Pakistan's War Machine: An Encyclopedia of its Weapons, Strategy and Military Security Saghir Iqbal, 2018-05-13 The global security challenges after the post-Cold war period has affected many countries. Pakistan's geography and location present its security planners with serious, almost irresolvable strategic and tactical problems. It borders the nuclear states of India and China, an ambitious Iran, and an unstable Afghanistan, which is perceived as a gateway to its commercial-strategic ambitions in Central Asia. Pakistan's key security problems are a reflection of its history and domestic circumstances. The overriding concern of Pakistan is its internal and external security. Strategically, Pakistan lacks territorial depth. Its main cities and communication routes are relatively close to the border with India and are susceptible to attack. In addition, the headwaters of Pakistan's rivers and main irrigation systems originate from India. Pakistan's borders with India were also new and mainly unfortified and, in many places, were drawn in ways that made them indefensible. Because the borders were also un-demarcated, there was abundant chance for conflict. Pakistan has particularly been affected with a number of issues. It has been argued by many that a Fourth generation/Hybrid war has been imposed on Pakistan, in order to break the nation (Balkanization of Pakistan into different parts) with the aim of making it either extremely weak or total destruction as a nation state (so that it is not able to challenge the hegemonistic ambitions of its adversaries). The purpose of this book is to assess the military security problems that Pakistan faces, and focus on its external security matters (military threats from neighbouring countries such as India, balance of power in the region, nuclear and ballistic missile threats, relationship with external powers, the high risk of war and its role on the 'War on Terror'), and its internal security problems (sectarianism, proliferation of small arms, refugees, ethnic violence, drug problem, economic weaknesses), and also its ability to cope with these problems.

Mil Mi-8/17/171 Hip Jakub Fojtik, 2019-04-19 This publication covers the legendary soviet multipurpose type, the Mi-8 Hip helicopter. As a very first book it describes not only the history and status of the original Mi-8 variants powered by TV2-117 engines starting with the V-8 prototype and the Mi-8MT (for export known as Mi-17) models powered by TV3-117 engines, but also the Mi-8AMT (Mi-171) family up to the latest Mi-8AMTSh-VN special operations variant. Each version is introduced by its development and production history and by the service and export. A separate chapter is dedicated to the detailed description of all Mi-8/17/171 family upgrades done by Belorussian, Bulgarian, Chinese, Czech, Finnish, French, Israeli, Lithuanian, Polish, Serbian, Slovak, South African, Turkish, UAE, UK, Ukrainian, US, Yugoslavian and of course Russian companies. All known special variants and demonstrators are described in detail as well. The publication includes list of export production and also list of re-exports giving to the reader a full idea of the world footprint of the Hip. A detailed technical description is attached highlighting variants' deviations. All variants and upgrades are lavishly illustrated by mostly color pictures including strip-down and walk-around pictures of the helicopter and its systems. Essential reading for aviation enthusiasts & scale aeromodellers.

Afghanistan 1979–88 Mark Galeotti, 2023-02-16 The first English-language book to examine the crucial part air power played in the Soviet-Afghan War. The Soviet Union's invasion of Afghanistan was fought as much in the air as on the ground. From the high-level bombing raids that blasted rebel-held mountain valleys, to the Mi-24 helicopter gunships and Su-25 jets that accompanied every substantial army operation, Soviet control of the air was a crucial battlefield asset. Vital to every aspect of its operations, Mi-8 helicopters ferried supplies to remote mountain-top observation points and took the bodies of fallen soldiers on their last journey home in An12 'Black Tulips'. But this was not a wholly one-sided conflict. Even before the Afghan rebels began to acquire man-portable surface-to-air missiles such as the controversial US 'Stinger,' they aggressively and imaginatively adapted. They learnt new techniques of camouflage and deception, set up ambushes against low-level attacks, and even launched daring raids on airbases to destroy aircraft on the ground. Featuring information previously unknown in the West, such as the Soviets' combat-testing of Yak-38 'Forger' naval jump jets, Soviet-expert Mark Galeotti examines the rebel, Kabul government and the Soviet operation in Afghanistan, drawing deeply on Western and Russian sources, and including after-action analyses from the Soviet military. Using maps, battlescenes and detailed 'Bird's Eye Views', he paints a comprehensive picture of the air war and describes how, arguably, it was Soviet air power that made the difference between defeat for Moscow and the subsequent stalemate that they decided to disengage from.

