**The Military Dimension: Mark II** David Drake,1995-02-01 WELCOME TO THE WAR ZONE When they say that war changes a man, they're being euphemistic. War makes a man insane by civilian standards. When the man comes back, he may return to civilian norms again. After a while. I'm not proud of many of the things that happened in Nam. I'm not proud of some of the things I did myself. But the men I served with were, for the most part, doing the best job they could with the cards they'd been dealt. I'm proud of them, and I'm proud to have been among them. Anybody's got a right to criticize the things that happened. But don't criticize the men who did them unless you've been in their shoes. Ever since I came back, the object of my military fiction has been to put somebody as normal as you, or as I was, into a war zone. And I hope to God neither you nor your son ever has an opportunity to compare my fiction with the real thing. A shorter edition of this book was published under the title *The Military Dimension*. At the publisher's request, this title is sold without DRM (Digital Rights Management).

**MULTIMOD Mark II** International Monetary Fund,1990-07-08 This paper explains different features of the MULTI-region econometric MODel (MULTIMOD). MULTIMOD is designed to examine the effects on that baseline of scenarios that involve changes in policies in major countries and other exogenous changes in the economic environment. The Mark II version described in this paper disaggregates the larger industrial bloc into its component countries, and, as a result, comprises eight industrial countries/regions and two developing country regions. In addition, some of the equations have been re-specified and re-estimated. The capital exporting countries, primarily high-income oil exporters, are treated separately in simplified form: they are the residual suppliers of oil, whose price is exogenous in real terms, and their exports of other goods are exogenous. The model, because it includes expectations that are consistent with its solution values in later periods, is well suited to evaluate the effects of policies that are announced and credible.
