La No Car M Huk,2019-06-04 Can you visit and enjoy Los Angeles without a car? YES! At one time in the early 20th Century, Los Angeles had the largest urban train transit system in the world. Then Los Angeles became the city of freeways, cars, suburbs, and smog. At the end of the 20th Century, Los Angeles citizens decided they had enough of the pollution and over-crowded roads and voted to build a mass train transit system. Today Los Angeles Metro is the third largest system in miles in the US, the eighth largest in ridership in the US, and the largest light rail system in the US. What this means for visitors and residents is that a lot -- a whole lot of L.A. -- is accessible by public mass transit, including the fabulously revitalized Downtown L.A., Hollywood, and nearby cities such as Pasadena, Long Beach, and Santa Monica. And so very much in between. From the heights of the Hollywood Hills to the Pacific Ocean and the neighborhoods of Los Angeles, readers of LA NO CAR will find out that there is so much to do, see, eat,

and enjoy that not even a few weeks is enough. For International visitors, using the L.A. Metro will be a familiar and less challenging way of getting around because not everyone is ready for L.A. traffic. Yes, many of the world's city traffic and driving is challenging, but not over such a wide expanse as L.A., where it is not so much the speed as it is the slow crawl that seems to happen day and night. LA NO CAR not only make sense of visiting L.A. with the Metro system, it also saves money. L.A. Metro fares are more than reasonable, and with their TAP card system, riders have access to every other mass transit system in Los Angeles County, as well as their own expanding system of short term bicycle rentals. LA NO CAR is laid-out starting in Downtown and travels to Hollywood, North Hollywood, Highland Park, Pasadena, Long Beach and Santa Monica, all by using Metro subway, light rail, BRT, and DASH buses. Each Metro Station that is highlighted has places to visit, see, enjoy and, of course, eat and drink. (LA NO CAR confirms that L.A. is a foodie town.) Throughout LA NO CAR are QR Codes that help navigate the way from the stations and stops to featured locations, and almost all are under one mile/1.6 KM from the nearest Metro Station. Most are under a half a mile/.80 KM walk, and many are adjacent to the Metro Station. All

of this proximity makes it possible to easily travel from Metro Station to Metro Station and at each stop find more than enough to enjoy. This is especially true in Downtown Los Angeles where Chinatown, Olvera Street, and Little Tokyo blend in with the Arts and Fashion Districts, as well as the cultural attractions of Bunker Hill to make a visit to Downtown a multi-day destination. All along the way is history, unexpected places, and the full flavor on one of the world's great cities. And of course, there is Hollywood where the subway has multiple stops, and most of the world famous attractions are just steps from the subway. That one of the major theme park attractions, Universal Studios Hollywood, has a subway stop steps from its free trolleys makes it easy to understand how LA NO CAR isn't some Hollywood fantasy. It is completely for real.

**The Little Red Metro for Sale** Avril Rowlands, 1984

**New York Subways** Gene Sansone, 2004-11-29 The first subway line in New York City opened on October 27, 1904. To celebrate the centennial of this event, the Johns Hopkins University

Press presents a new edition of Gene Sansone's acclaimed book, *Evolution of New York City Subways*. Produced under the auspices of New York's Metropolitan Transit Authority, this comprehensive account of the rapid transit system's design and engineering history offers an extensive array of photographs, engineering plans, and technical data for nearly every subway car in the New York City system from the days of steam and cable to the present. The product of years of meticulous research in various city archives, this book is organized by type of car, from the 1903–04 wood and steel Composite cars to the R142 cars put into service in 2000. For each car type, Sansone provides a brief narrative history of its design, construction, and service record, followed by detailed schematic drawings and accompanying tables that provide complete technical data, from the average cost per car and passenger capacity to seat and structure material, axle load, and car weight. Sansone also includes a helpful subway glossary from A Car (the end car in a multiple car coupled unit) to Zone (a section of the train to the conductor's left or right side). Subway and train enthusiasts, students of New York City history, and specialists in the history of technology will appreciate this updated and authoritative reference work about one of the twentieth

century's greatest urban achievements.

