Advances in Chemical Bioanalysis Frank-Michael Matysik,2014-06-03 Expert authors provide critical, in-depth reviews of available methods for retrieving selective information out of complex biological systems. Sensors, probes and devices are present and future tools of medicinal diagnostics, environmental monitoring, food analysis and molecular biology. These are based on fluorescence, electrochemistry and mass spectrometry. Coverage of this volume includes sensor development for the detection of small analytes, monitoring of biomolecular interactions, analysis of cellular function, development of diagnostic tools.

Japan's Golden Age Dallas Museum of Art,1996-01-01 A time of dramatic social and political change, and of brilliant artistic innovation and achievement, the Momoyama period (1568 - 1615) was one of the most dynamic eras in Japan's history. This book displays spectacular Momoyama masterpieces in many media - paintings, sculpture, calligraphy, tea ceremony utensils, lacquerware, ceramics, metalwork, arms and armor, textiles, and Noh masks - and places each work of art into its historical and cultural context.

The Science of Judo Mike Callan,2018-06-14 The Science of Judo is the first book to set out and discuss the science, coaching and history behind judo performance. Evidence-based and informed by the latest research, the book offers practical guidance on preparing athletes for high performance and understanding the core tenets of sport science underpinning it. Featuring contributions from world-leading experts, the book consists of chapters on all aspects of judo performance, including: The historical development of judo and its physical, intellectual and moral role Physical preparation for competition, coaching and training strategies Skill acquisition, talent identification and development Nutrition and lifestyle of judoka Performance analysis and biomechanics Injury epidemiology and prevention Special considerations for female and young judoka Clearly written and accessible, The Science of Judo provides upper-level students and researchers, and coaches and sport science staff working with judoka, with the most thorough and authoritative reference on sport science applied to judo currently available.

Temperate Fruit Crop Breeding Jim F. Hancock,2008-02-21 This book fully integrates the conventional and biotechnological approaches to fruit crop breeding. Individual chapters are written on a wide variety of species covering all the major fruit crops in one volume. For each crop, there is a discussion of their taxonomy and evolution, history of improvement, crossing techniques, evaluation methods, and heritability of major traits and germplasm resources. Also discussed are the most recent advances in genetic mapping and QTL (quantitative trait loci) analysis, marker assisted breeding, gene cloning, gene expression analysis, regeneration and transformation. Patenting and licensing issues are also covered.

The LEC Rat Michio Mori,Michihiro C. Yoshida,Noritoshi Takeichi,Naoyuki Taniguchi,2012-12-06 The LEC strain of rats, which spontaneously develop acute hepatitis as sociated with jaundice, chronic

hepatitis, and ultimately hepatocellular carcinomas, was established by scientists in Sapporo, Japan. Careful observation and breeding led to the initial discovery of this characteristic, inherited liver disease in rats. Subsequent collaboration between scientists in Sapporo and other centers has revealed an autosomal recessive nature of inheritance, along with a variety of histopathological and biochemical findings. The causative mechanism(s) underlying this abnormality remained a mystery for some time, providing a challenge for many scientists who were attracted to the quest for clues to this enigma. In particular, the mechanism of spontaneous development of hepatocellular carcinomas in rats overcoming the acute phase of hepatitis and surviving with chronic hepatitis proved extremely interesting, because the involvement of a causative virus had been excluded in the early stages of investigation. Professor Michio Mori of Sapporo Medical College played a key role in the study of LEC rats, especially in the elucidation of the pathogenesis of hepatitis and hepatocellular carcinoma. He is one of the editors of this monograph which is composed of original contributions by the many scientists who have carried out their own studies on LEC rats. Of the various histopathological and biochemical alterations which have been reported, some are clearly secondary or tertiary events sequential to the primary change caused by gene mutation.

Bioinspired Chemistry: From Enzymes To Synthetic Models Balaban Teodor Silviu, Reglier

Marius, 2019-03-08 The observation of Nature is an inexhaustible source of inspiration to promote innovations in chemistry. The bioinspired approach is a revolution in our paradigms because it is not based on what we can take to nature, but on what we can learn from it. Enzymatic systems involved in solar energy conversion (photosystem), hydrogen production (hydrogenases), dioxygen activation (oxydases et oxygenases), CO₂ reduction (CO dehydrogenase) use abundant and cheap starting material such as O₂, H₂O and CO₂. Inspiration of these biological systems is a solution to make our chemical processes greener. These are some of the many challenges that bioinspired chemistry is able to take up. A number of the recent developments in bioinspired chemistry are discussed, including some descriptions on the biological systems that are the source of inspiration. This book is a guide to where bioinspired chemistry will be in the near future and provides a thoughtful perspective on how bioinspiration could change our world.
