**Mil Mi-24/35 Hind** Jakub Fojtik, 2017-10-30 This publication covers the legendary soviet attack type, the Mi-24 Hind helicopter. As a very first book it describes not only the history and status of the original Mi-24 variants starting with the V-24 prototype through serial Mi-24A, Mi-24D, Mi-24V and Mi-24P models up to the last Mi-24VP production variant, but also the current development and service up to Mi-35M attack model or latest Mi-35MS VIP modification. Each variant is introduced by its development and production history and by the service and export including war deployment. A separate chapter is dedicated to the detailed description of all Mi-24 upgrades done by Czech, French, Israeli, Polish, Slovak, South African, UK, Ukrainian and of course Russian companies. Also, the special variants and high speed prototypes including current PSV demonstrator are described in detail. Very rare is the chapter focused on prototypes not reaching serial production. The publication includes list of export production and also list of re-exports giving to the reader a full idea of the world footprint of the Hind. A detailed technical description is attached with highlighting of variants deviations. All variants are lavishly illustrated by mostly colour pictures including strip down and walk around pictures of the helicopter and its systems. Essential reading for aviation enthusiasts & scale aeromodellers. 1/72 scale plans of all versions Colour profiles.

**Mil Mi-24 Hind Gunship** Alexander Mladenov, 2012-07-20 With its distinctive double-cockpit design, the Mi-24 'Hind' is arguably the most recognizable war machine of the Cold War, and has achieved near-legendary status in the annals of military history. The first Soviet helicopter to function as both a gunship and an assault transport, it served extensively in Afghanistan, and is now employed by militaries across the world. Written by an expert on the 'Hind', an drawing on manufacturing and military sources, this book presents the Mi-24 in all of its brutal glory, from design and development to deployment and combat. Also included are a number of color plates showing the distinct paint schemes employed by various nations in a range of theaters/ theatres and for different armies.

*Rethinking Post-Cold War Russian–Latin American Relations* Vladimir Rouvinski,Victor Jeifets,2022-06-07 Today, there is plenty of evidence that Russia has become a prominent external actor in Latin America and the Caribbean. Yet, few books have attempted to better understand the reasons behind Russia's return and Moscow's continuous engagement in the region. In order to fill the gap, this volume offers the first interdisciplinary study of Russian-Latin American relations after the end of the Cold War. Across 16 chapters, leading experts from Russia, Europe, the United States, and Latin America collectively re-examine the Soviet legacy to reveal the conditions in which Russia operates today and identify the key trends of contemporary Russian relations with this part of the world. The book then moves on to

provide a detailed case study analysis of Russia's bilateral relations with Venezuela, Cuba, Mexico, Brazil, Argentina, and Colombia, identifying the most critical dimensions of Russian engagement. Rethinking Post Cold-War Russian-Latin American Relations allows readers to identify the fundamental driving forces of Russia's renewed commitment to the area, its strategies and experiences. The book will be of interest to readers of international relations and area studies, historians of modern Latin America, migration studies, political economy, and any political scientists interested in Russian decision-making.

**War in Ukraine** Tom Cooper,Adrien Fontanellaz,Edward Crowther,Milos Sipos,2023-05-18 On 24 February 2022, eight years after invading the Crimean Peninsula of Ukraine and organizing an illegal referendum in support of a subsequent Russian annexation, President of the Russian Federation Vladimir Putin ordered a full-scale invasion of Ukraine. Both Western and Russian intelligence services expected the invasion to quickly topple the democratically elected government in Kyiv and, with the help of collaborators, to overrun the Ukrainian armed forces in a matter of between 3 and 14 days. Early on 24 February, the Armed Forces of the Russian Federation (VSRF) launched a series of missile and artillery strikes on the main air bases and dozens of other military facilities in Ukraine. Immediately afterwards, the VSRF launched a ground invasion, with its forces advancing on Kyiv, Chernihiv, Kharkiv, Mariupol, Melitopol, and Kherson. Although following a build-up that had begun in April 2021, and expected by many, the onslaught still came as a major surprise for the Ukrainian government, the

Ukrainian armed forces, and the majority of its allies in the West, and also for the mass of officers and other ranks of the VSRF, many of whom believed that they were only to participate in exercises. However, the deeper the Russians rolled into Ukraine, the more resistance they encountered: while some Russian units performed as expected, elsewhere whole armies began falling apart when ordered to advance at maximum possible speed without the necessary firepower and logistic support. After suffering catastrophic losses while failing to reach downtown Kyiv, and failing to reach and enter Chernihiv and Kharkiv, the war in northern and north-eastern Ukraine quickly settled down into a bloody stalemate. In the south, the Russians initially advanced at an astonishing rate, securing Melitopol during the second day of their invasion, and Kherson only a few days later. It was only once President Putin attempted to accelerate the rate of advance through ordering heliborne operations deeper into Ukraine that the VSRF suffered a severe blow in the fighting for Voznesensk and Mykolaiv, and its advance in this part of the country also came to an end. Richly illustrated with color photography and full color artworks, and providing a detailed study of the organization and order of battle of the armed forces involved on both sides, Volume 2 of War in Ukraine provides the first detailed account of the first two weeks of the Russian invasion of Ukraine in 2022.