China's Bilateral Relations with Its Principal Oil Suppliers George G. Eberling, 2017-10-23 This book examines China's bilateral relations with its established suppliers of crude petroleum and on occasion, petroleum gas products including liquefied natural gas (LNG) based on a five-dimensional framework: political-diplomatic relations, economic-trade relations, military-security relations, cultural relations, and petroleum-energy relations. A five-dimensional approach is comprehensive in nature and offers a complete understanding of China's complex relationships rather than looking solely on more typical perspectives like bilateral trade, security relationships, or energy ties. More often than not, social science literature focuses on one or more aspects of China's bilateral relations, which does not provide a complete picture of the complex nature of its interstate ties. This book endeavors to bridge this gap and look more substantially at China's bilateral relationships with energy-petroleum relations being the key aspect linking each one of them. The specific bilateral relationships examined are China's relations with Angola, Brazil, Republic of the Congo, Iran, Iraq, Kazakhstan, Kuwait, Oman, Russia, Saudi Arabia, South Sudan, Sudan, United Arab Emirates, and

Venezuela. These countries matter because their crude petroleum and petroleum gas product exports account for over 50 percent of China's annual oil consumption.

Rethinking Post-Cold War Russian-Latin American Relations Vladimir Rouvinski, Victor Jeifets, 2022-06-07 Today, there is plenty of evidence that Russia has become a prominent external actor in Latin America and the Caribbean. Yet, few books have attempted to better understand the reasons behind Russia's return and Moscow's continuous engagement in the region. In order to fill the gap, this volume offers the first interdisciplinary study of Russian-Latin American relations after the end of the Cold War. Across 16 chapters, leading experts from Russia, Europe, the United States, and Latin America collectively re-examine the Soviet legacy to reveal the conditions in which Russia operates today and identify the key trends of contemporary Russian relations with this part of the world. The book then moves on to provide a detailed case study analysis of Russia's bilateral relations with Venezuela, Cuba, Mexico, Brazil, Argentina, and Colombia, identifying the most critical dimensions of Russian engagement. *Rethinking Post Cold-War Russian-Latin American Relations* allows readers to identify the fundamental driving forces of Russia's renewed commitment to the area, its strategies and experiences. The book will be of interest to readers of international relations and area studies, historians of modern Latin America, migration studies, political economy, and any political scientists interested in Russian decision-making.

Helicopters in Irregular Warfare: Algeria, Vietnam, and Afghanistan [Illustrated Edition] Major Beau G. Rollie, 2014-08-15 Includes 3 maps and more than 10 illustrations The preponderance of conflicts fought over the last seventy years have included or been centered on irregular warfare and counter-insurgency. Indeed, the helicopter's first significant trials in combat took place during the Algerian War 1954-1962, the Vietnam War 1955-1975, and the Soviet-Afghan War 1979-1989. During these wars, French, U.S., and Soviet militaries used significant numbers of helicopters to fight insurgents and guerrillas, and each country lost their respective conflict. As conventional organizations, these militaries used helicopters to seek military dominance, often blind to or in spite of politico-strategic goals like legitimacy. The helicopter's firepower and mobility tactically decimated insurgents, but the nature of irregular warfare rendered tactical dominance indecisive. Helicopters were indecisive or bad at enabling legitimacy, population control, and isolation, key tenets of successful COIN. Convinced that helicopter enabled military dominance could win, the French, U.S., and Soviet militaries were unable to balance the pursuit of military and politically objectives. Airmobility distracted leaders from focusing on the political aspects of counter-insurgency.

Su-25 'Frogfoot' Units In Combat Alexander Mladenov, 2015-04-20 This volume details the technical features and operational performance of the Soviet Su-25 'Frogfoot', which proved itself as a durable and versatile attack aircraft in a variety of theatres such as Afghanistan, Georgia and Ossetia. Today it is widely accepted as the true successor to the types of specialised ground-attack aircraft that emerged during World War II. This book illuminates the service history of the 'Frogfoot' in over 30 years of combat using first-hand accounts and revealing archive photographs. The awkward-looking Su-25 has often been underrated, but the faithful 'Frogfoot' is now slated to remain in service with most of its current operators across the globe until at least 2020. This study explores the successes of the 'Frogfoot' in full, demonstrating its strengths as a formidably armed, armoured and very agile attack aircraft.

Applications of Systems Thinking and Soft Operations Research in Managing Complexity Anthony J. Masys, 2015-09-14 This book captures current trends and developments in the field of systems thinking and soft operations research which can be applied to solve today's problems of dynamic complexity and interdependency. Such 'wicked problems' and messes are seemingly intractable problems characterized as value-laden, ambiguous, and unstable, that resist being tamed by classical problem solving. Actions and interventions associated with this complex problem space can have highly unpredictable and unintended consequences. Examples of such complex problems include health care reform, global climate change, transnational serious and organized crime, terrorism, homeland security, human security, disaster management, and humanitarian aid. Moving towards the development of solutions to these complex problem spaces depends on the lens we use to examine them and how we frame the problem. It will be shown that systems thinking and soft operations research has had great success in contributing to the management of complexity.

