

Merchant Vessel

Willis J. Abbot

The Shipping Revolution Robert Gardiner,1992

Amending the Merchant Ship Sales Act of 1946 United States. Congress. House. Committee on Merchant Marine and Fisheries. Subcommittee on Maritime Affairs,1949 Considers legislation to authorize exchanges of certain war-built merchant vessels purchased as Government surplus for certain other Government surplus war-built merchant vessels.

The Merchant Vessel Charles Nordhoff,1895 Narrative sketches of the author's service as a merchant mariner between approximately 1847 and 1851, liberally salted with 'yarns' about life at sea on board a variety of merchant vessels (including an Indiamen and a Slaver) bound for destinations around the world as told by his fellow seamen.

American Merchant Ships and Sailors Willis J. Abbot,2013-06 In all times and ages, the deeds of the men who sail the deep as its policemen or its soldiery have been sung in praise. It is time for chronicle of the high courage, the reckless daring, and oftentimes the noble self-sacrifice of those who use the Seven Seas to extend the markets of the world, to bring nations nearer together, to advance science, and to cement the world into one great interdependent whole. Willis John Abbott (1863-1934), American journalist and author of several maritime books, gives a detailed account of the history of merchant shipping in the United States.

Sailor Life on Man of War and Merchant Vessel Charles Nordhoff,1884

American Merchant Ships and Sailors Willis John Abbot,2005-01-01 When the Twentieth Century opened, the American sailor was almost extinct. The nation which, in its early and struggling days, had given to the world a race of seamen as adventurous as the Norse Vikings had, in the days of its greatness and prosperity turned its eyes away from the sea and yielded to other people the mastery of the deep. One living in the past, reading the newspapers, diaries and record-books of the early days of the Nineteenth Century, can hardly understand how an occupation which played so great a part in American life as seafaring could ever be permitted to decline. The dearest ambition of the American boy of our early national era was to command a clipper ship—but how many years it has been since that ambition entered into the mind of young America! In those days the people of all the young commonwealths from Maryland northward found their interests vitally allied with maritime adventure. Without railroads, and with only the most wretched excuses for post-roads, the States were linked together by the sea; and coastwise traffic early began to employ a considerable number of craft and men. Three thousand miles of ocean separated Americans from the market in which they must sell their produce and buy their luxuries. Immediately upon the settlement of the seaboard the Colonists themselves took up this trade, building and manning their own vessels and speedily making their way into every nook and corner of Europe. We, who have seen, in the last quarter of the Nineteenth Century, the American flag the rarest of all ensigns to be met on the water, must regard with equal admiration and wonder the zeal for maritime adventure that made the infant nation of 1800 the second seafaring people in point of number of vessels, and second to none in energy and enterprise.

Merchant Ships, a Pictorial Study John Hoffman La Dage,1968

The Ship That Held Up Wall Street Warren Curtis Riess,2014-11-14 In January 1982, archaeologists conducting a pre-construction excavation at 175 Water Street in Lower Manhattan found the remains of an eighteenth-century ship. Uncertain of what they had found or what its value might be, they called in two nautical archaeologists—Warren Riess and Sheli Smith—to direct the excavation and analysis of the ship's remains. As it turned out, the mystery ship's age and type meant that its careful study would help answer some important questions about the commerce and transportation of an earlier era of American history. The Ship that Held Up Wall Street tells the whole story of the discovery, excavation, and study of what came to be called the “Ronson ship site,” named for the site's developer, Howard Ronson. Entombed for more than two hundred years, the Princess Carolina proved to be the first major discovery of a colonial merchant ship. Years of arduous analytical work have led to critical breakthroughs revealing how the ship was designed and constructed, its probable identity as a vessel built in Charleston, South Carolina, its history as a merchant ship, and why and how it came to be buried in Manhattan.
