Mikoyan Gurevich MiG-15 Dariusz Karnas,2014-03-06 1/48 and 1/32 scale plans of following aircraft: MiG-15 MiG-15bis UTI MiG-15 all Polish Variants

Mikoyan-Gurevitch MIG 15 & 17 Gérard Paloque,2014 At the beginning of the Korean War, the west discovered the MiG-15, the first mass-produced jet fighter built in the Soviet Union. This small device entered service at the end of 1950 in its improved version, the MiG-15bis, and in turn was quickly deployed to Korea where, with its powerful armament and handling, it was an unpleasant surprise for the forces of the United Nations, after finding their air superiority with the arrival of the latest version of the famous F-86 Sabre. While the bundle - a nickname given by NATO to the MiG-15 - was barely in use, MiG conceived its successor, the more efficient and wing modified MiG-17 (Fresco). The type was withdrawn from service in the USSR in the late sixties, however it had great success abroad. The Fresco was the most exported Soviet fighter until the arrival of its indirect successor, MiG-21 (see Planes & Pilots No. 12).

Soviet MiG-15 Aces of the Korean War Leonid Krylov,Yuriy Tepsurkaev,2012-12-20 The Soviet Union began assisting the People's Republic of China in its establishment of a modern air force in 1950, when Soviet Air Force regiments were sent to train local pilots. China's involvement in the Korean War in late October 1950 inevitably drew Soviet pilots into the war, with a total of 52 Soviet pilots scoring five or more victories there. The history of these covert actions has been a long-buried secret and this book is the first English publication to detail the only instance when the Cold War became 'hot'. This book uncovers Soviet combat experiences during the Korean War from detailed unit histories and rare first-hand account. With access to extensive Russian archives, the authors offer an enthralling insight into an air war that has been largely covered up and neglected. Illustrated with previously unpublished photographs and detailed full colour profiles, this book is a unique opportunity to read about an often-forgotten aspect of the Cold War.

F-86 Sabre vs MiG-15 Douglas C. Dildy,Warren Thompson,2013-05-20 As the routed North Korean People's Army (NKPA) withdrew into the mountainous reaches of their country and the People's Republic of China (PRC) funneled in its massive infantry formations in preparation for a momentous counter-offensive, both lacked adequate air power to challenge US and UN. Reluctantly, Josef Stalin agreed to provide the requisite air cover, introducing the superior swept-wing MiG-15 to counter the American's straight-wing F-80 jets. This in turn prompted the USAF to deploy its very best – the F-86A Sabre – to counter this threat. Thus began a two-and-a-half-year struggle in the skies known as “MiG Alley.” In this period, the unrelenting campaign for aerial superiority witnessed the introduction of successive models of these two revolutionary jets into combat. This meticulously researched study not only provides technical descriptions of the two types and their improved variants, complete with a “fighter pilot's assessment” of these aircraft, but also chronicles the entire scope of their aerial duel in “MiG Alley” by employing the recollections of the surviving combatants – including Russian, Chinese, and North Korean pilots – who participated.

Canadian MiG Flights Harold Skaarup,2008-05 This book is a collection of there I was stories highlighting the experiences of Canadian Forces pilots who have had the opportunity of a lifetime to fly in the combat aircraft operated by former adversaries. Technical descriptions of key Soviet-built fighter jets such as the MiG-15, MiG-21, MiG-23, MiG-25, MiG-29, Sukhoi Su-22 and Su-27 are included for general reference. The Canadian Fighter pilots mentioned in the story have generously provided their observations and comments on their specific experiences of flight in aircraft such as the MiG-29 (NATO codenamed Fulcrum), Sukhoi Su-22 (codenamed Fitter) and Su-27 (codenamed Flanker), both in Canada and overseas. The stories as told first hand by the pilots who contributed them should provide interesting reading for aviation enthusiasts of all ages. An Annex listing aircraft known to have been brought to the West by defecting pilots since 1949 is also included. The Annex briefly describes pilots and aircraft and the circumstances that brought the various defectors to the west, including the MiG-15 flown to South Korea by Lieutenant No Kum-Sok and the MiG-25 flown to Japan by Lieutenant Viktor Belenko. Brief details of Soviet-built aircraft later flown in NATO opposition force flight test programs are also included.

