The World of Custom Trucks Ferdy De Martin,Xavier Stefaniak,2013-03-26 Although truck efficiency and performance are priorities for operators and drivers, their pride in their vehicles shows itself in the way that so many are customised and decorated. Ferdy De Martin & Xavier Stefaniak have selected 29 examples of currently working trucks whose decoration is an art form, ranging from the delicate and subtle to transport rococo - a phantasmagoria of images in bright colours. The imaginative designs, high standard of craftsmanship and superb finish create unique vehicles that are immediately recognisable and attract devoted followers. Over 250 fantastic photographs are accompanied by concise captions that are both enthusiastic and illuminating; the authors do full justice to the trucks. The text is in English with synopses in French, and each truck is presented with a number of photographs to show off both the overall designs as well as the details of exteriors and interiors. This is a truly international selection of machines, with eighteen of the twenty-nine trucks featured from Europe, eight from North America and three from the UK. Original manufacturers include Volvo, Scania, Mercedes and Peterbilt.

Taurine 5 John B. Lombardini,Stephen W. Schaffer,Junichi Azuma,2012-12-06 The Taurine Symposium- Taurine: Beginning the 21<sup>st</sup> Century- was held September 20-23, 2002, on the beautiful island of Kauai in Hawaii. The headquarters of the meeting was the Radisson Kauai Beach Resort. This international meeting was attended by approximately 80 individuals from 23 nations and 4 continents. Seventy-five papers were presented either as platform presentations or poster presentations. Taurine, first isolated from ox bile in 1827 by Tiedemann and Gmelin and named in

1838 by Demarcay, became of significant scientific interest in 1968 when the first extensive review article was published by Jacobsen and Smith. Interest in taurine grew exponentially after 1975 when the first taurine symposium was organized by Ryan Huxtable in Tucson, Arizona. Since that date, taurine symposia have been held approximately every two years held in various cities and resort areas around the world. Taurine investigators have had the privilege of attending these scientific meetings on three continents - Asia, Europe, and North America. Since the initial meeting in 1975, a central question addressed during many of the symposia has been: What is physiological, pharmacological, nutritional, and pathological role of taurine?. Although taurine has been established as an important osmolyte, it appears to affect many other biological processes. However, the exact mechanism(s) by which taurine acts has not yet been definitively answered. In Kauai, the participants discussed many topics and asked many questions regarding the role and actions of taurine.

**Lilavai** Kouhala, 2021-01-05 The Prakrit romance *Lāilāvaāi*, an early ninth-century poem attributed to Kouhala and set in modern-day coastal Andhra Pradesh, is the most celebrated work in the genre. Complexly narrated in the alternating voices of its heroines and heroes and featuring a cast of semi-divine and magical beings, it centers on three young women: *Lāilāvaāi*, princess of Sinhala (today's Sri Lanka); her cousin Mahanumai, princess of the mythical city Alaka; and Kuvalaavali, Mahanumai's adopted sister. Following a prophecy that *Lāilāvaāi*'s husband will rule the earth, the princess happens upon a portrait of King Hala of Pratihsthana and immediately falls in love. While journeying to meet him, she hears her cousins' tales of their lost loves, and then vows not to marry until they are reunited. To win *Lāilāvaāi*'s hand, King Hala journeys to the underworld, faces monsters, and overcomes armies. *Lāilāvaāi* explores themes of karma and female desire, notably privileging women as storytellers. A new edition of the Prakrit text, presented in the Devanagari script, accompanies a new English prose translation--
