**Imperial Japanese Navy Battleships 1941-45** Mark Stille,2012-05-20 The Imperial Japanese Navy of World War II surpassed the Allied and Axis fleets in innovation and technology. This title covers the 12 Japanese battleships that saw service between 1941 and 1945, including the mighty Yamato. Each class is considered in light of its design and construction, its armament and wartime modifications. The author, Mark Stille, uses primary sources and dramatic photographs to tell the story of these mighty battleships at war, including their major engagements during the raid at Pearl Harbor and the battle of Midway. The first English language book to include photographs from the prestigious Fukui Collection, this investigation will fascinate any naval enthusiast.

**Mark #45** Arthur Wortmann,David Keuning,2013-11-05 This issue, 75 Degrees South: Hugh Broughton explores the Antarctic, features articles various international areas, such as the Conference Centre in Dalian, the City of Opposite: Sao Paulo, Aaron Betsky on his way to church and 8 new architecture magazines. Mark: Another Architecture is a bi-monthly international trade journal featuring exceptional architecture projects. Launched seven years ago by the makers of Frame, Mark takes a radical and international approach to architecture, showcasing the best new work from every corner of the world. Viewing the magazine as a visual medium, Mark attempts to avoid jargon and academicism, opting instead for direct communication. Ever curious, Mark wants to uncover architects' motivations and use them to inspire. We dare you to try and find an international architecture journal that fills more of its pages with interviews than Mark. Mark shines its spotlight on starchitects and new talent alike. Mark explores the boundaries of architecture and anticipates what's heating up around the next corner. Mark takes a radical and international approach to architecture, showcasing the best work from every corner of the world. What readers will find in each issue of Mark: Notice Board: Pinned to Mark's Notice Board are eye-grabbing images and memos sighted on architects' drawing boards worldwide. Cross Section: Cutting-edge articles whisk readers to the outer reaches of architecture and beyond. Perspective: A theme section discussing the state of architecture in a specific city, region, or country. Long Section: Here the reader finds articles on new buildings, portraits of architecture practices, and reports on fascinating phenomena, from cosmic architecture to treetop living. Tools: Concluding the magazine are reports from manufacturers and information about new building products.

**Imperial Japanese Navy Light Cruisers 1941-45** Mark Stille,2012-02-20 The Imperial Japanese Navy went to war with 17 light cruisers and another three cruiser-sized training ships. Of these, most were 5,500-ton ships designed to act as destroyer squadron flagships. This made them much different in capabilities and mission from their American counterparts. During the war, the Japanese built another five light cruisers, all but one of which maintained the design premise of being able to serve as destroyer squadron flagships. During the war, Japanese light cruisers were active throughout the Pacific performing many missions in addition to their flagship duties. Mark Stille continues Osprey's coverage of the IJN of WWII with this concise and complete study of all 25 ships, from their design and development to their ultimate fates. Detailed Osprey artwork and rare period photographs from the Fukui collection held in Kure, Japan illustrate this discussion.

**Imperial Japanese Navy Aircraft Carriers 1921-45** Mark Stille,2012-05-20 The Imperial Japanese Navy was a pioneer in naval aviation, having commissioned the world's first built-from-the-keel-up carrier, the Hosho. Throughout the 1920s and 1930s, it experimented with its carriers, perfecting their design and construction. As a result, by the time Japan entered World War II and attacked the United States at Pearl Harbor in 1941, it possessed a fantastically effective naval aviation force. This book covers the design, development and operation of IJN aircraft carriers built prior to and during World War II. Pearl Harbor, Midway and the first carrier vs carrier battle, the battle of the Coral Sea, are all discussed.

**The Intermittent Fasting Revolution** Mark P. Mattson,2023-04-04 How intermittent fasting can enhance resilience, improve mental and physical performance, and protect against aging and disease. Most of us eat three meals a day with a smattering of snacks because we think that's the normal, healthy way to eat. This book shows why that's not the case. The human body and brain evolved to function well in environments where food could be obtained only intermittently. When we look at the eating patterns of our distant ancestors, we can see that an intermittent fasting eating pattern is normal—and eating three meals a day is not. In The Intermittent Fasting Revolution, prominent neuroscientist Mark Mattson shows that intermittent fasting is not only normal but also good for us; it can enhance our ability to cope with stress by making cells more resilient. It also improves mental and physical performance and protects against aging and disease. Intermittent fasting is not the latest fad diet; it doesn't dictate food choice or quantity. It doesn't make money for the pharmaceutical, processed food, or health care industries. Intermittent fasting is an eating pattern that includes frequent periods of time with little or negligible amounts of food. It is often accompanied by weight loss, but, Mattson says, studies show that its remarkable beneficial effects cannot be accounted for by weight loss alone. Mattson—whose pioneering research uncovered the ways that the brain responds to fasting and exercise—explains how thriving while fasting became an evolutionary adaptation. He describes the specific ways that intermittent fasting slows aging; reduces the risk of diseases, including obesity, Alzheimer's, and diabetes; and improves both brain and body performance. He also offers practical advice on adopting an intermittent fasting eating pattern as well as information for parents and physicians.

