Axis Midget Submarines Jamie Prenatt, Mark Stille, 2014-06-17

Axis Midget Submarines details the history, weapons, and operations of German, Japanese, and Italian midget submarines during World War II. Over this period, Germany, Japan, and Italy built approximately 2,000 small, inherently stealthy, naval craft to perform special operations and conventional navy missions. Much more numerous and more technically advanced than their Allied counterparts, they saw service worldwide, operating in the Pacific, Mediterranean, Black Sea, Indian Ocean, North Sea, and the English Channel. Manned by courageous crews, these vessels made daring attacks on Allied ships in heavily protected anchorages using torpedoes and mines. Most notable were attacks against Gibraltar - launched from an Italian cargo vessel interred in nearby neutral Spain that had been converted into a clandestine support base and equipped with an underwater hatch - and Pearl Harbor. They were used against shipping in coastal waters and, near the end of the war, in desperate attempts to offset their opponents' overwhelming naval superiority during the US advance across the Pacific and the Allied amphibious landings in France and Italy. In this book, the term midget submarine includes submarines of less than 50 tons, equipped with two torpedoes and a crew of 1-4, and manned torpedoes, relatively short range torpedo-size craft with one or two operators and armed with either mines or one torpedo. It excludes vessels designed as suicide craft. It addresses operational vessels and prototypes, spanning 11 German, 4 Japanese, and 5 Italian classes. The most advanced types incorporated innovative design features and served as the basis for a number of post-war vessels. This book also briefly covers the larger vessels used to transport the midget submarines to their operational areas. Also included is an analysis of the effectiveness of these vessels, including an examination of their strengths and weaknesses. The success (or lack of success) will be discussed both in the context of the

individual vessel design and as a component of their respective nation's submarine force. They are also compared to similar Allied designs.

**A Very Rude Awakening** Peter Grose, 2007-05-01  
On the night of 31 May 1942, Sydney was doing what it does best: partying. The theatres, restaurants, dance halls, illegal gambling dens, clubs and brothels offered plenty of choice to roistering sailors, soldiers and airmen on leave in Australia's most glamorous city. The war seemed far away. Newspapers devoted more pages to horse racing than to Hitler. That Sunday night the party came to a shattering halt when three Japanese midget submarines crept into the harbour, past eight electronic indicator loops, past six patrolling Royal Australian Navy ships, and past an anti-submarine net stretched across the inner harbour entrance. Their arrival triggered a night of mayhem, courage, chaos and high farce which left 27 sailors dead and a city bewildered. The war, it seemed, was no longer confined to distant desert and jungle. It was right here at Australia's front door. Written at the pace of a thriller and based on new first person accounts and previously unpublished official documents, *A Very Rude Awakening* is a ground-breaking and myth-busting look at one of the most extraordinary stories ever told of Australia at war.

**X3 to X54** Keith Hall, 2023-09-07 The X- and XE-Class submarines were conceived during the Second World War: around 51ft (16m) long, they were designed to be towed by a 'mother' submarine and use their small size to complete stealth missions, such as attacking harbours and performing reconnaissance. Although they would not begin active service until 1942, the submarine crews achieved quite the record, racking up 167 honours between them, including four Victoria Crosses. Written by ex-submariner Keith Hall, X3 to X54 is a look at the entire life and evolution of the British midget submarine, from its early prototypes to its final journeys. With a wealth of imagery, including archive X-craft photographs as well as up-to-date views of the X51 (HMS Stickleback) from the Scottish Submarine Centre, this is the fascinating, yet little-known, story of Britain's midget submarines.

