Ivan Berg, Nik Berg

*Messerschmitt Gold Portfolio 1954-64* R Clarke, 1994-08-07 The first Messerschmitt car was produced in 1953, a 175cc KR175 and came to Britain in 1954. This model came without suspension, reverse gear and heater. However, in 1955 it was upgraded to the KR200 with suspension and a 191cc Sachs engine. A tuned version of this established twenty five long-distance and world endurance records. The TG500 Tiger was unveiled in 1957, a four-wheeler with a twin-cylinder 500cc engine and bigger wheels. The bodywork for these also came as a roadster, Cabrio and sport. The last Messerschmitts were produced in 1964. This is a book of contemporary road tests, new model introductions, driver's impressions, technical and specification data, technical and historical articles from the major Clubs. Models covered include:- KR175, KR200, KR201, Cruisette, TG500, FMR, Super, Sport Cabriolet.

*The A-Z of popular Scooters & Microcars* Mike Dan, 2015-08-24 This is mainly a photographic reference book to classic scooters and microcars with specification data presented in A to Z order of manufacturer. There are also nostalgic recollections by the author based on ownership and personal experience. In the middle 1950s as a teenager Mike Dan became interested in these then newly-arrived forms of transport. Eventually Mike owned a series of scooters and a microcar. He became involved in Scooter and Microcar Clubs and took part in many local and national sporting events gaining a collection of awards and trophies. In the mid 1980s he had time again to visit many indoor and outdoor classic vehicle shows. Eventually this led to a renewed personal involvement in the restoration of a series of over twenty classic scooters and three classic microcars. This highly entertaining book and reference source is therefore written with the authority of a lifetime enthusiast.

**Scenes from an Automotive Wonderland** Gregory A. Cagle, 2018-03-16 Gregory Cagle was a 10-year-old car fanatic when his family moved from New Jersey to Germany in 1956. For the next five years he photographed unusual, rare and sometimes bizarre automobiles throughout Europe. This book features 105 specimens of auto exotica, captured with Cagle's Iloca Rapid-B 35mm camera—not showpieces in museums but daily drivers in their natural habitats. In the background can be glimpsed, here and there, the mood of postwar Europe. The story behind each photo is told, with dates and locations, information and history about the cars and some of their owners, along with Cagle's personal anecdotes.

*The Big Book of Tiny Cars* Russell Hayes, 2021-12-21 The Big Book of Tiny Cars presents entertaining profiles of automotive history's most famous—and infamous—microcars and subcompacts from 1901 to today. Illustrated with photos and period ads.

**To Boldly Go** Graham Hull, 2017-03-17 To Boldly Go details 26 sometimes controversial vehicles, from 1911 to present, all solving different design challenges. From the Issigonis Mini that changed design and social mores, to racers so successful they were banned from competition, from cars produced in millions, to one-offs, all created by those marching to the beat of their own drum.

Minicars, Maglevs, and Mopeds Selima Sultana, Joe Weber, 2016-04-18 This book provides a fascinating look at the amazing diversity of forms of travel and transport around the world today in the context of cultures, politics,

economics, and environment of a place. Across the timeline of human history, transportation has played a role in the migration of people and information, nation-building, economic development, environmental alteration, access to and the use of resources, and even the fall of civilizations. This single-volume reference presents more than 150 entries that describe the most up-to-date surface transport technologies and routes in use on every continent, including a broad range of road vehicles, railroads, person-powered vehicles, and even animals used for transportation. The book melds transportation geography with culture, politics, economics, and environment of place in its coverage of vehicles, transportation technologies, and some of the most famous streets, rail systems, and highways from around the world. The entries are written by transport geography scholars to be accessible to general readers without technical backgrounds. Each entry incorporates cross references that allow readers to easily find related entries, making the book ideal for conducting specific research or completing school projects.

*Journey Interrupted* Hildegard Mahoney, 2016-04-05 In the midst of World War II, a German-American family finds themselves stranded in Japan in this inspiring tale of an extraordinary family adapting to the hazards of fate, and finding salvation in each other. In the spring of 1941, seven-year-old Hildegard Ercklentz and her family leave their home in New York City and set off for their native Germany, where her father has been recalled to the headquarters of the Commerz & Privat Bank in Berlin. It was meant to be an epic journey, crossing the United States, the Pacific, and Siberia—but when Hitler invades Russia, a week-long stay in Yokohama, Japan becomes six years of quasi-detention, as Hildegard and her family are stranded in Japan until the war's end. In this spellbinding memoir, Mahoney recounts her family's moving saga, from their courage in the face of terrible difficulties—including forced relocation, scarce rations, brutal winters in the Japanese Alps—to their joyous

reunion with their German relatives in Hamburg, and their eventual return to New York City in 1950. Richly detailed and remarkably vivid, *Journey Interrupted* is a story unlike any other—the inspiring tale of an extraordinary family adapting to the hazards of fate, and finding salvation in each other.

