McDonnell Douglas Mike Spick,1991-07-01 Discusses airframe design, history and development, structure, operational requirements, and service life of the American naval attack plane that can convert from bomber to fighter at need

**McDonnell Douglas F/A-18 Hornet and Super Hornet** Steve Davies,2017-03-01 The US-designed and built McDonnell Douglas F/A-18 Hornet is one of the most important Fourth Generation fighters in the world. Its twin-engine, twin-tails (canted outwards), and leading edge root extensions make it one of the most recognizable fighters in operation. The latest version is the enlarged Super Hornet. It was controversial in being chosen as the replacement for the much loved F-14 Tomcat, but the truth is that it is a potent and fearsome fighter that boasts one of the most capable radars in service and a weapons loadout that takes full advantage of it. The Super Hornet currently performs the bulk of the Western world's airstrikes on the nefarious terrorist group 'ISIS' in Iraq and Syria. Developed initially by Northrop as the P-530 Cobra in response to the US Air Force's Light Weight Fighter competition (winner: the General Dynamics F-16), the Hornet had a troubled start in life. Designated the YF-17 for the LWF fly-off in 1974, it failed to impress the Air Force. However, contractor McDonnell Douglas stepped in confident that it could be improved sufficiently to make it a contender for the US Navy's new fighter competition. McAir, as was often the case, were right. Re-designed and re-designated the F/A-18 (fighter/attack), it won the competition and entered service with the US Navy as a carrier-borne, multi-role fighter, marking the beginning of the Hornet's journey from Air Force 'reject' to 'king' of the US Navy's Fleet Defenders

The Air Forces Book of the F/A-18 Hornet Tim Senior,2003 The F/A-18 Hornet has been in service over 20 years and has developed into an effective multi-role combat aircraft. With its array of weapon options the Hornet is capable of engaging targets on land, sea, and in the air and its ability to swing-role from one target type to another is impressive. The aircraft is in service with a number of air arms worldwide in both carrier-based and land-based variants.

**Boeing (McDonnell Douglas) F/A-18 E/F Super Hornets Vol. II** Salvador Mafé Huertas,2022-01-31 The FACA program (Future Fighter and Attack Aircraft) was once the largest investment in armaments made in Spain. When choosing the F-18 of McDonnell Douglas (today Boeing), the Air Force has had since 1986 - for the first time in its history - one of the most advanced fighter planes ever designed, with very wide possibilities for adapting new systems throughout its operational life, as evidenced by the Retrofit made in the early 1990s and the current MLU. The FACA program (which ultimately remained in 72 aircraft), followed by the CX program (for 24 aircraft), was the most important challenge faced by the Spanish Air Force since its creation. The professionalism demonstrated by the commission in charge of flight and technical evaluations won the admiration of the countries involved in the program. The F-18 Hornet has proven to be the ideal aircraft for air forces in countries with large territorial areas and wide coastlines or extreme weather conditions.

**Hornet** Orr Kelly,2014-06-24 The fascinating true story of the controversial development and deployment of the supersonic fighter jet that changed aerial warfare forever The McDonnell Douglas F/A-18 Hornet was born in 1978, a state-of-the-art supersonic fighter and attack aircraft with a top speed of Mach 1.8, more than one thousand miles per hour. It was versatile, fast, and reliable, and no war machine in the air could match it. The marines adopted it first, followed by the navy, impressed by its incomparable ability to engage in close aerial combat while at the same time efficiently delivering explosive payloads to designated enemy targets. It became the aircraft of choice for the US Navy's famous Blue Angels flight demonstration squadron in 1986 and served ably in combat from its first mission—America's launched air strike against Libya that same year—through 1991's Operation Desert Storm and well beyond. Yet the Hornet has always been shrouded in controversy, and while still in its planning stages, it sparked an unprecedented political battle that nearly doomed the miraculous machine before it could take flight. Orr Kelly, the acclaimed military author who has notably chronicled the remarkable histories of the US Navy SEALs and other branches of America's Special Forces, tells the fascinating true story of the F/A-18 Hornet—how it came to be, how it almost wasn't, and how it forever altered the way our nation's wars are fought.

**Modelling the F/A-18 Hornet** Geoff Coughlin,2005-03-20 The McDonnell Douglas F/A-18 Hornet is probably the world's most advanced air superiority fighter/attack aircraft and is often seen thrilling air-show crowds around the world. It is currently in service with the US Navy, the US Marine Corps, the Spanish, Australian, Swiss and Canadian air forces. This title provides a detailed guide to modelling the Hornet in 1/48th and 1/32nd scales, covering a variety of colour schemes. The step-by-step modelling projects include a 'Gunslingers' F/A-18C USN Hornet from Operation DESERT FOX, an F/A-18D Hornet from the Royal Malaysian Air Force, a Navy 'Black Aces' F/A-18F Super Hornet and an F/A-18A 'Top Gun'-school Hornet.