**Russian Gunship Helicopters** Yefim Gordon, 2013-11-04 Features;??\* Profiles of iconic types such as the Mil MI-24 'Hind', the Mil-28 and the Kamov Ka-52

'Alligator'.?\* Summary of design histories and careers?\* Colour reference for paint schemes ?\* Critical review of available kits?\* Over 180 colour and black and white illustrations, including 20 full colour side-views and a range of various 3-view line-drawings. ??With profiles of a host of exciting designs, accompanied by a descriptive narrative history of the various types, this volume combines practical information with reflective historical analysis, making for a visually rich volume providing modellers with all they need to know about the most exciting Russian Gunship helicopter designs and associated model kits.??This edition deals primarily with the three principal attack helicopter types of the present-day Russian Army;??The Mil MI-24 'Hind' □ otherwise known as 'the Flying Crocodile' □ has been produced in large numbers with many versions and variants produced. It has been supplied to a host of countries and seen considerable combat action in conflicts both in the Soviet Union and abroad. It still forms the backbone of army aviation in Russia and remains at the forefront of national exposure.??The Mil-28 is a more contemporary type and is broadly the equivalent of the McDonnell Douglas AH-64 Apache. ??The Kamov Ka-52 'Alligator' □ NATO name 'Hokum-B' □ also features. This helicopter is in service with the Army and is entering service also with the Russian Navy. ??Well-illustrated histories and structural analyses are supplemented with detailed descriptions of the various plastic scale model kits which have been released, along with commentary concerning their accuracy and available modifications and decals. This level of detail

and insight is sure to prove invaluable to a wide community of model-makers, both at home and overseas.

**AK2918 - ACES HIGH HIND SPECIAL** , As an addendum to the regular Aces High Magazine issue devoted to the military helicopters, we offer you a special publication focused on one of the most famous military helicopters used around the world, the Mil Mi-24 Hind. Using the large 1/35 scale kit as the example, our editor Daniel Zamarbide guides you through the processes of construction, detailing, painting and weathering of a model of this legendary helicopter. The finished model is presented on a vignette containing a vehicle and figures, which creation is also thoroughly described. To enhance your understanding of the subject, we also include a concise article dealing with the history and development of the Mil Mi-24, attractive colour profiles, and a comprehensive walkaround chapter, which comprises numerous photos of different variants of the Hind. In the last chapter you will read about finishing yet another Mil Mi-24 kit in a very special livery

*Pakistan's War Machine: An Encyclopedia of its Weapons, Strategy and Military Security* Saghir Iqbal, 2018-05-13 The global security challenges after the post-Cold war period has affected many countries. Pakistan's geography and location present its security planners with serious, almost irresolvable strategic and tactical problems. It borders the nuclear states of India and China, an ambitious Iran, and an unstable Afghanistan, which is perceived as a gateway to its commercial-strategic ambitions in Central Asia.

Pakistan's key security problems are a reflection of its history and domestic circumstances. The overriding concern of Pakistan is its internal and external security. Strategically, Pakistan lacks territorial depth. Its main cities and communication routes are relatively close to the border with India and are susceptible to attack. In addition, the headwaters of Pakistan's rivers and main irrigation systems originate from India. Pakistan's borders with India were also new and mainly unfortified and, in many places, were drawn in ways that made them indefensible. Because the borders were also undemarcated, there was abundant chance for conflict. Pakistan has particularly been affected with a number of issues. It has been argued by many that a Fourth generation/Hybrid war has been imposed on Pakistan, in order to break the nation (Balkanization of Pakistan into different parts) with the aim of making it either extremely weak or total destruction as a nation state (so that it is not able to challenge the hegemonistic ambitions of its adversaries). The purpose of this book is to assess the military security problems that Pakistan faces, and focus on its external security matters (military threats from neighbouring countries such as India, balance of power in the region, nuclear and ballistic missile threats, relationship with external powers, the high risk of war and its role on the 'War on Terror'), and its internal security problems (sectarianism, proliferation of small arms, refugees, ethnic violence, drug problem, economic weaknesses), and also its ability to cope with these problems.

Helicopters Stanley S. McGowen, 2005-05-24 First envisioned by Leonardo da Vinci and first deployed in World War II, the helicopter is now a universal icon of modern warfare, a key component of combat planning around the world, and one of the military's most versatile and effective tools. Helicopters: An Illustrated History of Their Impact covers the development of helicopters from a concept in Leonardo daVinci's mind to the first successful machines in the early 1900s to the latest tilt-rotor designs. Time and again, in a story of constant innovation, designers answered the concerns of military planners with more maneuverable, more capable rotorcraft. With expert analysis and specific details of every significant model ever used, Helicopters shows how these once denigrated machines became essential to a variety of missions (reconnaissance, transport, attack, support, evacuation, urban combat, quick strikes behind enemy lines, and more). In addition, the book looks at the impact of rotorcraft beyond the military, including their ever-widening role in emergency medical care, police work, traffic control, agriculture, news

reporting, and more.

**The Military Balance 2024** The International Institute for Strategic Studies (IISS), 2024-02-13 The Military Balance has been published since 1959. The 2024 edition provides an open-source assessment of the armed forces and equipment inventories of over 170 countries, with accompanying defence economics data. In addition to detailed country data, The Military Balance assesses, region-by-region, important military issues. It includes graphics to illustrate defence personnel, equipment, and procurement developments. The 65th edition examines emerging lessons from Russia's full-scale invasion of Ukraine, details Chinese military activity around Taiwan, and identifies developments in uninhabited aerial vehicle exports. The accompanying wallchart spotlights the important issues around critical national infrastructure in the Euro-Atlantic. The book draws on the breadth of data in the Military Balance+ online database. The Military Balance and Military Balance+ are indispensable sources of information for those involved in defence and security policymaking, analysis, and research.
