Martin Mars XPB2M-1 and JRM Flying Boats Steve Ginter,1995-01-01 The photos in this edition are black and white. WWII's 4-engine Martin Mars flying boat would be the World's largest aircraft weighing in at over 150,00 pounds until the Spruce Goose came along. Used as a transport, five production aircraft were built and used throughout the Pacific as the Navys heavy hauler into the mid-1950s when they were purchased and converted into fire bombers in Canada and used to this day. The five aircraft were named Philippine Mars, Marianas Mars, Marshall Mars, Hawaii Mars and Caroline Mars.

Terraforming Mars Martin Beech,Joseph Seckbach,Richard Gordon,2021-11-18 TERRAFORMING MARS This book provides a thorough scientific review of how Mars might eventually be colonized, industrialized, and transformed into a world better suited to human habitation. The idea of terraforming Mars has, in recent times, become a topic of intense scientific interest and great public debate. Stimulated in part by the contemporary imperative to begin geoengineering Earth, as a means to combat global climate change, the terraforming of Mars will work to make its presently hostile environment more suitable to life—especially human life. Geoengineering and terraforming, at their core, have the same goal—that is to enhance (or revive) the ability of a specific environment to support human life, society, and industry. The chapters in this text, written by experts in their respective fields, are accordingly in resonance with the important, and ongoing discussions concerning the human stewardship of global climate systems. In this sense, the text is both timely and relevant and will cover issues relating to topics that will only grow in their relevance in future decades. The notion of terraforming Mars is not a new one, as such, and it has long played as the background narrative in many science fiction novels. This book, however, deals exclusively with what is physically possible, and what might conceivably be put into actual practice within the next several human generations. Audience Researchers in planetary science, astronomy, astrobiology, space engineering, architecture, ethics, as well as members of the space industry.

Expedition Mars Martin J.L. Turner,2004-01-09 From the reviews: ...I enjoyed the historical descriptions of the contributions of the early rocket pioneers Konstantin Tsiolkovsky, Robert Goddard, and Wernher von Braun, as well as the American and Russian manned programs...The book is aimed at the science-literate public, although the material varies in level of detail. (George D. Nelson, PHYSICS TODAY, June 2005)

Seven Against Mars Martin Berman-Gorvine,2013-03-04 Trapped in the Warsaw ghetto in 1942, teenager Rachel Zilber escapes the horror by writing about the adventures of Zap-Gun Jack and Princess Anya of Mars. When her parents are captured by the Nazis, Rachel's transported into her make-believe world, but the danger is far from over. Together with Katie, a girl from the future, Rachel joins Jack and a rag-tag band of misfits to fight the evil Lord Ares III of Mars and restore Princess Anya to her rightful place on the Martian throne. A celebration of the power of the imagination and the triumph of the human spirit. – Amy Sturgis, Ph.D., award-winning genre scholar, StarShipSofa and Mythgard Institute at Signum University

Destination Mars Jay Barbree,Martin Caidin,Susan Wright,1997 Examines how the red planet has been perceived throughout human history--in mythology, religion, astrology, folklore, early scientific history, science fiction, and the modern era of scientific discovery and space travel. Special attention is given to NASA's exploration of Mars, from the first man-made satellite to orbit Mars and the first man-made observation vehicle to land on Mars, to information about the two current missions: Pathfinder and the Mars Global Surveyor. All About Mars Journeys and Settlement Martin K. Ettington, This is a 2022 revised version of the book first published in 2020. A lot of new information has become available since then. A manned mission to Mars has been the dream of humanity at least since the nineteenth century when we first saw details of the surface and thought there might be canals filled with water there. Here I've looked at the history of unmanned exploration of Mars over the last fifty plus years, proposed missions to Mars, Mars Settlements, and other major issues regarding traveling to and living on Mars. Some proposals have lots of details of proposed scenarios if you want to read all of the engineering and scientific analysis work. I grew up in the 1960s when every kid in America was fascinated with the Space program and the Astronauts. I also watched not only the Apollo 11 moon landing, but all of the successive trips to the Moon and exploration of the surface. This may be a lot of the reason I became an Engineer, worked as NASA in Houston for several years, and applied to the Astronaut Program myself. There are some probes which reported life on Mars and then other scientists questioned the results. We are still sending unmanned probes today to try to answer those questions.