**The Car Show** Nicolae Sfetcu,2014-04-27 This e-book details the most interesting and important characteristics of the automobiles, car maintenance, styling features, car body style, the standard classification of the cars, an history of the automobiles, introduction in the automotive industry, and the traffic code, rules and signs. An automobile, usually called a car (an old word for carriage) or a truck, is a wheeled vehicle that carries its own engine. Older terms include horseless carriage and motor car, with “motor” referring to what is now usually called the engine. It has seats for the driver and, almost without exception, for at least one passenger. The automobile was hailed as an environmental improvement over horses when it was first introduced. Before its introduction, in New York City, over 10,000 tons of manure had to be removed from the streets daily. However, in 2006 the automobile is one of the primary sources of worldwide air pollution and cause of substantial noise and health effects.

The Macro World of Micro Cars Kate Trant, Austin Williams, 2004-06 Once a common sight in our towns and cities, microcars were ingenious solutions to the post war demand for economical and accessible motoring. Nowadays they are making a celebrated comeback with all of the big car manufacturers featuring at least one flagship small car, from DaimlerChrysler's Smart and BMW's Mini to Nissan's Micra. But what are the factors, now and then, that turned the microcar into a viable alternative to the 'normal' car? How have the aspirations and ideas behind the microcar changed over the decades? The cars themselves have undoubtedly undergone a radical transformation. Whereas the current trend in small cars is led by environmental concerns, the first phase of the microcar phenomenon was determined by economic necessity: many manufacturers of planes, trains, and white goods had to re-invent themselves as producers of automobiles. The result was a proliferation of small, cheap and extraordinary looking three- and four-wheeled vehicles. This book looks at the social and cultural conditions behind the rise, the fall and the ultimate resurrection of the small car, and features some of the most fascinating and best-loved examples. With the debate over transport, sustainability, congestion, fuel consumption, taxation and the environment high on the agenda, there has never been a better time than now to examine the role of the microcar.--BOOK JACKET.

Over and Above John E. Gurdon, 2018-08-17 A fictionalized World War I memoir by RAF pilot John Everard Gurdon, "an evocative picture of the daily life of the squadron and its characters" (Western Front Association). Over and Above was first published in 1919 soon after John Everard Gurdon, aged just twenty, had been invalided out of the RAF following a brief but incident-filled stint as a flyer on the Western Front. It is Gurdon's first and best book, repeatedly reprinted for two decades, variously titled Winged Warriors or Wings of Death. Billed as a novel, it is not so much that as a fictionalized account of his own service flying career, with names changed, incidents rearranged. True, it tells of "exciting raids over enemy lines and towns, desperate fights against fearful odds, chivalry shown to an unchivalrous foe . . ." but the narrative turns darker as men become wearier, new comrades arrive and are killed, and those who remain try to hold onto meaning in increasingly unintelligible circumstances, a mirror to Gurdon's own experiences. Written in the style of the era and by and for a class which put great store in maintaining a slangy, backslapping cheerfulness, no matter how grim things were, with chums wishing each other "beaucoup Huns" before embarking on a "show" in "beastly" weather, this book is a classic to rank with Winged Victory by V. M. Yeates, and which should never have been out of print. This new edition retains exactly the original script but has been updated with an introduction by John Gurdon's granddaughter Camilla Gurdon Blakeley and an extended illustrated appendix by renowned historian Norman Franks.

**America's State Fair Impresario** Cory M. Franklin, 2019-12-24 Born in poverty in 19th century New York City, Mike Barnes rose to become America's premiere 20th century American show fair impresario, who embodied the Irving

Berlin lyric, "There's no business like show business." For four decades, he presented dramatic spectacles worthy of Cecil B. DeMille, musical and dancing revues that rivaled anything by Busby Berkeley, animal acts, daredevil wing walkers, human cannonballs, flagpole sitters and auto demolitions. He assembled and directed these acts, entertaining millions across the United States, even during times of depression and world war. His influence on outdoor lighting and sound system presentation is still felt today in 21st century outdoor performances. Besides a snapshot of midcentury America, America's State Fair Impresario: The Life & Times of Mike Barnes is the story of a modest man who was a brilliant showman, shrewd businessman, philanthropist, and exemplary family man. In short, a legendary American.

ZEDlife Bill Dunster, 2019-06-27 The argument for low-cost, zero-energy, zero-waste architecture has never been timelier, while the mainstream has largely abandoned or neglected this agenda: in the UK the recent mandatory zero-carbon performance targets for new homes have been postponed or forgotten at a time when thousands of new homes will be built, and there is already a shortage of electric generating capacity. This book offers a forceful challenge to the current addiction to overconsumption of natural capital and energy, and provides workable, sustainable solutions for zero-carbon, zero-waste design.