The New China-Russia Alignment Richard Weitz, 2022-09-13 This volume identifies the main drivers of the current Sino-Russian relationship, assesses whether-and under what conditions-China and Russia would cooperate more extensively and effectively against American interests, and recommends U.S. policies that could prevent such an outcome. Most experts argue that economic interdependence, nuclear weapons, and the U.S. contribution to maintaining the global commons mean that China and Russia will generally accept U.S. military superiority and U.S. political supremacy in managing global affairs. An agreement between these two powerful countries to work against the United States, however, would greatly increase its vulnerabilities. Relations between the governments of China and Russia with the U.S. have worsened in past years. Identifying the various pathways, events, and political, economic, and military drivers that could shape the dynamics of the China-Russia relationship is of critical importance to U.S. security. This book examines the sources, nuances, and manifestations of the ongoing Sino-Russian relationship in order to recommend strategy and policy that could work to U.S. advantage. Written by an author who traveled extensively in both countries in order to conduct research and expert interviews for the work, the book covers the latest developments to include the major changes in Chinese foreign policy under President Xi Jinping and ongoing relations with Russian president Vladimir Putin.

Afghan Air Wars Michael Napier, 2023-09-28 Michael Napier details the critical role of air power in the skies over Afghanistan, from the ten-year occupation by the USSR in the 1980s through to the US and NATO campaign from 2001 to 2021. US and British forces, strongly supported by air power, invaded Afghanistan in late 2001 in response to the Al Qaida attacks on 9/11. What began as a small-scale operation of 2,500 troops with the limited objective of destroying Al Qaida became ever larger, growing to over 100,000 troops ten years later. This experience matched that of the Soviets after their invasion in late 1979, when they saw a massive increase in resistance by Mujahidin. *Afghan Air Wars* details how Soviet aircraft including the MiG-21, MiG-23, Su-17 and Su-25, as well as Mi-8 and Mi-24 helicopters supported Soviet offensives in the Panjshir Valley and other regions. Despite these high-octane operations and overwhelming air superiority, Soviet forces eventually withdrew. Some 20 years later, US and NATO air forces were deployed in similar roles. F-15E, F-16, F/A-18, A-10, Mirage, Harrier and Tornado aircraft all saw action in the skies over Afghanistan as did the CH-47 Chinook and AH-64 Apache helicopters. Mike Napier fully details their series of operations in a hostile environment as well as

the advent of high-resolution targeting pods and Precision Guided Munitions (PGM) which enabled aircraft to stand off from threat areas and also to deploy their weapons with deadly accuracy. The conflict also saw the groundbreaking introduction of Remotely Piloted Vehicles (RPV) into routine air operations. *Afghan Air Wars* is richly illustrated with over 240 images – both official photos and privately taken, in-theatre images which have not been previously published. It also includes first-hand accounts by aircrews involved to create a unique and comprehensive picture of the part played by air power over Afghanistan in the last 40 years.

Dangerous Flashpoints in East Asia: The Military Build-up Saghir Iqbal, 2018-01-16 Major changes in East Asia have placed the region near the top of the World's strategic agenda. East Asia has until recently experienced the fastest regional economic growth rate in the world for many years. Economic co-operation has been flourishing and economic interests have become the major reason in reshaping East Asian international relations. However, there have also been changes in the security environment, due to many factors, such as the reduction of US forces in East Asia, the disintegration of the Soviet Union (the decline of the Soviet Union's presence in the region had led to renewed attention to traditional and potential rivalries among the major East Asian powers), and the concern of China's hegemonistic ambitions.

Not by Bread Alone Robert Nalbandov, 2016-01-01 Since its independence in 1991, Russia has struggled with the growing pains of defining its role in international politics. After Vladimir Putin ascended to power in 2000, the country undertook grandiose foreign policy projects in an attempt to delineate its place among the world's superpowers. With this in mind, Robert Nalbandov examines the milestones of Russia's international relations since the turn of the twenty-first century. He focuses on the specific goals, engagement practices, and tools used by Putin's administration to promote Russia's vital national and strategic interests in specific geographic locations. His findings illuminate Putin's foreign policy objective of reinstituting Russian global strategic dominance. Nalbandov argues that identity-based politics have dominated Putin's tenure and that Russia's east/west split is reflected in Asian-European politics. Nalbandov's analysis shows that unchecked domestic power, an almost exclusive application of hard power, and determined ambition for unabridged global influence and a defined place as a world superpower are the keys to Putin's Russia.