BuNos! Martin XPB2M-1R and JRM Mars Douglas E. Campbell,2021-09-23 Glenn L. Martin's Mars aircraft, the largest operational seaplane manufactured in the United States, had its beginnings based on an earlier seaplane Mr. Martin built-the Pan American Airlines' China Clipper. What began In 1938 as a four-engined aerial battleship carrying ten tons of bombs-complete with a wingspan of 200 feet and a two-story hull 120 feet long-the XPB2M-1 prototype Mars soon transitioned to a trans-Pacific transport and air passenger airplane mostly flying between Naval Air Station Alameda, CA, and Honolulu, HI. After the prototype, the U.S. Navy ordered 20 more under the JRM designation, although only six were eventually built. Named Philippines, Hawaii, Marianas, Caroline, a second Hawaii and Marshall Mars, only two exist today as static display fire-fighting behemoths at Sproat Lake near Port Alberni, British Columbia, Canada. This book is the story of these seven aircraft.

Old Mars George R. R. Martin,Gardner Dozois,2013-10-08 Fifteen all-new stories by science fiction's top talents, collected by bestselling author George R. R. Martin and multiple-award winning editor Gardner Dozois Burroughs's A Princess of Mars. Bradbury's The Martian Chronicles. Heinlein's Red Planet. These and so many more inspired generations of readers with a sense that science fiction's greatest wonders did not necessarily lie far in the future or light-years across the galaxy but were to be found right now on a nearby world tantalizingly similar to our own—a red planet that burned like an ember in our night sky . . . and in our imaginations. This new anthology of fifteen all-original science fiction stories, edited by George R. R. Martin and Gardner Dozois, celebrates the Golden Age of Science Fiction, an era filled with tales of interplanetary colonization and derring-do. Before the advent of powerful telescopes and space probes, our solar system could be imagined as teeming with strange life-forms and ancient civilizations—by no means always friendly to the dominant species of Earth. And of all the planets orbiting that G-class star we call the Sun, none was so steeped in an aura of romantic decadence, thrilling mystery, and gung-ho adventure as Mars. Join such seminal contributors as Michael Moorcock, Mike Resnick, Joe R. Lansdale, S. M. Stirling, Mary Rosenblum, Ian McDonald, Liz Williams, James S. A. Corey, and others in this brilliant retro anthology that turns its back on the cold, all-but-airless Mars of the Mariner probes and instead embraces an older, more welcoming, more exotic Mars: a planet of ancient canals cutting through red deserts studded with the ruined cities of dying races. FEATURING ALL-NEW STORIES BY James S. A. Corey • Phyllis Eisenstein • Matthew Hughes • Joe R. Lansdale • David D. Levine • Ian McDonald • Michael Moorcock • Mike Resnick • Chris Roberson • Mary Rosenblum • Melinda Snodgrass • Allen M. Steele • S. M. Stirling • Howard Waldrop • Liz Williams

And an Introduction by George R. R. Martin! Praise for Old Mars “Strong, fun and evocative.”—Tordotcom “A fantastic anthology . . . Pulp magic lives in these pages.”—Bookhound

The Chinchaga Firestorm Cordy Tymstra,2015-08-16 Compiled by a radical journalist and poet in the early days of the French Revolution, these subversively satirical lives of women saints sought to win both women and men away from religion. Though based on authentic hagiography, Maréchal's new legendary introduces a skeptical, rationalist perspective that anticipates modern critical approaches. Along with Delany's thorough introduction and notes, Anti-Saints offers a new perspective on the cultural climate of the French Revolution and a strikingly modern contribution to our own public conversation on religion. A must for scholars and non-specialists alike, and lovers of audacious wit.

High Hulls Charles R. G. Bain ,2018-11-27 For a time, the flying boat was seen as the way of the future. These aircraft, so strange and foreign to the modern mind, once criss-crossed the world and fulfilled essential military roles. In his latest book for Fonthill, Charles Bain looks at the golden age of the flying boat, when these sometimes strange and often beautiful vessels spanned the globe. These vessels-a combination of ship and airplane-found themselves working as patrol aircraft, passenger aircraft, transports, and even as combat aircraft. This volume contains their stories, from memorable aircraft such as the Short Sunderland and Boeing 314 Clipper, to the craft that roamed the Pacific Theatre of the Second World War, to forgotten giants from Saunders-Roe and even strange jet fighters that once landed like ducks. It even includes the flying boat that has not let time get in the way of doing its job-the Martin Mars. Each of these aircraft has a story worthy of the telling, and often a memorable role to play in the history of aviation. 'High Hulls' delves deeply into a long-vanished part of aviation's golden age.
