Intellectual Property Rights, Development, and Catch Up Hiroyuki Odagiri,Akira Goto,Atsushi Sunami,Richard R. Nelson,2010-04-08 For most countries, economic development involves a process of 'catching up' with leading countries at the time. This is never achieved solely by physical assets and labour alone: also needed are the accumulation of technological capabilities, educational attainment, entrepreneurship, and the development of the necessary institutional infrastructure. One element of this infrastructure is the regime of intellectual property rights (IPR), particularly patents. Patents may promote innovation and catch up, and they may foster formal technology transfer. Yet they may also prove to be barriers for developing countries that intend to acquire technologies through imitation and reverse engineering. The current move to harmonize the IPR system internationally, such as the TRIPS agreement, may thus have unexpected consequences for developing countries. This book explores these issues through an in depth study of eleven countries ranging from early developers (the USA, Nordic Countries and Japan), and Post World War 2 countries (Korea, Taiwan, Israel) to more recent emerging economies (Argentina, Brazil, China, India and Thailand). With contributions from international experts on innovation systems, this book will be an invaluable resource for academics and policymakers in the fields of economic development, innovation studies and intellectual property laws.

The World Air Power Guide David Wragg,2011-02-23 Compiled by the author of Janes Air Forces of the World, this book is a must for aviation experts.In one volume the reader will find the composition and details of all air elements of a staggering 169 nations air forces and, where they exist, army air, naval air and such paramilitary organizations as the US Coast Guard Service.By definition such a book must be regularly updated and David Wragg has researched his subject right up to the minute. This latest book supersedes the authors early book in the Jane series.

Airliner Models Anthony J Lawler,2019-10-08 For most of the past century, beautiful models of airliners have been made to promote their airlines' services in travel agents and their own shops. The models also illustrate the evolution of airliner design over these decades: the wood and fabric biplanes of the 1920s, the broad adoption of all-metal airliners in the 1930s, the first jet airliners of the 1950s, the first wide-body airliners of the 1970s and the pioneering small steps in supersonic air travel are all covered. The increasingly colourful exterior schemes adopted by the airlines, to ensure recognition by aspiring passengers, provide an interesting subtext. For model collectors, the airliner type, makers name, scale, approximate age and the materials used are detailed for each model illustrated. A short history of significant model-making companies is covered. With the onset of online bookings and the closure of airline offices and travel agents, the use of models is fast vanishing forever. The focus of this book is to preserve this fascinating era when models were a significant marketing tool, and to ensure that these models, at least in photographic form, survive as a record for future generations.