Soviet Cold War Fighters Alexander Mladenov,2017-04-20 Beautifully illustrated with many rare and unpublished photographs, Soviet Cold War Fighters looks at the main development periods of Soviet fighter designs and covers all the important features and developments for each - a total of four generations of fighter were developed from the late 1940s to the early 1980s - that witnessed the most iconic and powerful fighters such as the legendary MiG-15, MiG-21, Tu-128, Su-9, MiG-23, MiG-25 reach for the skies, followed by the modern day MiG-29, MiG-31 and Su-27, which strike fear in the West for their phenomenal weaponry and blistering performance. All aircraft are described in detail with facts and figures, including their weapons and instances of combat employment, as well as explaining how the Cold War drastically changed Soviet fighter design to counter the West. Researched and written by Alexander Mladenov, a leading aviation journalist, this is a highly detailed testament to leading Soviet fighter design and development.

Mr. Mig Paul T. Entrekin,2012-07-11 As indicated by the subtitle, “The Real Story of the First MiGs in America”, this is a collection of stories that offer, for the first time, a concise depiction of many first-hand accounts of how these jets were acquired. In addition to historical facts and figures dating to the inception of the Russian Mikoyan-Gurevich design bureau, substantial effort has been taken to expose myths and bring to light facts that are significant and important regarding how, where, when and why the MiG aircraft were obtained and who obtained them. In addition to the history of the MiG jet's inception, the modern day stories of the people in America that acquired them are no less intriguing. As a bonus, you'll learn of the experiences of the first person to own and operate a MiG in the United States and the free world including a peek into the arena of airshow flying.

RAF & East German Fast-Jet Pilots in the Cold War Nigel Walpole,2020-11-23 “You'll learn what these pilots went through knowing that their actions or reactions could trigger a global nuclear war.” —Historic Aviation RAF and East German Fast-Jet Pilots in the Cold War is the result of ten years of research, involving many visits to the former German Democratic Republic by a small Anglo/German team of military specialists. Their purpose was to explore the lives of RAF and East German fighter and fighter-bomber pilots, in the air and on the ground, at work and play, during the Cold War in North Germany. The book is based largely on personal testimony from these pilots, coupled with facts drawn from official archives and comment from other historical sources. Where possible, political considerations have been avoided and no outright criticism has been intended, readers being left to draw their own conclusions on the thinking, strategies, equipment and tactics discussed. Far from being an intellectual polemic on the Cold War, the text and photographs merely record a slice of history as seen through the eyes of a select few who took up arms in the defense of their respective homelands—and faced each other daily across the Iron Curtain. In an insightful conclusion, Nigel Walpole reassess the threat that both sides believed was genuine during those tense decades of the Cold War and examines the possible course and nature of a conflict which neither NATO nor the Warsaw Pact wanted but both actively planned for. “The writer has avoided politics where possible, and in doing so reassesses the threat and uncertainty—and ultimately the fears—both air forces faced. It's truly fascinatingl.” —Flypast

A MiG-15 to Freedom No Kum-Sok,J. Roger Osterholm,2007-04-25 On September 21, 1953, U.S. airmen at Kimpo Air Base near Seoul, Korea, were startled to see landing a MiG-15, the most advanced Soviet-built fighter plane of the era, piloted by Senior Lieutenant No Kum-Sok, a 21-year-old North Korean Air Force officer. Once he landed, Lieutenant No found that his mother had escaped to the South two years earlier, and they were soon reunited. At his request, No came to the United States and became a U.S. citizen. His story provides a unique insight into how North Korea conducted the Korean War and how he

came to the decision to leave his homeland.

Wings over Vietnam John Davis,

Swift Justice Nigel Walpole,2004-01-16 The Supermarine Swift was rushed into service with the RAF during 1954 to become Britain's first second-generation jet fighter. In this role it was not deemed a success and has been burdened with a bad reputation since that time. It was eventually replaced by the famous Hawker Hunter that had been extensively delayed because of teething troubles. This book covers the development and operational history of a vital aircraft that is a part of aviation legend.

