Marines Under Armor Kenneth Estes, 2013-04-11 In this story of men, machines and missions, Kenneth Estes tells how the U.S. Marine Corps came to acquire the armored fighting vehicle and what it tried to do with it. The longtime Marine tank officer and noted military historian offers an insider's view of the Corps's acquisition and use of armored fighting vehicles over the course of several generations, a view that illustrates the characteristics of the Corps as a military institution and of the men who have guided its development. His book examines the planning, acquisition, and employment of tanks, amphibian tractors, and armored cars and explores the ideas that led to the fielding of these weapons systems along with the doctrines and tactics intended for them, and their actual use in combat. Drawing on archival resources previously untouched by researchers and interviews of both past and serving crewmen, Estes presents a unique and unheralded story that is filled with new information and analysis of the armored vehicles, their leaders, and the men who drove these steel chariots into battle. Such authoritative detail and documentation of the decisions to acquire, develop, and organize armored units in the U.S. Marine Corps assures the book's acknowledgement as a definitive reference.

No Shining Armor Otto J. Lehrack, 1992 An account of the Vietnam War, as seen by the American PFCs, sergeants and platoon leaders in the rivers and jungles and trenches. Into their stories, Lehrack has woven a narrative that explains the events they describe and places them into both a historical and a political context.

Defense Logistics William M. Solis, 2007-08 Since 2003, to provide protection from ballistic threats, U.S. Central Command, which is responsible for operations in Iraq & Afghanistan & other areas, has required service members & DoD civilians in its area of operations to be issued the Interceptor Body Armor (IBA) system. Concerns regarding the level of protection & amount of IBA needed to protect U.S. forces have occurred in recent years. This review determines to what extent the Army & Marine Corps: (1) are meeting the theater requirements for body armor; (2) have the controls in place to assure that the manufacturing & fielding of body armor meet requirements; & (3) are sharing information regarding their efforts on body armor ballistic requirements & testing. Tip of the Spear G. J. Michaels, 1998 Images of U.S. Marines assaulting Pacific beaches in World War II have stereotyped the service's roles and personnel for more than fifty years. This frank firsthand account of Marines sweeping over sands of a different sort in fast armored vehicles retires that popular legend and recasts the Corps as the modern, professional fighting force it was in Desert Storm.

Battling a savage environment, an unknown enemy brandishing threats of nuclear, gas, and biological attacks, and a host of technological and tactical snafus, Alpha Company of the 1st Light Armored Infantry Battalion pushed forward at the tip of the spear past burning oil fields, hundreds of Iraqi tanks and vehicles, and heartrending friendly casualties to help liberate Kuwait City and drive the Iraqis back to Baghdad. Here G. J. Michaels, a section leader and vehicle commander, provides a vivid, personal chronicle of events as they unfolded. Michaels further draws on his thirteen years of LAV experience to examine lessons learned from the war as well as its controversies, including the confusion over use of the LAV as both recon scout and infantry support and the lack of effective identification/friend-or-foe systems.

Marine Tank Battles In The Pacific Oscar E. Gilbert, 2007-10-09 No previous book has been devoted to Marine Corps armor in World War II. Gilbert's gripping narrative combines exhaustive detail on Marine armor and combat with moving eyewitness accounts, never before published, of what it was actually like to be a Marine tanker in action in the Pacific.

Armor, 1902

American Armor in the Pacific Mike Guardia, 2019-12-27 An illustrated history of the American tanks deployed to the Pacific theater during World War II and the conflicts they faced there. This volume in the Casemate Illustrated series explores American armor during the Pacific Campaign of the Second World War, from 1942 to 1945. In this period, there were over twenty major tank battles and operations in which tanks provided heavy support to infantry units. These operations included the Battle of Tarawa and the Bougainville Campaign. *American Armor in the Pacific* also features the strategies and tactics of the opposing forces, relying heavily on first-person accounts. This book examines the Pacific theater and how American armor was employed with great success in that theater of war. It also offers detailed information on American and Japanese armored forces, including development, equipment, capabilities, organization, and order of battle. Praise for *American Armor in the Pacific* "Packed with over 100 images . . . exactly what a reader interested in the armored battles fought between the Imperial Japanese war machine and U.S. military would want to see." —Globe at War

