**SNAFU Medivac** ,2020-04 A charity anthology for James A. Moore's medical costs and ongoing costs of living. 120,000 words, with four original stories and eight best-of-SNAFU reprints. + + + Some of the most important military missions have been medical evacuations - medivacs. Soldiers don't often fight for themselves. They fight for the guy next to them, their brother, their friend, their family. And they fight hard. In 2019, Cohesion author and friend... hell, more family, really... Jim Moore was suddenly in the struggle of his life. He overcame the Big C, but his fight is ongoing. A fight to pay for all the treatments in a country that has no free public health system, and a fight to claw his way back from the ravages of the very treatment that saved his life. His fight is our fight, and if we don't fight for our friends, is there anything really worth living for? + + + All income from SNAFU: Medivac goes to Jim to help pay his bills and keep his household functional. Once this is no longer necessary, the income will transfer to a cancer research or treatment charity.

**Medivac** Amanda Blajn,2017-01-20 When the blood stops, can I rest? Archangel is an ordinary man with extraordinary endurance faced by the worst of the Easter death toll on the raging roads of South Africa. His sojourn at the controls of the hospital rescue helicopter is a marathon of casualty and slaughter. The Capital of blood and road rage meets a gentle man trying to make the world a better place. The tense environment of the hospital emergency ward is certainly improved by his presence; but how long can he cope with this hellish strain? South Africa ranks pretty high in the world stakes for deaths due to automobile collisions; and the infrastructure put in place to deal with these horrific collisions is sometimes not adequate. Medivac is a hard look at a place where most of us will not go; until circumstance drags us there. Medivac is a book that gives a vital insight to a situation where each one of us can make a potent difference; if we wish too. Medivac is a dramatic look at the reality of road death; from the perspective of the hospital rescue pilot. A brilliant adventure narrative. - James Elric McLeod Blood and gore and stern endurance; a real look at a really frightening situation most of us daren't face; written in a homely and gentle style. One of Amanda's best books to date. - Matthew Fox

**Marine Corps en Route Care System (ERCS)** Michael R. Galarneau, Paula Konoske, Anne Tropeano, Gerald Pang, 2002-01-01 This report is organized into six sections. Section 1, introduction; Section 2, an overview of the medical evacuation system; Section 3 references relevant doctrinal guidance used to focus the development of En Route Care System. The development of the methodology, patient treatment profiles, and medications, supplies and equipment requirements are detailed in Section 3. Section 4 reviews the SMEs' recommendations for ERCS personnel; Sections 5 and 6 present some issues and conclusions related to en route care. Current Marine Corps warfighting concepts anticipate an increasingly hostile and uncertain battlefield that will be defended by highly mobile and dispersed combat forces. Such an environment requires a reduced medical presence that responds quickly without compromising the standard of care. To achieve these goals, the Marine Corps must rely more heavily on medical evacuation and en route care, the process of providing essential medical care while transporting critically injured and ill casualties. The Marine Corps has launched an effort to develop the ERCS. Naval Health Research Center and Marine Corps Combat Development Center sponsored a conference to (1) identify the equipment and consumable supplies required to provide en route care during tactical medical evacuation, and (2) determine the skills and personnel required to provide en route care. The objectives of this paper are to provide a comprehensive understanding of the need for en route care, detail the pertinent factors shaping ERCS, and document the development of ERCS medical resource requirements. Included in this paper is a description of the en route care conference, which helped to define the clinical capability needed to provide en route care of critically injured and ill casualties during tactical evacuation.

**Medical Risk in the Future Force Unit of Action** David E. Johnson, Gary Cecchine, Army Medical Department Transformation W, 2005 Documents the Army Medical Department's process of identifying and addressing medical issues related to the Army's transformation to the Future Force.

**Military Disability System** Daniel Bertoni, 2009-05 In Feb. 2007, a series of articles in 'The Washington Post' about conditions at Walter Reed Army Medical Center highlighted problems in the military's disability evaluation system (DES). Subsequently, the Dept. of the Army, the DoD, and the VA undertook initiatives to address concerns with the DES. In 2007, the Army took steps to streamline its process, and DoD and VA began piloting a joint evaluation system to address systemic concerns about timeliness and the potential inefficiency of having separate DES. This report examines: (1) recent actions by the Army to help servicemembers navigate its DES; and (2) the status, plans, and challenges of DoD and VA's efforts to pilot and implement a joint DES Includes recommendations. *Medical Planning for Military Operations Other Than War* Tony J. Stockton, Joseph S. John, Jr., 2002-03-01 Military operations other than war are increasing in frequency and, as one might surmise present unique challenges to the operational commander and the medical planner. Over time and by necessity the U.S. military has developed a logistical support system with unprecedented capability. This logistical system includes a medical system that is increasingly called upon to provide care to people outside the normal scope. Increased participation means Navy assets will be tasked to provide care to U.S. troops, U.N. troops, multinational troops, NGO personnel, and the civilians that precipitated the need for intervention in the first place. The current planning paradigm is, rightfully, focused on combat support. This thesis will investigate the necessity of breaking away from that paradigm when planning MOOTW. There is no standardized guidance, methodology, templates, matrices or even a set of guiding principles for the medical planner to use when tasked with planning a medically complex contingency operation. This thesis will compare the Navy planning method with Army methods and, combined with primary source interviews, and the knowledge acquired in this graduate program, provide the reader with planning guidance unique to the medical aspects of MOOTW.

Australian Foreign Policy Michael O'Keefe, 2023-08-10 How does Australia's unique geographical, cultural and historical position influence its approach to foreign policy? What key challenges does Australia face on the world stage, and how can it overcome them? Reflecting the messy reality of foreign policy decision-making, this book helps you to understand the changes and continuities in Australia's approach. For example, does the US withdrawal from Vietnam in 1973 and collapse of South Vietnam continue to cast a shadow over Australian foreign policy, or is it relevant only in understanding the dynamics of the cold war? Using an Australian Strategic Culture framework, O'Keefe sheds light on the characteristics that make Australia behave in a way different to any other country and equips you with analytic skills to understand the main debates, such as: - In what sense could Australia be seen as a 'good' international citizen? - Have national interests trumped global responsibilities? - How does the intersection between civil society and public opinion interact with foreign policy making? This book is essential reading if you are a student of Australian foreign policy, as well as of broader Australian domestic politics and international relations.

African Bush Pilot David HUNT, 2020-04-17 A short story, third in the series of African Bush Pilot, candidly describing the author's experiences and emotions, whilst performing emergency medivac flights in adverse and challenging conditions. A true narrative of a time when navigation aids were practically non-existent and poorly equipped light aircraft were the norm. An exciting read, particularly for pilots and flying enthusiasts, set in the rugged and vast landscape of a still largely uncharted part of Africa.
