journey.

Model Truck Trial Arnd Bremer ,Milan Buhman, Trial comes from the English word to try, synonymous with the German versuchen. The original vehicles in the German and European Truck Trial Championship are all about off-road skill tests with the purpose of testing how to handle the vehicle. The concept of the Model Truck Trial is based on the originals. As with the big ones, the trucks drive a set course through the most difficult terrain. In addition to the detailed description of this relatively young model sport, the authors Arnd Bremer and Milan Buhmann pass on their know-how of model building practice to the reader.

Asemic Writings 2 Mark Urizar, Zbigniew Jaworski, 2022-06-26 This coded asemic book has many deciphered messages that reveal an intriguing tale of the unforgiven, La Mancha. This sentenced individual accrued substantial karmic debt that caused a cosmic imbalance. This had to be corrected and reconciled. For just punishment, a miserable life full of hardship was fated. The accrued karmic debt is the sum of all the resulting bad we had done. These are our bad choices, decisions, brutal acts, past sins, and misdeeds waiting to be reconciled. Death does not erase these, nor does karma dismiss or forget these. Rather, they become the karmic debt that will outlive us, our flesh, and will be remembered, passing onto all our future incarnations. Whilst freedom tempts us, we are required

to live just, moral, and ethical lives. We are also obliged to atone and reconcile all the bad we had done. Life provides ample opportunity and time to reconcile this. And we are afforded many lifetimes to repent, atone for our sins, and redeem ourselves. However, we must choose to do so. La Mancha had failed to do so and remained unrepentant. For an eternity, persistent bad was done that eventually forced karma to intervene and punish this unrepentant soul. This led to this fated, sentenced life of inescapable misery. This is the story of the La Mancha, the unforgiven.
