Contemporary Topics in Molecular Immunology H. Eisen,2013-03-09 Immunochemistry, recently rechristened molecular immunology, has been pre occupied throughout its long history with the structure and function of antibodies and the specificity of antibody-antigen reactions. With the recent X-ray diffract of several crystallized immunoglobulin (Ig) fragments and a whole tition analyses Ig molecule, the three-dimensional structure of antibodies and their ligand combining sites has been realized, marking the concluding stages of a phase of immunological research that can be traced back at least 75 years. At the same time chemically minded immunologists have been moving in new directions. A substantial beginning in one direction has been made with the purification of messenger RNAs (mRNAs) for Ig chains. Hybridization of these RNAs (or their DNA copies made with the enzyme reverse transcriptase) to cell DNA is beginning to provide convincing estimates of the number of germ-line Ig genes. And some hybridization studies have already yielded suggestive evidence for translocation of V and C genes from separate to contiguous positions in DNA isolated from cells at different stages of differentiation. Moreover, in vitro trans lation of Ig mRNAs has revealed a remarkably hydrophobic stretch of about 20 amino acids at the N-terminus of the nascent Ig chain. This extra piece is absent in the Ig extracted from or secreted by plasma cells, presumably because it is rapidly cleaved from the preimmunoglobulin chain within the cell, but the extra piece probably plays a key role in directing the synthesis of prelg to the cell's secretory pathway.

Genetic Analyses of Wheat and Molecular Marker-Assisted Breeding, Volume 1 Jichun Tian,Zhiying DENG,Kunpu Zhang,Haixia Yu,Xiaoling Jiang,Chun Li,2015-10-22 The book mainly describes the QTL mappings and efficacy analyses that are associated with wheat productivity, quality, physiology and various stress resistances and provides summaries of results from studies conducted both at home and abroad. It presents comparable data and analyses, helping readers to arrive at a more comprehensive understanding of the latest development in this field. The book provides a wealth of novel information, broad range of applications and in-depth findings on crop genetics and molecular breeding, making it valuable not only for plant breeders but also for academic faculties, senior researchers and advanced graduate students who are involved in plant breeding and genetics. New Perspectives in Biblical and Rabbinic Hebrew Aaron D. Hornkohl,Geoffrey Khan,2021-04-06 Most of the papers in this volume originated as presentations at the conference Biblical Hebrew and Rabbinic Hebrew: New Perspectives in Philology and Linguistics, which was held at the University of Cambridge, 8-10th July, 2019. The aim of the conference was to build bridges between various strands of research in the field of Hebrew language studies that rarely meet, namely philologists working on Biblical Hebrew, philologists working on Rabbinic Hebrew and theoretical linguists. This volume is the published outcome of this initiative. It contains peer-reviewed papers in the fields of Biblical and Rabbinic Hebrew that advance the field by the philological investigation of primary sources and the application of cutting-edge linguistic theory. These include contributions by established scholars and by students and early career researchers.

Molecular Marker Technology for Crop Improvement José Miguel Soriano,2021-01-15 Since the 1980s, agriculture and plant breeding have changed with the development of molecular marker technology. In recent decades, different types of molecular markers have been used for different purposes: mapping, marker-assisted selection, characterization of genetic resources, etc. These have produced effective genotyping, but the results have been costly and time-consuming due to the small number of markers that could be tested simultaneously. Recent advances in molecular marker technologies such as the development of high-throughput genotyping platforms, genotyping by sequencing, and the release of the genome sequences of major crop plants have opened new possibilities for advancing crop improvement. This Special Issue collects 16 research studies, including the application of molecular markers in 11 crop species, from the generation of linkage maps and diversity studies to the application of marker-assisted selection and genomic prediction.

Traditions of the Rabbis from the Era of the New Testament, Vol. 2A David Instone-Brewer,2004 Traditions of the Rabbis from the Era of the New Testament (TRENT) is a major new six-volume work of scholarship that provides an exhaustive collection of early rabbinic traditions and commentary on their relevance to the New Testament. Focusing on 63 rabbinic traditions central to ancient Jewish life, David Instone-Brewer's massive study provides significant insights into Jewish thought and practice prior to the destruction of the Second Temple in 70 C.E. For each rabbinic tradition considered, the supporting Hebrew source text is provided side by side with an English translation. Instone-Brewer also presents evidence that exists for accurately dating these rabbinic sources -- a critical task recently advanced by modern dating techniques. He goes on to thoroughly discuss the meaning and importance of each rabbinic tradition for Second Temple Judaism, also analyzing any echoes or direct appearances of the tradition in the New Testament writings.

The Cambridge Handbook of Korean Linguistics Sungdai Cho,John Whitman,2022-08-25 The 'Korean wave' in music and film and Korea's rise to become the twelfth economic power in the world have boosted the world-wide popularity of Korean language study. New Empirical Perspectives on Translation and Interpreting Lore Vandevoorde,Joke Daems,Bart Defrancq,2019-12-06 Drawing on work from both eminent and emerging scholars in translation and interpreting studies, this collection offers a critical reflection on current methodological practices in these fields toward strengthening the theoretical and empirical ties between them. Methodological and technological advances have pushed these respective areas of study forward in the last few decades, but advanced tools, such as eye tracking and keystroke logging, and insights

from their use have often remained in isolation and not shared across disciplines. This volume explores empirical and theoretical challenges across these areas and the subsequent methodologies implemented to address them and how they might be mutually applied across translation and interpreting studies but also brought together toward a coherent empirical theory of translation and interpreting studies. Organized around three key themes—target-text orientedness, source-text orientedness, and translator/interpreter-orientedness—the book takes stock of both studies of translation and interpreting corpora and processes in an effort to answer such key questions, including: how do written translation and interpreting relate to each other? How do technological advances in these fields shape process and product? What would an empirical theory of translation and interpreting studies look like? Taken together, the collection showcases the possibilities of further dialogue around methodological practices in translation and interpreting studies and will be of interest to students and scholars in these fields.

Lady First Amy S. Greenberg,2019 While the Woman's Rights convention was taking place at Seneca Falls in 1848, First Lady Sarah Childress Polk was wielding influence unprecedented for a woman in Washington, D.C. Yet while history remembers the women of the convention, it has all but forgotten Sarah Polk. Now, Amy S. Greenberg's riveting biography brings Sarah's story into vivid focus. We meet Sarah as the daughter of a frontiersman who raised her to discuss politics and business with men. We see the savvy and charm she brandished to help her brilliant but unlikeable husband, James K. Polk, ascend to the White House. We watch as she exercises truly extraordinary power as First Lady: quietly manipulating elected officials, shaping foreign policy, and directing a campaign in support of America's expansionist war against Mexico. And we meet many of the enslaved men and women whose difficult labor made Sarah's political success possible. Lady First also shines a light on Sarah's many contradictions. While her marriage to James was one of equals, she firmly opposed the feminist movement's demands for what she perceived to be far-reaching equality. She banned dancing and hard liquor from the White House, but did more entertaining than any of her predecessors. During the Civil War, she worked on behalf of the Confederacy even though she claimed to be neutral. And in the late nineteenth century, she became a celebrity among female Christian temperance reformers, while she struggled to redeem her husband's tarnished political legacy. Sarah Polk's life spanned nearly the entirety of the nineteenth century, and her legacy, which profoundly transformed the South, continues to endure. Comprehensive, nuanced, and brimming with invaluable insight, Lady First is a revelation of our eleventh First Lady's complex but essential part in American feminism.--Dust jacket.
