The Exile G J Ogden, The Sa'Nerra have breached Fleet's front-line and are pushing toward Earth with an invasion armada. In its vanguard is the super-weapon known simply as Titan - a ten-kilometer-long battleship capable of destruction on a scale never seen before. With G-sector already surrendered to the enemy, Fleet reforms and prepares to guard the only interstellar aperture that links the colonies to Earth. But Captain Lucas Sterling knows that without a way to counter the Sa'Nerran neural control weapon, there is no way to stop the alien warriors from pushing deeper into Fleet space. With the alien invasion armada poised to cut off access to the Void, Captain Sterling and the crew of the Invictus must go against their orders and once again venture into this stellar no-man's land alone. Sterling knows that disgraced and exiled Fleet scientist, James Colicos, may be humanity's only hope to stop the invasion. But in order to find him, the Invictus has to venture beyond the Void and into Sa'Nerran space itself. The last time a Fleet ship burrowed too deeply into the aliens' territory, it started a war. Now, Captain Sterling and his Omega officers must violate the enemy's heartland once again. Except this time, Sterling is not looking to start a war - he is trying to end one.

B-25 Mitchell vs Japanese Destroyer Mark Lardas,2021-12-23 Throughout the first year of the war in the Pacific during World War II the USAAF was relatively ineffective against ships. Indeed, warships in particular proved to be too elusive for conventional medium-level bombing. High-level attacks wasted bombs, and torpedo attacks required extensive training. But as 1942 closed, the Fifth Air Force developed new weapons and new tactics that were not just effective, they were deadly. A maintenance officer assigned to a B-25 unit found a way to fill the bombardier's position with four 0.50-cal machine guns and strap an additional four 0.50s to the sides of the bomber, firing forward. Additionally, skip-bombing was developed. This called for mast-top height approaches flying the length of the target ship. If the bombs missed the target, they exploded in the water close enough to crush the sides. The technique worked perfectly when paired with "strafe" B-25s. Over the first two months of 1943, squadrons perfected these tactics. Then, in early March, Japan tried to reinforce their garrison in Lae, New Guinea, with a 16-ship convoy - eight transports guarded by eight destroyers. The Fifth Air Force pounced on the convoy in the Bismarck Sea. By March 5 all eight transports and four destroyers had been sunk This volume examines the mechanics of skip-bombing combined with a strafing B-25, assessing the strengths and weaknesses of the combatants (B-25 versus destroyer), and revealing the results of the attacks and the reasons why these USAAF tactics were so successful.

Maelstrom Taylor Anderson,2009-02-03 The spectacular alternate military history saga continues in the third novel in the New York Times bestselling Destroyermen series... Lieutenant Commander Matthew Reddy, along with the men and women of the battleship Walker, are once again at war. Having sided with the peaceful Lemurians against the savage, reptilian Grik, they now find themselves scrambling to prepare for the attack that is sure to come. Meanwhile, the Japanese juggernaut Amagi, also trapped in this strange world, is under Grik control. Soon, they will have amassed a force that no amount of fire-power and technology will be able to stop. Reddy, his crew, his allies, and his loved ones face annihilation. But if there is one thing they have learned about their new world, it is that hope-and help-may just be over the horizon...

See, Marlowe is dying - maybe today, maybe tomorrow, the only question is when. But Marlowe isn't about to go quietly into the night. They don't call him Destroyer for nothing.

The Ardennes, 1944-1945 Christer Bergstrom,2014-12-19 In December 1944, just as World War II appeared to be winding down, Hitler shocked the world with a powerful German counteroffensive that cracked the center of the American front. The attack came through the Ardennes, the hilly and forested area in eastern Belgium and Luxembourg that the Allies had considered a "quiet" sector. Instead, for the second time in the war, the Germans used it as a stealthy avenue of approach for their panzers. Much of U.S. First Army was overrun, and thousands of prisoners were taken as the Germans forged a 50-mile "bulge" into the Allied front. But in one small town, Bastogne, American paratroopers, together with remnants of tank units, offered dogged resistance. Meanwhile the rest of Eisenhower's "broad front" strategy came to a halt as Patton, from the south, and Hodges, from the north, converged on the enemy incursion. Yet it would take an epic, six-week-long winter battle, the bloodiest in the history of the U.S. Army, before the Germans were finally pushed back. Christer Bergström has interviewed veterans, gone through huge amounts of archive material, and performed on-the-spot research in the area. The result is a large amount of previously unpublished material and new findings, including reevaluations of tank and personnel casualties and the most accurate picture yet of what really transpired. The Ardennes Offensive has often been described from the American point of view; however, this balanced book devotes equal attention to the perspectives of both sides. With nearly 400 photos, numerous maps, and 32 superb color profiles of combat vehicles and aircraft, it provides perhaps the most comprehensive look at the battle yet published.