**The Lost Submarines of Pearl Harbor** James P.

Delgado, Terry Kerby, Stephen Price, Maximilian D. Cremer, Hans K. Van Tilburg, Ole Varmer, Russell Matthews, 2016-11-16 In the

pre-dawn darkness of December 7, 1941, five Imperial Japanese Navy submarines surfaced off the coast of Oahu. Secured to the decks of these vessels were secret weapons to be deployed for the first time in modern warfare: two-man midget submarines, intended to enter Pearl Harbor without being detected and torpedo the US Navy battleships lying at anchor there. None of them would return from their mission. "One of the last remaining and persistent mysteries of the Pearl Harbor attack is that of the Japanese Midget Submarines. It is a fascinating story of innovation, courage, secrets, and failed expectations. And it is not only a story of the morning hours of December 7, but of the years before to develop these weapons and the years after, where they were deployed in the great Pacific War and how they fared as weapons of war." These words by Daniel J. Basta, from the foreword of this work, capture both the essence and the impact of *The Lost Submarines of Pearl Harbor*. James P. Delgado and his coauthors have worked on the story of these incredible craft for decades. They combed the records of the US Navy and the recollections of its veterans as well as Japanese, Australian, and British archives in order to uncover the truth. They have logged hours of direct observation and research on the midget subs in their final resting places, in some cases more than 1,000 feet below the surface of the Pacific. And in the end, they have woven a tapestry of scholarship, historical sleuthing, scientific insight, and good storytelling that will enthrall specialists and history enthusiasts alike.

**Underwater Warriors** Paul Kemp, 1996 Enter the fascinating and elite world of secret naval units--the frogmen and commandos who waged war with midget submarines and human torpedoes. These subs, which came to prominence during World War Two, were potent weapons, better able than any other craft to penetrate deep into enemy waters and close in on unsuspecting

targets. Here is their history, including the derivatives (like small submersibles), operational details, brave underwater warriors who manned them, daring attacks, and future role. **Tirpitz in Norway** Angus Konstam, 2019-11-28 In September 1943, under the cover of darkness, six British midget submarines crept into the heart of enemy territory, penetrating a heavily guarded Norwegian fjord in an attempt to eliminate the threat of the powerful German battleship, the Tirpitz. Numerous previous attempts to attack the ship from both air and sea had failed, and this mission was carefully strategized, and undertaken by skilled operatives who had undergone extensive training in an isolated sea loch. Though five of the six X-Craft submarines were either lost or captured, two crews had just enough time to lay their explosive charges, which detonated after they were forced to the surface, putting the Tirpitz out of action for a crucial six-month period. Masterminded from a top-secret naval headquarters on the east coast of Scotland, Operation Source has been memorialised as one of the most daring naval raids of World War II. This new study tells the complete story of this epic operation in unparalleled detail, supported by full-colour illustrations and contemporary photography.

**Weapons of Desperation** Lawrence Paterson, 2018-03-30 As the Third Reich headed for destruction, German ingenuity in the naval field turned to unconventional weapons - midget submarines, radio-controlled explosive boats, and various forms of underwater sabotage. This is one of the last un-chronicled

areas of World War II naval history and this well-known author describes how, facing overwhelming odds, German sailors – most of them volunteers – mounted attacks that were little better than suicide missions. Judged by their effect on the Allied advance, their successes were slight, but there seems to have been no collapse of morale and the indomitable bravery of those involved makes riveting reading. Pieced together from fragmentary sources, this largely untold story uncovers some of the most desperate operations of the War.

**Above Us the Waves** Charles Esme Thornton Warren, James Benson, 1953

**By Sea and By Stealth** Burke Wilkinson, 2017-06-28 One night in December 1941 a young Italian sat shivering on a buoy in Alexandria Harbour. Four hours later two British battleships blew up and settled on the muddy bottom. Luigi De La Penne had successfully completed one of the most fantastic surprise attacks of the war. This and many other extraordinary attacks showed great resourcefulness, courage and daring. The cost in lives and material was small, the stakes dazzlingly high. First published in 1957, this book from American novelist Burke Wilkinson tells of some of the most striking and brilliant surprise attacks made by sea during the war. The individual exploits carry their own compulsion as tales of great courage and daring always do, but more than that they show the valuable lessons to be learned and the future hazards we must face from these bold and venturesome tactics.