US Marine Corps Tanks of World War II Steven J. Zaloga, 2012-01-20 During World War II, the US Marine Corps formed six tank battalions that battled through the harsh conditions of the Pacific Theatre. Using the same basic tanks as the US Army, notably the M3 and M5A1 light tanks and the M4 Sherman medium tank, the marines made both technical and tactical innovations to make them

more effective in the fight against the Japanese. Deep wading equipment, flamethrower tanks, and even wooden armor all became part of the Marine arsenal. This book examines the tactics and technology that made the US Marine Corps tank service unique in the annals of warfare.

Marine Corps Tank Battles in the Middle East Oscar E. Gilbert, 2015-02-09 In the aftermath of Vietnam a new generation of Marines was determined to wage a smarter kind of war. The tank, the very symbol of power and violence, would play a key role in a new concept of mobile warfare, not seen since the dashes of World War II. The emphasis would be not on brutal battles of attrition, but on paralyzing the enemy by rapid maneuver and overwhelming but judicious use of firepower. Yet in two wars with Iraq, the tankers, as well as the crews of the new Light Armored Vehicles, quickly found themselves in a familiar role—battering through some of the strongest defenses in the world by frontal assault, fighting their way through towns and cities. In America's longest continual conflict, armored Marines became entangled in further guerilla war, this time amid the broiling deserts, ancient cities, and rich farmlands of Iraq, and in the high, bleak wastes of Afghanistan. It was a familiar kind of war against a fanatical foe who brutalized civilians, planted sophisticated roadside bombs, and seized control of entire cities. It has been a maddening war of clearing roads, escorting convoys, endless sweep operations to locate and destroy insurgent strongholds, protecting voting sites for free elections, and recapturing and rebuilding urban centers. It's been a war in which the tanks repeatedly provided the outnumbered infantry with precise and decisive firepower. The tankers even added a new trick to their repertoire—long-range surveillance. Our fights against Iraq in 1991 and in the post-9/11 years have seen further wars that demanded that unique combination of courage, tenacity, professionalism, and versatility that makes a Marine no better friend, and no worse enemy. This book fully describes how our Marine Corps tankers have risen to the occasion.

US Marine Infantry Combat Uniforms and Equipment 2000–12 J. Kenneth Eward, 2012-09-20 The US Marine Corps has been a key part of the US presence in a host of combat zones. While sharing some weapons systems with the other US Forces, the Marine Corps has developed its own distinctive approach to matters of dress, personal equipment and armament. The most important trends are a new generation of camouflage clothing, body armor, and night-vision equipment, which have transformed the appearance and capability of the individual rifleman. The men and women of the USMC have been at the forefront of these developments, utilizing innovative items of dress and equipment during their extensive service in a range of challenging environments across the world. Featuring specially commissioned full-color artwork and detailed photographs, this book explores the

USMC's key contribution to the development of the combat infantry soldier's clothing and personal equipment in the 21st century.

The US Marine Corps since 1945 Lee E Russell, 2012-06-20 Lee E Russell utilises his expert knowledge to guide us through the post-WWII history of the Marines, chronicling their involvement in Korea, Vietnam, Lebanon and Grenada. The account includes such remarkable exploits as the gruelling Chosin Reservoir campaign, which proved a supreme test of courage and discipline with the Marines isolated and overwhelmingly outnumbered in an inhospitable terrain where temperatures reached as low as -35F at night they nevertheless emerged unbeaten and the siege of Khe Sanh during the Vietnam conflict, providing a comprehensive overview of the history, organisation, appearance and equipment of these famous troops