F-86A Sabre Peter E. Davies,2022-08-18 Strap in alongside the Sabre pilots as they experienced the world's first large-scale jet-vs-jet combats. Brought to life with innovative tactical artwork and dramatic first-hand accounts from the pilots themselves. The F-86A Sabre had entered USAF service in 1949, and in December 1950 three squadrons were sent to South Korea. Despite primitive basing conditions and overwhelming Chinese opposition, the Sabre pilots stopped communist air forces from attacking UN ground troops and allowed Allied fighter-bombers to operate without threat of interception. The ensuing air battles between Sabres and MiG-15s were the first since World War II, and the last in recent times to involve large numbers of jet fighters in direct confrontation. In all of them the victorious F-86 pilots demonstrated the superiority of their training and tactics and the outstanding qualities of their Sabres. Contemporary photographs and specially commissioned artwork, including a dramatic battlescene, armament views, technical diagrams and ribbon diagrams illustrating step-by-step each main dogfight explored in the book, bring the experiences of the Sabre pilots and their battle tactics vividly to life.

Smell the Gunpowder William R. Graser,2022-10-25 Smell the Gunpowder: The Land of the Morning Calm is inspired by true events and veterans' firsthand accounts of Americans who served in Korea. Because of these veterans, the Republic of Korea remains a free sovereign nation and one of the strongest and wealthiest countries in Asia. Today, North Korea continues to have a nuclear arsenal and is one of the most militarized countries in the world—creating a critical security challenge. Concerns about North Korea and its intentions remain at the highest level since the end of the 1950s and 1960s Korean Conflicts. South Korea has urged the United States and North Korea to formally reach a peace agreement ending the decades-long conflict. The outcome of a peace agreement is uncertain, and Smell the Gunpowder makes no pretense of providing the complete account of the undeclared, unconventional struggles that have gripped Korea since 1945, although it may serve to refocus attention on a most intriguing chapter in the annals of American and Korean history.

MIG Menace Over Korea Yuri Sutiagin,Igor Seidov,2011-02-23 This fascinating biography of a Russian flying ace offers a rare glimpse into the role of the Soviet Air Force during the Korean War. Nikolai Vasil'evich Sutiagin was the top-scoring Soviet flying ace of the Korean War. He flew his MiG-15 in lethal dogfights against American Sabres and Australian Meteors, winning twenty-two victories. For his distinguished service, he was named a Hero of the Soviet Union, the Soviet military's highest honor. Now, with the opening of the Russian archives, this authoritative biography presents a full account of Sutiagin's life and career. Beyond these official records, the authors draw from the reminiscences of Sutiagin's comrades and his wife's personal diary to present a nuanced and vividly detailed portrait of one of Russia's greatest fighter pilots.

Red Devils over the Yalu Igor Seidov,Stuart Britton,2014-03-19 The Korean War (1950-1953) was the first - and only - full-scale air war in the jet age. It was in the skies of North Korea where Soviet and American pilots came together in fierce aerial clashes. The best pilots of the opposing systems, the most powerful air forces, and the most up-to-date aircraft in the world in this period of history came together in pitched air battles. The analysis of the air war showed that the powerful United States Air Force and its allies were unable to achieve complete superiority in the air and were unable to fulfill all the tasks they'd been given. Soviet pilots and Soviet jet fighters, which were in no way inferior to their opponents and in certain respects were even superior to them, was the reason for this. The combat experience and new tactical aerial combat tactics, which were tested for the first time in the skies of Korea, have been eagerly studied and applied by modern air forces around the world today. This book fully discusses the Soviet participation in the Korean War and presents a view of this war from the opposite side, which is still not well known in the West from the multitude of publications by Western historians. The reason for this, of course, is the fact that Soviet records pertaining to the Korean War were for a long time highly classified, since Soviet air units were fighting in the skies of North Korea incognito, so to speak or even more so to write about this was strictly forbidden in the Soviet Union right up to its ultimate collapse. The given work is in essence the first major work in the post-Soviet era. First published in a small edition in Russian in 1998, it was republished in Russia in 2007. For the first time, the Western reader can become acquainted with the most detailed and informative work existing on the course of the air war from the Soviet side, now in English language. The work rests primarily on the recollections of veterans of this war on the so-called 'Red' side - Soviet fighter pilots, who took direct part in this war on the side of North Korea. Their stories have been supplemented with an enormous amount of archival documents, as well as the work of Western historians. The author presents a literal day-by-day chronicle of the aerial combats and combat work of Soviet fighter regiments in the period between 1950 and 1953, and dedicates this work to all the men on both sides who fought and died in the Korean air war.