**Boeing (McDonnell Douglas) F/A-18 A/B/C/D Hornets** Salvador Mafe Huertas,2021-08-31 The F/A-18 Hornet is a single- and two-seat, twin engine, multi-mission fighter/attack aircraft that can operate from either aircraft carriers or land bases. The F/A-18 fills a variety of roles: air superiority, fighter escort, suppression of enemy air defenses, reconnaissance, forward air control, close and deep air support, and day and night strike missions. The F/A-18 Hornet replaced the F-4 Phantom II fighter and A-7 Corsair II light attack jet, and also replaced the A-6 Intruder as these aircraft were retired during the 1990s.

**McDonnell Douglas F/A-18 Hornet** Bill Holder,William G. Holder,Mike Wallace,1997 The McDonnell-Douglas F/A-18 Hornet is presented here showing its development, production and use by the United States Navy, Marine Corps and by various foreign air forces. Use by the Blue Angels, and the very latest model updates are included.

**F/a-18 Hornet-Super Hornet Illustrated** ,2017-02-17 A fully illustrated history of the McDonnell Douglas/Boeing F/A-18 Hornet series of attack aircraft, including the EA-18G Growler and export Hornets. Updated in print format to include many more photos and illustrations. This history contains over 200 photos and several of the paintings of the author.

*F/A-18E/F Super Hornet and EA-18G Growler* Ken Neubeck,2020 The Boeing F/A-18 E/F Super Hornet is an evolutionary redesign of the McDonnell Douglas F/A-18 A/B Hornet. The Legacy F/A-18 Hornet first flew in 1980 and met the requirement for a multirole fighter to complement the larger and more expensive Grumman F-14 Tomcat, serving in fleet defense interceptor and air superiority roles. The Hornet proved to be effective, but it was limited in combat radius due to fuel capacity. This would be corrected with the newer and larger F/A-18 Super Hornet design, which is now the primary fighter/attack aircraft used in the US Navy carrier fleet and has replaced both the legacy Hornet and the F-14 Tomcat. Additionally, the Super Hornet airframe design was used for the design of the EA-18G Growler, which took over the electronic countermeasures (ECM) role of the EA-6B Prowler.

The Boeing F/a-18E/F Super Hornet and EA-18G Growler Brad Elward,2012 The story of how the Super Hornet and Growler came into existence is the focus of this new book. The F/A-18E/F has its roots in the late-1980s Hornet 2000 study, which itself evaluated ways to enhance the range, payload, and bring-back capability of the existing F/A-18 Hornet. Through a series of trade-offs imposed by largely limited defense funds, what emerged was a versatile, affordable strike fighter aircraft that has served the Navy well since its fleet introduction in 2002. The Growler has a similar history. Itself an offshoot of the Super Hornet program, the EA-18G brought many of the Super Hornet's attributes - speed, maneuverability, self-defense capability, and advanced systems - into the electronic attack community and is now posed to assume all such missions from the venerable EA-6B Prowler within the next few years. The book draws on interviews with many of the key players in the F/A-18E/F and EA-18G program and on many press reports of the day to tell the story of how

these aircraft were designed, developed, and deployed. Moreover, the book provides insights into the problems faced by these key individuals as well as the management methods they used to produce aircraft that have consistently been delivered at or ahead of schedule, under cost, and under weight.

*The F/A-18 Hornet* David Seidman,2002-12-15 Discusses the history of the F/A-18C Hornet jet fighter plane and its use in various missions in battle, from the Vietnamese Conflict to the war against terrorism in Afghanistan.

**Boeing F/A-18 Hornet** Brad Elward,2001 This top-flight series provides a review of the world's most exciting combat aircraft.

**Legacy Hornets** Brad Elward,2017-10-30 This book is a concise, illustrated history of the US Navy and Marine Corps' most versatile jet strike fighter, the Boeing F/A-18 A-D Legacy Hornet. Presenting an historical perspective of the Legacy Hornet from its origins through today's use in the fleet, this edition explores the aircraft's various model upgrades and variants. The F/A-18 began as a less expensive complement to the Grumman F-14 Tomcat and Grumman A-6 Intruder, and was a replacement for the McDonnell-Douglas F-4 Phantom II and LTV A-7 Corsair II. The Hornet evolved into a capable multi-mission strike fighter, performing fighter, suppression of enemy air defense, and light attack missions. This volume features a number of high-quality images that highlight the aircraft throughout its Navy and Marine Corps career.

**Boeing F/A-18e Super Hornet** Adrian Wolnicki,Sebastian Piechowiak,2021-01-31 The Boeing F/A-18E and F/A-18F Super Hornet are twin-engine, carrier-capable variants based on the McDonnell Douglas F/A-18 Hornet. The F/A-18E single-seat variants are larger and more advanced derivatives of the F/A-18C and D Hornet.

**F/A-18 Hornet** Mike Spick,1984-01-01 Recounts the development of the F/A-18 jet fighter, lists its technical specifications, and looks at the plane's armaments and special role in combat
