Classic Ford F-Series Pickup Trucks, 1948-1956 Don Bunn, In 1948, the Ford Motor Company restyled its pickup line and identified each model with an F designation, from F-1 for their half-ton to F-8 for their three-ton. The fresh design of the F-Series quickly won the hearts of thousands of pickup buyers and, with only minor tweaks and updates, the basic design remained through the 1956 model year. That classic era of Ford pickups is captured in this color history devoting one chapter to each year in the F-Series first nine years. Featured are interviews with retired Ford designers and engineers, period advertisements, technical details, and sidebars highlighting little-known and interesting facts about this revolutionary era in pickup design. Modern color photography of restored pickups and archival black-and-white photos are accompanied by engineers' original drawings and artists' renderings.

The Legend of Henry Ford Keith Sward,1948

Ford Allan Nevins,Frank Ernest Hill,1963 The 3rd of three volumes telling the history of Ford Motor Company. This volume contains the moving personal story of an aging genius who battled valiantly but in vain to recover his position of supremacy in the motorcar industry. This account is tragic in that it involves Henry Ford's refusal to use the full talents of his gifted son Edsel, who might have helped him to win success. Edsel did much to strengthen the company, but he was not permitted to do all that he could. Ford rejected him as his chief adviser, Edsel died, and the firm, after losing other able executives, occupied a desperate position when Henry Ford II assumed full control.

Modernism and the Ideology of History Louise Blakeney Williams,2002-07-04 Louise Williams explores the nature of historical memory in the work of five major Modernists: Yeats, Pound, Hulme, Ford and Lawrence. These Modernists, Williams argues, started their careers with historical assumptions derived from the nineteenth century. But their views on the universal structure of history, on the abandonment of progress and the adoption of a cyclical sense of the past, were the result of important conflicts and changes within the Modernist period. Williams focuses on the period immediately before World War I, and shows in detail how Modernism developed and why it is considered a unique intellectual movement. She also revisits the theory that the Edwardian age was a difficult period of transition to the modern world. Finally, she illuminates the contribution of non-Western culture to the literature and thought of the period. This wide-ranging and inter-disciplinary study is essential reading for literary and cultural historians of the modernist period.

The Ford Motor Car and Truck and Tractor Attachments Harold Phillips Manly,2018-03-23 Excerpt from *The Ford Motor Car and Truck and Tractor Attachments: Their Construction, Care and Operation* When liquid gasoline is turned to a vapor or gas and mixed with air the mixture burns very easily. If this gasoline and air vapor is compressed into a small space it will ignite and burn so rapidly that the action is like an explosion. While burning, this mixture increases in volume and the resulting pressure is made to do the work of driving the car. In order to use the force of this explosive burning the mixture of gasoline vapor and air is placed in the cylinder of an engine. The upper end of this cylinder is closed and the lower end is open as shown in Figure 1. In the lower end is a piston which makes a gas tight fit in the cylinder, yet slides freely from end to end. The burning mixture drives the piston down toward the open end of the cylinder and this motion of the piston turns a shaft from which is secured power to turn the wheels. Attached to the engine is a device called a carburetor which turns the liquid gasoline into a vapor and mixes this vapor with the proper amount of air to make a combustible mixture. To set fire to the gas an electric spark is caused to jump between two metal points inside of the engine cylinder, and in jumping through the mixture this spark ignites the gas.