*Railtown* Ethan N. Elkind, 2014-01-22 The familiar image of Los Angeles as a metropolis built for the automobile is crumbling. Traffic, air pollution, and sprawl motivated citizens to support urban rail as an alternative to driving, and the city has started to reinvent itself by developing compact neighborhoods adjacent to transit. As a result of pressure from local leaders, particularly with the election of Tom Bradley as mayor in 1973, the Los Angeles Metro Rail gradually took shape in the consummate car city. *Railtown* presents the history of this system by drawing on archival documents, contemporary news accounts, and interviews with many of the key players to provide critical behind-the-scenes accounts of the people and forces that shaped the system. Ethan Elkind brings this important story to life by showing how ambitious local leaders zealously advocated for rail transit and ultimately persuaded an ambivalent electorate and federal leaders to support their vision. Although Metro Rail is growing in ridership and political importance, with expansions in the pipeline, Elkind argues that local leaders will need to reform the rail planning and implementation process to avoid repeating past mistakes and to ensure that Metro Rail supports a burgeoning demand for transit-

oriented neighborhoods in Los Angeles. This engaging history of Metro Rail provides lessons for how the American car-dominated cities of today can reinvent themselves as thriving railtowns of tomorrow.

**The New York City Subways' Motormans' Rant** Torin Reid, 2019-11-29 Have you ever REALLY wanted to know why things are the way they are, in today's New York City subway? Did you ever wish that some on the inside would just come out and talk frankly about the truths hidden within the subway? Well, lifelong rail enthusiast and 28 year veteran of the subway Torin Reid does just that. He takes a long and unblinking look at the New York subway as it never has been examined before. Mr. Reid, who is uniquely positioned to write this book, takes the time to look at the actions of the management, the employees and even the passengers in this information packed book about the subway. The reader will learn things and see angles that he or she never saw

before. In this book Mr. Reid takes apart and exposes the overfunded subway capital plans, and tells you about the signal system so that the herd mentality about how these track signals perform can be seen in a more objective light, and so professional contractors can stop using the passengers and taxpayers' ignorance for their own greed. He shows the dynamics of a train delay and how a passenger can bypass these things with a little preparation. Rather than offer dry testimonials and prepared statements, Mr. Reid will take you next to a manager, train operator, and frustrated passenger so that all can learn the true position of the other. Mr. Reid also has notes within this book he will quickly touch upon Amtrak, Metro North, Long island, New Jersey Transit and other railroads as well. This book is 1/3 life experience and 2/3 research into the way of the New York City subways, it's employees and its' passengers, and it is enlightening and well worth your time.

Metro Girl Janet Evanovich, 2005-09-27 Alexandra (Barney)

Barnaby roars onto the Miami Beach scene in hot pursuit of her missing baby brother, Wild Bill. Leave it to the maverick of the family to get Barney involved with high-speed car chases, a search for sunken treasure, and Sam Hooker, a NASCAR driver who's good at revving a woman's engine. Engaged in a deadly race, Bill has borrowed Hooker's sixty-five-foot Hatteras and sailed off into the sunset...just when Hooker has plans for the boat. Hooker figures he'll attach himself to Barney and maybe run into scumbag Bill. And better yet, maybe he'll get lucky in love with Bill's sweetie pie sister. The pedal will have to go to metal if Barney and Hooker want to be the first to cross the finish line, save Bill, Hooker's boat...and maybe the world.

Pacific Electric Red Cars Jim Walker, 2006 Of the rail lines created at the turn of the 20th century, in order to build interurban links through Southern California communities around metropolitan Los Angeles, the Pacific Electric grew to be the most prominent of all. The Pacific Electric Railway is synonymous with Henry Edwards Huntington, the capitalist with many decades of railroad experience, who formed the P. E. and expanded it as principal owner for nearly its first decade. Huntington sold his PE holdings to the giant Southern Pacific Railroad in 1910, and the following year

the SP absorbed nearly every electric line in the fourcounty area around Los Angeles in the Great Merger into a new Pacific Electric. Founded in 1901 and terminated in 1965, Pacific Electric was known as the World's Great Interurban.

**Subway Story** Julia Sarcone-Roach,2011-10-11 Never was there a subway car who loved her job more than Jessie. From morning to night she carried all sorts of people all sorts of places—to work and school and World's Fairs, over bridges and through tunnels—sometimes she even took a pigeon along for the ride! But as time passed, sleek new silver cars began to take over the tracks, banishing Jessie to an abandoned lot. What will she do with no passengers to carry? And where will she go now that she's no longer welcome on the tracks? Based on the true story of 1960's-era subway cars that are now being used to create artificial reefs in the Atlantic, this stunningly illustrated second book from Julia Sarcone-Roach is sure to delight scuba diving historians and kids alike.

Subway Art Martha Cooper, Henry Chalfant, 1984 Traces the history of New York graffiti, shows a variety of painted subway cars, and describes the graffiti writers and how they work.
