Japanese Heavy Cruisers Steve Backer,2006 This volume is devoted to the largest, fastest and most powerful heavy cruisers of their era. Japanese striving for superiority in individual ships produced designs whose unusual lines, massive superstructure and heavy armament have made them a challenge to modelmakers ever since. Combined with a fighting record stretching from the first to the very last days of the war, this makes them one of the most popular of all subjects for warship modelling. This book will show ship modellers how to turn their kits into something really special, but its unparalleled level of visual information will also appeal to the more general warship enthusiast.

Halo: The Flood William C. Dietz,2019-01-01 The bestselling adaptation of the iconic video game Halo: Combat Evolved featuring the Master Chief—part of the expanded universe based on the award-winning video game series! 2552. Having barely escaped the final battle for Reach against the vast alien alliance known as the Covenant, the crew of the Pillar of Autumn, including Spartan John-117—the Master Chief—and his AI companion Cortana, is forced to make a desperate escape into slipspace. But their destination brings them to an ancient mystery and an even greater struggle. In this far-flung corner of the universe floats a magnificently massive, artificial ringworld. The crew's only hope of survival is to crash-land on its surface and take the battle opposing the Covenant to the ground. But they soon discover that this enigmatic ringworld is much more than it seems. Built one hundred thousand years ago by a long-lost civilization known as the Forerunners, this "Halo" is worshipped by the Covenant—a sacred artifact they hope will complete their religious quest for supposed transcendence, and they will stop at nothing to control it. Engaging in fierce combat, Master Chief and Cortana will go deep into the Halo construct and uncover its dark secret and true purpose—even as a monstrous and far more vicious enemy than the Covenant emerges to threaten all sentient life on Halo and the galaxy beyond...

Helfort's War Book 1: The Battle at the Moons of Hell Graham Sharp Paul,2007-09-25 "A planet-stomping space opera that bursts off the page like a tactical nuke."—John Birmingham, author of Weapons of Choice The Hammer Worlds—the most brutal and oppressive interstellar government in the universe—have hijacked the Federated Worlds cruise ship Mumtaz, seizing its valuable terraforming cargo and damning its passengers to mining the moons of the prison planet known as Hell. For Junior Lieutenant Michael Helfort and the crew aboard deep space scout vessel 387, the mission is clear: infiltrate enemy territory, locate the Mumtaz, and rescue the prisoners. The odds are appalling, and the damage will probably be fatal, but victory is nonnegotiable—especially for Helfort, whose mother and sister were on the Mumtaz. And Michael Helfort will be damned if he'll let his family rot on the moons of Hell.

Agents of Innovation John Trost Kuehn,2008-11-01 Agents of Innovation examines the influence of the General Board of the Navy as agents of innovation during the period between World Wars I and II. The General Board, a formal body established by the Secretary of the Navy to advise him on both strategic matters with respect to the fleet, served as the organizational nexus for the interaction between fleet design and the naval limitations imposed on the Navy by treaty during the period. Particularly important was the General Board's role in implementing the Washington Naval Treaty that limited naval armaments after 1922. The General Board orchestrated the efforts by the principal Naval Bureaus, the Naval War College, and the Office of the Chief of Naval Operations in ensuring that the designs adopted for the warships built and modified during the period of the Washington and London Naval Treaties both met treaty requirements while attempting to meet strategic needs. The leadership of the Navy at large, and the General Board in particular, felt themselves especially constrained by Article XIX (the fortification clause) of the Washington Naval Treaty that implemented a status quo on naval fortifications in the Western Pacific. The treaty system led the Navy to design a measurably different fleet than it might otherwise have in the absence of naval limitations. Despite these limitations, the fleet that fought the Japanese to a standstill in 1942 was predominately composed of ships and concepts developed and fostered by the General Board prior to the outbreak of war.