**Stem Cells and Cancer** Rebecca G. Bagley,Beverly A. Teicher,2009-04-20 Significance of Stem Cells to Tumor Development Cancer stem cells remain a controversial topic and the criteria that define cancer stem cells are continuing to evolve. A recent surge in stem cell research has ignited a field of discovery into many human diseases including diabetes, neuropathologies, and cancer. By replacing specific differentiated cells that have either been lost or died, stem cell therapy proves to be a very promising approach to the treatment of many debilitating diseases. Though stem cells may provide therapeutic benefit under certain conditions, they are also often implicated in the initiation, progression, and therapeutic resistance of malignant disease. This first edition of Stem Cells and Cancer is intended to give a current perspective on the role of stem cells in cancer and strategies for novel therapies directed toward tumor stem cells. The current cancer stem cell hypothesis is presented in several chapters with distinctions made between the hierarchical and stochastic models of tumor cell development. Stemness, self-renewal, pluripotency, clonality, and tumorigenicity are important concepts applied towards defining cancer stem cells. Signaling pathways such as Wnt, Sonic Hedgehog, Notch, and Bmi-1 that are involved in differentiation, proliferation, and survival are implicated in the malignant process. Additional chapters address the identification of

cancer stem cell populations through the evaluation of molecular markers such as CD133, CD44, and CD24, for example, or by Hoechst dye exclusion to recognize 'side populations.' Mesenchymal and hematopoietic stem cells are described as well as mouse models that are employed to elucidate the properties and functionality of stem cells in cancer and the stem cell niche. This book encompasses a wide variety of human cancers that include but are not limited to leukemia, gliomas, breast, and prostate cancers. Resistance to conventional therapies, genetic versus epigenetic changes that affect therapeutic response and strategies to prevent disease recurrence are challenges have been incorporated into this volume. Stem Cells and Cancer represents a compendium of cutting edge research by experts in the field and will be instrumental in the study of this intriguing line of investigation for many years to come. Rebecca Bagley is a senior scientist at Genzyme Corporation and has worked in the biotechnology industry for 20 years with degrees in biology from Wellesley College and Harvard University. Her expertise in drug development spans a wide range of approaches including immunotherapies, gene and protein therapies, and small molecule delivery with publications in journals such as Molecular Cancer Therapeutics, Cancer Research, and Microvascular Research . Her current research focuses on stem cells, tumor vasculature, and target validation. Dr. Beverly A. Teicher is Vice President of Oncology Research at Genzyme Corporation. Dr. Teicher completed a PhD in Bioorganic Chemistry at the Johns Hopkins University and postdoctoral training at Yale University School of Medicine. Dr. Teicher joined Dana-Farber Cancer Institute as an Assistant Professor of Pathology and rose to Associate Professor of Medicine and Radiation Therapy, Harvard Medical School at Dana-Farber Cancer Institute and Joint Center for Radiation Therapy. Dr. Teicher is an active member of the international scientific community having authored or co-authored more than 400 scientific publications. She has edited eight books, is senior editor for the journal Clinical Cancer Research and is series editor for the Cancer Drug Discovery and Development book series.

**Jesus and YHWH-Texts in the Synoptic Gospels** Scott Brazil,2024-02-21 Scott Brazil examines the frequent practice of applying Old Testament YHWH-texts to Jesus in the Synoptic Gospels. He argues that this YHWH-text phenomenon evidences a high Christology in the primitive church that traces back to Jesus himself. He thus finds in this Synoptic practice a stinging contradiction against the modern critical theory that a high Christology took many decades to develop in the early church and exists only in John among the canonical Gospels. Brazil surveys the Synoptic Gospels in canonical order, exegeting dozens of passages in which OT texts originally referring to YHWH are either clearly or most probably applied to Jesus. He observes the frequency, diversity, and ubiquity of the practice, as well as its wide range of OT source material and its parallel to the NT practice of applying OT messianic texts to Jesus. And from the data he offers several ramifications, including the early deliberate employment of YHWH-texts to Jesus, the likelihood that Jesus is the source of the practice, the high Christology of the Synoptics, and the redemptive-historical metanarrative that Jesus is the divine interpreter and central figure of the Jewish Scriptures. Ultimately, Brazil argues that understanding the prolific application of OT YHWH-texts to Jesus in the Synoptic Gospels cannot be neglected without truncating genuine NT Christology.

**Imperial Japanese Navy Submarines 1941–45** Mark Stille,2012-06-20 During World War II the Imperial Japanese Navy was at the forefront of submarine technology. It fielded the largest pre-nuclear submarines in the world, some capable of carrying floatplane bombers, which operated alongside fast combat vessels and midget submarines, all equipped with the best torpedoes available. The Japanese submarine fleet should have been an awe-inspiring force but, despite playing a crucial scouting role and enjoying several notable successes, it was surprisingly ineffective. Using unique color plates, Mark Stille describes the astounding technical advances of this range of vessels, and the wartime tactics responsible for their failure.

*Imperial Japanese Navy Heavy Cruisers 1941–45* Mark Stille,2012-05-20 Designed with little more than a passing nod to the international naval treaties of the inter-war period, the Imperial Japanese Navy's heavy cruisers were fast and heavily armed. Like the other vessels of the Japanese Navy, the heavy cruisers were technologically superior to and far more innovative than their Allied rivals, whom they met in many of the major Pacific Theatre battles, including Midway and Leyte Gulf. Mark Stille continues his study of the IJN of WWII with this fascinating topic, addressing the design and development of all 18 ships in the six heavy cruiser classes, from pre-war construction and mid-war alterations, to their operational histories and eventual fates.

**US Navy Light Cruisers 1941–45** Mark Stille,2016-07-28 During World War II, the United States built 72 light cruisers of various classes. In response to the severe air threat that surface ships faced, new cruisers were designed with increasingly heavy antiaircraft weaponry as well as the traditional 6in guns. With the speed and

range to keep up with aircraft carriers, and their considerable antiaircraft capability, they were a mainstay of the carrier escorts. This book examines every US light cruiser produced, including those of the Fargo and Worcester classes, which were actually complete after World War II had ended, tracing their design, development and evolution throughout the war and beyond.
