Mobocracy Matthew Robinson,2002 Never before have public opinion polls played such a central role in the way policy is conceived, molded, and enacted. And at no time has there been a more dangerous and misleading abuse of public opinion. In *Mobocracy*, author Matthew Robinson uncovers how the false science of polling, in the hands of an ideologically driven press, shapes public policy, subverts elections, and decides what we see on the evening news.

Realities of Criminology and Criminal Justice Matthew Robinson,2023-12-20 The book is a follow-up to *Lessons in Criminology and Criminal Justice*, where 25 facts about crime and criminal justice were discussed. The book tells the story of 25 more facts that the author has learned in his quarter-century of working in the fields of criminology and criminal justice. The book lays out each fact, one at a time, and then presents research in support of that fact. The facts pertain to issues of crime, justice, policing, courts, corrections, race, crime prevention, biases in criminal justice, drug use and abuse, and social control more generally. Though the book is scholarly in nature, it is written for the layperson and novice student. Using humor where appropriate, but also utilizing a "tell it like it is" approach, the book will be always interesting, timely, and engaging, and occasionally funny.

Why Crime? Matthew B. Robinson, Kevin M. Beaver,2019 This book reviews the very latest empirical evidence with regard to the risk factors that produce antisocial and criminal behavior. The authors meaningfully integrate risk factors identified by more than a dozen academic disciplines that increase the odds of antisocial behavior and criminality. The result is a new interdisciplinary theory that helps break down traditional barriers and overcomes the disciplinary myopia that plagues criminological theory. Unlike the typical criminological theory text, this book actually advances the state of criminological theory as well as the field of criminology--

Symmetry and the Standard Model Matthew Robinson,2011-08-17 While theoretical particle physics is an extraordinarily fascinating field, the incredibly fast pace at which it moves along, combined with the huge amount of background information necessary to perform cutting edge research, poses a formidable challenge for graduate students. This

book represents the first in a series designed to assist students in the process of transitioning from coursework to research in particle physics. Rather than reading literally dozens of physics and mathematics texts, trying to assimilate the countless ideas, translate notations and perspectives, and see how it all fits together to get a holistic understanding, this series provides a detailed overview of the major mathematical and physical ideas in theoretical particle physics. Ultimately the ideas will be presented in a unified, consistent, holistic picture, where each topic is built firmly on what has come before, and all topics are related in a clear and intuitive way. This introductory text on quantum field theory and particle physics provides both a self-contained and complete introduction to not only the necessary physical ideas, but also a complete introduction to the necessary mathematical tools. Assuming minimal knowledge of undergraduate physics and mathematics, this book lays both the mathematical and physical groundwork with clear, intuitive explanations and plenty of examples. The book then continues with an exposition of the Standard Model of Particle Physics, the theory that currently seems to explain the universe apart from gravity. Furthermore, this book was written as a primer for the more advanced mathematical and physical ideas to come later in this series.

The Jesus He Deserved Sean Davis,Matthew Dean Robinson,Jacob Meeks,2018-12-07 In this generation's The Things They Carried three Oregon authors and combat veterans, Sean Davis, Matthew Robinson and Jacob Meeks, offer anatomies of war and of peace.

Lessons in Criminology and Criminal Justice Matthew Robinson,2023-05-03 This book explores twenty-five facts about crime and criminal justice that the author has learned in his quarter century of working in the fields of criminology and criminal justice. The book lays out each fact, one at a time, and then presents research in support of that fact. The facts pertain to issues of crime, justice, policing, courts, corrections, the drug war, and the death penalty. Though the book is scholarly in nature, it is written for the layperson and novice student. Using humor where appropriate, but also utilizing a “tell it like it is” approach, the book will captivate readers and keep their attention throughout. This book will be occasionally funny, as well as consistently interesting, timely, and engaging.

Mathias Matthew Robinson,2014-02-13 It takes one great mind to create the greatest weapon, but one even greater to become its host. This weaponised technology allows one man above all, to become indestructible, due to an extremely rare and virtually unheard of ability to control the beat of his heart, however terrifying or adrenaline-fuelled any given situation, forcing his brain to operate beyond intelligence, making a super computer appear as a child’s toy. Its enemy, however, is an army built of perfected robotic technology of the twenty-third century. This nation of drones are controlled by children who are trained to believe it’s a game and will only go without punishment if they treat it as such. One child’s passion and respect for the game means he fights only for revenge and what he believes is right. The United Kingdom, like the rest of the world, has a common enemy as the USA face Britain as their last assault, that will finally allow the president to be the first to achieve world domination. Only, the unforeseen force of this tiny country proves to be too much of a task. As they have a unique defence that only pure royal blood can control, leaving the queen with the power of the phoenix to unleash the fury of long-forgotten ancient warriors from myth and legend.