The Naval Air War in Korea Richard Hallion,2011-03-25 The historiography of Korea's aerial war.

The Last War of the Superfortresses Leonid Krylov,Yuriy Tepsurkaev,Илья Устинов Tepsurkaev,2016 This work is an attempt by the authors to give as full and detailed a history as possible of the confrontation between Soviet fighters and the principal strike force of the United States Far East Air Force - the B-29 'Superfortress' bombers during the course of the Korean War between 1950-1953. Military documents, which the authors have studied over many years of work in the Central Archive of the Ministry of Defense of the Russian Federation in Podolsk - as well as published Western sources - form the basis of this book. The recollections of pilots who served in the 64th Fighter Air Corps, and who participated personally in the events described, are also widely used. Almost all the battles that took place between Soviet fighters and the 'Superfortresses' are analyzed in detail; the authors have, on the basis of a comparison of Soviet archive documents and data from published Western sources, attempted to clarify the actual losses on both sides in these battles. Particular attention has been paid to key events in the history of the confrontation between the MiG-15 and B-29 such as the air battles of April and October 1951, which had a significant impact on the course of the Korean War and influenced the development of military aviation in both the USSR and the USA. Following the encounters on the approaches to the bridges at Andung of 12 April 1951 Strategic Air Command decided against using 'Superfortresses' close to the area around the MiG bases. The outcome of a series of air battles from 22 to 27 October 1951 - the most famous of which was the battle between MiGs and B-29s in the area close to the airfield at Namsi on 23 October ('Black Tuesday') was a ban by Strategic Air Command on daylight operations by 'Superfortresses' in the Soviet

fighter's zone of operation. These battles also influenced the technical policy of the United States Air Force in relation to strategic bombers. Extensive losses in combat with the MiGs served as one of the most influential arguments for curtailing the piston engine B-36 and B-50 bomber programs and boosting development of one of the most famous aircraft in the history of global aviation - the B-52 'Stratofortress'. Night operations, to which the B-29s and subsequently Soviet fighters were transferred, are also analyzed in detail in this book. These nocturnal operations culminated in the air battles of December 1952 and January 1953. After sustaining losses in these battles that were comparable to those of October 1951 the 'Superfortresses' would subsequently only carry out nocturnal sorties to the MiGs' zone of operation in poor weather conditions. In this work, the authors have analyzed the advantages and the disadvantages of the La-11 and the MiG-15bis - the principal fighters of the 64th Fighter Air Corps - from the point of view of their ability to intercept the B-29s. Attention has been paid to the tactics of the opposing sides, and to how these changed over the course of the war. The technical aspects of the confrontation between Soviet fighters and 'Superfortresses' have been examined, and the reasons behind the different periods of success or failure in terms of performance in combat have been identified. A great deal of statistical material has been provided in this book, which characterizes combat operations carried out by the B-29s and the fighters of the 64th Fighter Air Corps, both within the text itself and in the form of easy-to-use tables. The book is illustrated with photographs obtained both from the personal archives of veterans of the 64th Fighter Air Corps; from the Central Archive of the Ministry of Defense of the Russian Federation; and US National Archives. Color profiles showing camouflage & markings are also included.

Czechoslovak Arms Exports to the Middle East Martin Smisek,2023-07-21 Revolución Libertadora or the Liberating Revolution is the name by which the military dictatorship that ruled Argentina is known after overthrowing the constitutional president, Juan Domingo Perón, closing the National Congress, deposing the members of the Supreme Court, the provincial and municipal authorities and university and commissioning the entire Judicial Power through a coup that began on September 16 1955 and that, after more than two years, transferred the government to President-elect Arturo Frondizi, on May 1 1958, who would be overthrown in 1962. The preparations for the coup of September 1955 were intense and very careful, since the plotters did not want to repeat the mistakes made in the events of June. For this coup, the collaboration of several important army units was finally obtained, in addition to the Navy and the Air Force. Revolución Libertadora Volume 2 details the warlike actions of both sides day by day, along with the eventual resignation, exile and return of President Perón. The text is supported by an extensive number of rare images, tables and specially-commissioned colour artwork.
