Air Pictorial and Air Reserve Gazette , 1954

*Flight Plan Africa* John P. Cann, 2015-05-19 Following the 1952 reorganization of the Portuguese Air Force from the army and naval air arms, Portugal now had an entity dedicated solely to aviation that would bring it into line with its new NATO commitment. As it proceeded to develop a competence in modern multiengine and jet fighter aircraft for its NATO role and train a professional corps of pilots, it was suddenly confronted in 1961 with fighting insurgencies in all three of its African possessions. This development forced it to acquire an entirely new and separate air force, the African air force, to address this emerging danger. This is the story of just how Portuguese leadership anticipated and dealt with this threat, and how it assembled an air force from scratch to meet it. The aircraft available at the time were largely castoffs from the larger, richer, and more sophisticated air forces of its NATO partners and not designed for counterinsurgency. Yet Portugal adapted them to the task and effectively crafted the appropriate strategies and tactics for their successful employment. The book explores the vicissitudes of

procurement, an exercise fraught with anti-colonial political undercurrents, the imaginative modification and adaptation of the aircraft to fight in the African theaters, and the development of tactics, techniques, and procedures for their effective employment against an elusive, clever, and dangerous enemy. Advances in weaponry, such as the helicopter gun ship, were the outgrowth of combat needs. The acquired logistic competences assured that the needed fuel types and lubricants, spare parts, and qualified maintenance personnel were available in even the most remote African landing sites. The advanced flying skills, such as visual reconnaissance and air-ground coordinated fire support, were honed and perfected. All of these aspects and more are explored and hold lessons in the application of airpower in any insurgency today.

**The General Aviation Handbook** Roderick W. Simpson, Rod Simpson, 2005 This is a completely new and revised edition of the General Aviation Handbook, long overdue since it has been over 10 years since the last edition was published. This edition is fully revised and updated and contains 10 years worth of updated material, including the addition of a number of manufacturers and aircraft which were omitted from earlier editions for various reasons. Aircraft new to this edition include the so-called heavy microlights, which are now an important part of the worldwide light aircraft scene. About 90 percent of the photos are new, and larger page size provides greater space for large data tables and photos. Previous editions have been strong sellers; this is the main reference book on this important sector of the aviation world, and this new edition will be welcomed by both aviation enthusiasts and those involved in the aviation industry.
