

Mark I

A. P. Litman

British Mark I Tank 1916 David Fletcher,2012-05-20 In 1915 a machine christened Little Willie changed the way that wars were fought. Little Willie was a fully tracked armoured vehicle that could break a trench system. Its development was completed in December 1915, but by then it had already been superseded by an improved design, Mother. This was the first rhomboid tank, and the prototype for the Mark 1 which would influence a whole generation of tank building. This book details the development of the Mark I, and its surprise arrival in France in the middle of 1916 during the closing weeks of the battles of the Somme.

Spitfire Mark I/II Aces 1939-41 Alfred Price,2012-11-20 Spitfire Mk Is and IIs served only briefly in the frontline with the RAF, but their pilots were responsible for achieving impressive scores against the Luftwaffe during 1940/41. This volume details the RAF's first aces of World War 2 who helped stem the German tide during Britain's struggle for survival in the bitter years between 1939 and 1941. Early-mark Spitfires were notorious for their light armament, overheating engines and short range, but during the dogfights over Dunkirk and south-east England, then the first tentative sweeps across France, many pilots achieved scores of note.

Development of Scram-latch Components for Mark I Naval Reactor ,1955 This report describes the development of improvements on an electrohydraulic mechanical scram-latch system for the Mark I Naval Reactor. The latch proper was revised to include a rolling disengagement which permitted the use of bearing surfaces of ample size and radii to carry both static and shock loads. The low energy required to release this latch permitted a reduction in size and complication of the hydraulically operated latch actuator. This advantage was also present in the design of an electrically operated scram valve. The scram valve is of the rotary-plug type to achieve hydraulic balance and low inertia.