The Horse Latitudes Matthew Dean Robinson,2016-10-25 The Horse Latitudes follows one Cavalry platoon's time in Baghdad, Iraq. The missions are long stretches of boredom broken by flashes of violence. A single sniper shot fired. An IED loosely buried in the roadside, waiting. A schoolyard of kids throwing fist-sized rocks at gun trucks. The downtime is a combination of homesickness, RPGs, and mortar fire. The Horse Latitudes

observes not only firefights and their aftermath, but also the soldiers' struggles within themselves: how to fight a faceless enemy, what it means to serve, how one soldiers, what makes a man, what makes a good man, what it might mean to die for this, and what it might mean not to.

The Plunge Matthew Robinson,2023-03-31 Matthew Robinson's collection The Plunge features 120 poems about love, loss, life, nature, and other topics. The poems include free writes as well as 28 other poetic forms. While some poems focus on the minutiae of life, such as 'The Bee' and 'Butterfly', others take you around the world, such as 'Forever in Mozambique' and 'Antarctica'. There are deep and profound life lessons offered within, but also songs of love sung across the pages. These are Robinson's favorites amongst his poems, written over more than five years!

Race, Ethnicity, Crime, and Justice Matthew B. Robinson,2021 The second edition of Race, Ethnicity, Crime, and Justice presents the latest research on studies of race, ethnicity, and justice practices at the juvenile and adult levels. With a focus on intersectionality, the text shows how these extralegal factors interact with others to help understand outcomes such as disparities in excessive use of force by the police and court sentencing, as well as disproportionate minority confinement in corrections. Designed to be brief yet thorough, the text covers the most important issues related to race and ethnicity as they pertain to the law, crime and delinquency, policing, courts, and corrections. Race, Ethnicity, Crime, and Justice is highly readable and classroom friendly while also making a meaningful contribution to the literature on the topic--

Mathias Matthew Robinson,2016-07-20 Englands unique response to war was mind-blowing, but now that Americas comeback is almost complete Britain is in for a cruel and frightful surprise. The early days of Nicki's creation were slow and intense, but now progression is moving much faster than originally thought possible and her mechanics have proved to be far more dynamic than expected. America may have lost the recent battle, but the war has just begun. The president has blindly refused to accept defeat by creating a sneaky tactic of targeted mass destruction that he plans to unleash and once America's short lived containment is breeched, his journey for more power can continue. The downfall of Great Britain grows nearer by the day but to the sheer terror of her majesty the Queen, the Golden Phoenix is stripped of its power, leaving her enemies free to throw everything at her beloved country all at once. However, there are many forces at work, so if England is to survive the most brutal invasion of torture and savagery, they will need help from the greatest gamer that ever lived. For good reason he will not come willingly, so England are left no other choice but to bend the rules with trickery and deceit. The journey for Mathias quickly grows deeper than he ever could have imagined, as his past will unexpectedly catch up with him and reopen some slow healing wounds that are sure to cause him problems. His astonishing powers are truly pushed to breaking point and this unthinkable torture, will either make him, or break him, so can this unlikely hero bring an end to the worlds terrine, or is he simply prolonging the inevitable.

Death Nation Matthew B. Robinson,2008 For courses in Capital Punishment, The Death Penalty, Policy Analysis/Policy Evaluation/Public Policy and Social Problems. Based on empirical evidence, Death Nation offers a fair and reasoned analysis of capital punishment as it is actually practiced in the United States. It includes a discussion of

death penalty history, an analysis of the death penalty law and a discussion of various policy implications. Rather than present philosophical or moral arguments, it presents findings from a survey administered to dozens of capital punishment experts throughout the United States. Included in the book are fact check sections that analyze these expert opinions for accuracy based on available empirical evidence.

Food Crime Matthew Robinson, 2023-08-11 This book addresses the various forms of deviance and criminality found within the conventional food system. This system—made up of numerous producers, processors, distributors, and retailers of food—has significant, far-reaching consequences bearing upon the environment and society. Food Crime broadly outlines the processes and impacts of this food system most relevant for the academic discipline of criminology, with a focus on the negative health outcomes of the US diet (e.g., obesity and diabetes) and negative outcomes associated with the system itself (e.g., environmental degradation). The author introduces the concept of food criminology, a new branch of criminology dedicated to the study of deviance in the food industry. Demonstrating the deviance and criminality involved in many parts of the conventional food system, this book is the first to provide exhaustive coverage of the major issues related to what can be considered food crime. Embedded in the context of state-corporate criminality, the concepts and practices exposed in this book bring attention to harms associated with the conventional food system and illustrate the degree of culpability of food companies and government agencies for these harms. This book is of interest to students, scholars, and practitioners seeking a more just and healthy food system and encourages further future research into food crimes in the disciplines of criminology, criminal justice, and sociology.