On Armor Bruce I. Gudmundsson, 2004-10-30 On Armor tells three important and interconnected stories. The first is a tale of a technology, in particular, the rise and fall of the main battle tank—a type of armored vehicle that came to dominate land warfare in the middle of the 20th century but is now obsolete. The second is a history of ideas. The problem that armored vehicles created for 20th-century armies was as much about concepts of operation as it was about technology. Those who got the philosophy right did well. Those who lacked either the imagination or the intellectual capital to understand the rapidly evolving potential of the armored vehicle failed miserably. The third story is one of organization. Gudmundsson pays particular attention to how armored vehicles were combined with

other forces to form an extraordinarily rich variety of units and formations. He also comments on the current and future roles various types of armor will play on the battlefield. The main battle tank is probably the single most important fighting vehicle of the 20th century. At the same time, as Gudmundsson makes clear, it is only one of the many different types of armored vehicle that have played an important role in recent warfare. Neither the past glory nor the current obsolescence of the main battle tank can be understood without reference to vehicles such as the armored car, assault guns of various kinds, armored engineer vehicles, and armored personnel carriers. This text also explores the role that mobile operations in World War I played in fostering the development of armored warfare; the rapid decline of the French Army from its highpoint as the leading tank army in the world; the role that weapons other than the tank played in the rise of the German armored force; and the relationship between British ideas of armored warfare and the growth of the American armored force in World War I.

Marines, 1989

America's Battalion Otto J. Lehrack, 2005-02-11 Oral history by Marines who fought to liberate Kuwait from Saddam Hussein's invading forces. America's Battalion tells the experiences of one unit, the 3rd Battalion, 3rd Marines, during Operation Desert Storm—the first Gulf War. Building from interviews with the members of the battalion, Otto Lehrack examines the nature of warfare in the Persian Gulf. The terrain of the Arabian Peninsula and the disposition of the enemy dictated conventional warfare requiring battalion and regimental assaults coordinated at the division level, so interviewees are primarily the officers and senior non-commissioned officers concerned. The 3rd of the 3rd, also known as America's Battalion, had just returned from deployment in the summer of 1990 when they were required to immediately re-deploy to a strange land to face a battle-hardened enemy after Iraq invaded Kuwait. Theirs was only the second Marine battalion to arrive in Saudi Arabia. They participated in the first allied ground operation of the war, played a key role in the battle for the city of Khafji, and were the first to infiltrate the Iraqi wire and minefield barrier in order to provide flank security for the beginning of the allied offensive. Facing an enemy that had used some of the most fearsome weapons of mass destruction—chemical and biological agents—against its former opponents and against its own people, the Marines had been prepared for the worst. Lehrack has documented this unit's remarkable performance through the accounts of those who participated in the historic events in the Persian Gulf and returned home to tell of them.

US Marine Corps Recon and Special Operations Uniforms & Equipment 2000–15 J. Kenneth

Eward,2016-01-20 In the age of modern warfare the changing landscape of the 21st century battlefield has demanded a transformation within the US Marine Corps Special Operations. Adapting to a huge range of combat environments, an enormous array of specialist uniforms, protective armour and battlefield electronic devices have been developed to facilitate missions in the most extreme conditions. A special forces operator may now have available to him a dozen distinct types of body armour and two dozen different weapons; never before in American military history has so much been given to so few. Authored by J. Kenneth Eward, professor at the American Military University, and illustrated throughout with photographs and meticulous colour plates, this volume offers the first detailed, authoritative study of the characteristics, and performance in the field, of the most modern combat gear and weapons provided for USMC specialist operators to date.

Starfist: Steel Gauntlet David Sherman,Dan Cragg,2002-01-08 It's the 25th century, but the Marines are still looking for a few good men . . . "Marines ain't supposed to sit. We're supposed to kill." After the resource-rich planet Diamunde is seized by the armed forces of industrialist Marston St. Cyr, the Confederation Marines face their most desperate battles yet against the mechanized forces of the bloody usurper. Promised a walkover by military planners, instead the Marines must run a gauntlet of steel, with weaponry three hundred years out of date. For the Confederation's invasion army to seize the planet, the Marine FISTs first have to secure a planethead against St. Cyr's much larger forces which are equipped with superior weapons. Together with their outgunned comrades, the Marines of 34th FIST must do the impossible—or die . . .
