## **Hitler's Air Bridges** Dmitry Degtev,Dmitry

Zubov,2022-12-29 Much has been written about the famous fighters and bombers of the Luftwaffe which proved so successful in the invasion of Poland, the Battle of France, the Battle of Britain and in the early operations in Eastern Europe. Little attention, however, has been focused on the Luftwaffe's transport aircraft which played a vital role in supplying German forces in every theatre. In early May 1940, the battle of Norway was nearing its climax, but General Eduard Dietl's 3rd Jäger division was blocked by the Allies in the Narvik area. Only the Luftwaffe could provide effective assistance to the encircled troops. The special purpose groups KGr.zbV107 and KGr.zbV108 were ordered to supply the division by air. Transports delivered ammunition, food, and even boots for German sailors who found themselves on land. This was the first of a number of occasions in which the Luftwaffe's transport Gruppen, often equipped with the slow, but reliable Junkers 52, created an 'air bridge' to supply troops cut off or surrounded by the enemy. The transport Gruppen had previously been involved in supporting the advance of German forces during the Polish campaign, this being followed by the capture of Denmark, The Netherlands, Belgium, and Greece. During Operation Barbarossa, German troops were dispersed over the vast expanses of Russia. It was a country without roads where the normal supply by trucks and trains to the troops was difficult and sometimes impossible. Often, it was only the Luftwaffe's transport aircraft that kept the Germans fighting. But with Hitler's insistence that there should be no retreat despite the overwhelming strength of the Soviet forces, his German armies found themselves surrounded and the Luftwaffe had to create air bridges to supply the beleaguered troops. Nowhere was this more evident than the Battle of Stalingrad, Göring having convinced Hitler that the Luftwaffe was capable of keeping the Sixth Army supplied. As the war increasingly turned

against the Third Reich, air bridges were vital in supporting and maintaining its garrisons in places such as Demyansk, Holm, Korsun, Budapest, Breslau, and many others. Hitler's Air Bridges presents the story of the Luftwaffe's transport Gruppen more extensively and in greater detail than ever before.

*A History of the Mediterranean Air War, 1940-1945*  
Christopher Shores,Giovanni Massimello,Russell Guest, Frank Olynyk, Winfried Bock,2016-08-05 The third volume in the epic military aviation series focuses on the Allied invasion of North Africa during World War II. This work of WWII history takes us to November 1942 to explain the background of the first major Anglo-American venture: Operation Torch, the invasion of French North Africa. Describing the fratricidal combat that followed the initial landings in Morocco and Algeria, it then considers the unsuccessful efforts to reach northern Tunisia before the Germans and Italians could get there to forestall the possibility of an attack from the west on the rear of the Afrika Korps forces, then beginning their retreat from El Alamein. The six months of hard fighting that followed, as the Allies built up the strength of their joint air forces and gradually wrested control of the skies from the Axis, are recounted in detail. The continuing story of the Western Desert Air Force is told, as it advanced from the east to join hands with the units in the west. Also covered are the arrivals over the front of American pilots and crew, the P-38 Lightning, the Spitfire IX, and the B-17 Flying Fortress—and of the much-feared Focke-Wulf Fw 190. The aerial activities over Tunisia became one of the focal turning points of World War II, yet are frequently overlooked by historians. Here, the air-sea activities, the reconnaissance flights, and the growing day and night bomber offensives are examined in detail.

Aircraft of the Luftwaffe, 1935-1945 Jean-Denis G.G. Lepage, 2009-01-29 One of the most significant innovations in modern warfare has been the appearance and development of air power, a technology which demanded technical and financial investment on a whole new scale and which ultimately changed the fundamental nature of war itself. This book covers the history and development of the German air force from 1935 to 1945, with descriptions and illustrations of almost all of the Luftwaffe's airplanes, including fighters, jet fighters, dive-bombers, ground attackers, medium and heavy bombers, jet bombers, seaplanes, flying boats and carrier planes, transport and gliders, reconnaissance and training aircrafts, helicopters, and many futuristic projects and other rarities.

Big Wings Philip Kaplan, 2005-09-30 In the history of aviation there have been many attempts to produce aircraft of extraordinary proportions to expand the limits of technology and create new performance standards. With few exceptions, the early attempts did not become the successes envisaged until post-

World War II when such aircraft as the Boeing B-52 long-range heavy bomber and the Boeing 747 'Jumbo Jet' airliner changed the face of aviation in both the military and civil roles. *Big Wings* is a well-researched, highly informative and sometimes nostalgic look at the sixteen most significant giants of the air. Each chosen aircraft is introduced and its *raison d'être* explained, then follows an in-depth review of the successful and failed technical aspects of the design, its operational history, first-hand accounts from those that had flown the aircraft and finally some startling facts and statistics. The aircraft selected are as follows: Military - Douglas B-19, Boeing B-29, Consolidated B-36, Northrop B-49 and Boeing B-52, Airliners - Bristol Brabazon, Boeing 747 and Airbus A380, Heavy Lifters - Messerschmitt Me323, Consolidated XC-99, Lockheed C5 and Antonov AN-225, Flying Boats - Dornier Do-X, Martin JRM Mars, Hughes HK-1 and Saunders Roe Princess.

**Oral History of Germans Taken To the USSR with Their Obsolete DFS 346-Part 1** David Myra PhD,2013-09-23 This is an oral history of several dozens of German aviation designers and engineers that were taken to the Soviet Union in October 1946 along with their DFS 346. The information contained here-in has never been made public until now. Dr Myhra traveled to all the places mentioned and with the assistance of language interpreters Margarita Reck of Salem-Neufrach, West Germany and Gerhard Hopf of Naples, FL, was able to communicate with the German-speaking engineers and designers. These are the unedited transcriptions of the actual conversations. Very interesting material! Look for future volumes of this rare and informative documentation. Enjoy!

**X-Planes** Manfred Griehl,2012-10-24 Renowned German aviation specialist Manfred Griehl has collected a unique and valuable selection of photographs of Luftwaffe projects that never made it into battle. They remained on the drawing board or at prototype stage either because they were deemed unsuitable or the developers simply ran out of time and the projects never went into production. Most photographs come from the development sites and testing grounds of the major manufacturers of Nazi Germany: companies such as Dornier, Junkers, Focke-Wulf and Heinkel all received funding from the government to develop bigger and faster aircraft. A huge amount of private testing went on with major organizations such as Daimler-Benz, BMW and Siemens investing huge amounts in new engine systems and other advances such as radar. This book also details the innumerable alterations that were made to existing service aircraft to equip them for new roles. There are examples of Fw190s developed for the delivery of chemical and toxic weapons, the high altitude Junkers EF 61, the early prototype WNF 342 helicopter as well as numerous examples of developmental jet fighters that could very well have been realized had it not been for the effectiveness of the Allied bombing campaign in restricting the supply of necessary materials.
