Lockheed Martin

The Fighting Flying Boat Richard Alden Hoffman, 2004 This book recognizes the Martin PBM Mariner not only for its contributions to World War II but also the postwar years, when it was involved in the Korean War and with the exploration of the Arctic and Antarctic. Hoffman offers details of PBM fights with Chinese MiGs and patrol and reconnaissance missions. The author also highlights the seaplane's hazardous rescue missions with the Coast Guard and its service with foreign armed forces. Photos of Mariners in action accompany the narrative, and a list of all PBM casualties is appended.--BOOK JACKET.

The Dakota Hunter Hans Wiesman, 2015-03-19 A tale of a lifelong passion for a WWII aircraft that changed the author's life: "It is almost like an adventure novel except it is true" (Air Classics). This book tells the story of a Dutch boy who grew up during the 1950s in postwar Borneo, where he had frequent encounters with an airplane, the Douglas DC-3, a.k.a. the C-47 Skytrain or Dakota, of World War II fame. For a young boy living in a remote jungle community, the aircraft reached the proportions of a romantic icon as the essential lifeline to a bigger world for him, the beginning of a special bond. In 1957, his family left the island and all its residual wreckage of World War II, and he attended college in The Hague. After graduation, he started a career as a corporate executive—and met the aircraft again during business trips to the Americas. His childhood passion for the Dakota

flared up anew, and the fascination pulled like a magnet. As if predestined, or maybe just looking for an excuse to come closer, he began a business to salvage and convert Dakota parts, which meant first of all finding them. As the demand for these war relic parts and cockpits soared, he began to travel the world to track down surplus, crashed, or derelict Dakotas. He ventured deeper and deeper into remote mountains, jungles, savannas, and the seas where the planes are found, usually as ghostly wrecks but sometimes still in full commercial operation. In hunting the mythical Dakota, he often encountered intimidating or dicey situations in countries plagued by wars or revolts, others by arms and narcotics trafficking, warlords, and conmen. The stories of these expeditions take the reader to some of the remotest spots in the world, but once there, one is often greeted by the comfort of what was once the West's apex in transportation—however now haunted by the courageous airmen of the past.

Flying Seaplanes for the Navy During World War II, 1941-1945 Charles Franklin Lewis, 1997*

Charles Franklin Lewis received preliminary training as a naval aviator at the Naval Air Training Center, Corpus Christi, Texas, and further training at Transitional Training Squadron Atlantic in Norfolk, Virginia. As a pilot of a PBM Martin Mariner navy flying boat, Lewis served with the VP-207 patrol squadron, mainly in the Panama Canal Zone and Bermuda, particularly providing aerial escort for convoys. Lewis retired from the Navy at the end of the war and returned to live in Bryan, Texas, resuming his work with the Texas Agricultural Experiment Station and the United States Department of Agriculture.

Battlefields have been the object of fascination for millions of tourists and the subjects of elaborate

interpretation projects. This volume will outline the process and results of developing the WWII Maritime Heritage Trail: Battle of Saipan Project. This book will provide examples of how a group of archaeologists, managers and a community took a specific battle and transformed it from a collection of unknown archaeological sites into a comprehensive storied battlescape that reflects the individuals and actions of those who were involved. It will provide an in-depth view of current maritime archaeological research on submerged battlefield sites, the development of a WWII battlefield maritime heritage trail, as well as the problems and solutions of such an effort. It will cover subjects such as: -heritage and dark tourism-conflict or battlefield archaeology-public interpretation, and community engagement. This volume will serve as a practical review of a project influenced by a range of complementary areas of study and inclusive of many stakeholders, from the public to the professional and beyond. It provides an example of a balanced approach towards research and interpreting archaeological sites through the identification and inclusion of the various stakeholders (professional and community) and an awareness of what was being included, ignored, or inadequately represented in the research and interpretation.

Admiral Hyman Rickover Marc Wortman,2022 Hyman George Rickover (1900-1986), born Chaim Godalia Rykover in the Polish shtetl of Maków-Mazowiecki in czarist Russia at the dawn of the 20th century, was an almost mythical figure in the United States Navy. A man of ferocious will, engineering brilliance, combative personality, and indefatigable work ethic, he personally oversaw the development of nuclear marine propulsion. During his thirty-five years as chief of Nuclear Reactors, Rickover abolished rank and uniform, insisting that there is no hierarchy in matters of the mind. His disdain for naval regulations, indifference to the chain of command, and harsh, insulting language earned him enemies in the Navy, but his record of safety was unparalleled. From the launch of the U.S.S. Nautilus in 1954 to today, the U.S. nuclear Navy has never experienced an incident resulting in uncontrolled radiation release. Rickover oversaw numerous shipyards, nuclear laboratories, and a nuclear power school where he personally selected 5,000 officers for nuclear power training. Beyond Nuclear Reactors, Rickover drove a wholesale transformation of the faculty and curriculum at the U.S. Naval Academy, with academic ability and achievement in technical and scientific disciplines displacing traditional prerequisites for military leadership. Rickover's transformation of the United States Navy almost never took place. From his entrance into the U.S. Naval Academy in 1918, the service constantly tried to shake itself free of him - he persevered against anti-Semitism, promotion denials, and even a requirement to retire. Wortman explores the constant conflict Rickover faced and created, tracing how he ultimately ascended to the rank of four-star Admiral and revolutionized the Navy--

Consolidated PB2Y Coronado Richard Hoffman,2009 The PB2Y Coronado was a large flying boat patrol bomber designed by Consolidated Aircraft. After deliveries of the PBY Catalina, also a

Consolidated aircraft, began in 1935, the United States Navy began planning for the next generation of patrol bombers. Orders for two prototypes, the XPB2Y-1 and the Sikorsky XPBS-1, were placed in 1936; the prototype Coronado first flew in December 1937. After trials with the XPB2Y-1 prototype revealed some stability issues, the design was finalized as the PB2Y-2, with a large cantilever wing, twin tail, and four Pratt & Whitney R-1830 radial engines. The two inner engines were fitted with four-bladed reversible pitch propellers; the outer engines had standard three-bladed feathering props. Like the PBV Catalina before it, the PB2Y's wingtip floats retracted to reduce drag and increase range.

Consolidated P2Y Ranger Steve Ginter,2013 The book begins with a 24-page in depth review of the origins of the patrol flying boat covering most Curtiss boats (except the NC boats), the Naval Aircraft Factory PN boats and their derivatives (Douglas PD-1, Keystone PK-1, Martin PM-1/2), the Boeing PB-1, and the Hall PH-1/2/3 and XP2H-1. Thirteen 3-view drawings by Lloyd Jones help illustrate this section. The book then goes on to cover the Consolidated XPY-1 Admiral, Consolidated Model 16 Commodore, Martin P3M-1/2 and XP2M-1 before detailing the Consolidated's P2Y Ranger

development and squadron usage. The P2Y was the aircraft that put Consolidated on the map of great aircraft manufacturers and led to the PBY and PB2Y flying boats that served with such distinction during WWII.

German Seaman 1939-45 Gordon Williamson, 2012-06-20 When re-armament came after World War I, the German Navy was forced to build anew, so the Reichsmarine and its successor, the Kriegsmarine, found itself in possession of some of the most modern, powerful and technically advanced vessels in the world. Germany was very selective in picking her sailors and the quality of manpower skill levels was thus very high. This book charts the recruitment, training, service conditions and combat experiences of a typical World War II German sailor, focusing on the main branches of the Navy, as well as the last ditch combat units thrown into action as infantry in the final days of the war.
