*Foxbat Tales* Mike Guardia,2021-12-15 From the Middle East to the Iron Curtain?the definitive combat history of the Mikoyan-Gurevich MiG-25.July 1967: At the Moscow Air Show, the Soviets unveiled six new state-of-the-art aircraft. From among this lineup of new fighters and interceptors stood the Mikoyan-Gurevich MiG-25-purportedly capable of outrunning and outmaneuvering any aircraft in NATO's inventory.Yet even before its public appearance in Moscow, the MiG-25 had been a grave concern for Western analysts. Indeed, this new interceptor could fly at speeds in excess of Mach 3 and cruise at altitudes heretofore deemed unreachable for a tactical fighter. Moreover, NATO's intelligence community was baffled by how the Soviet Union had cobbled together such a masterpiece of modern engineering.The reality, however, was that this interceptor was a poorly-designed airframe with an oversized motor. Although it excelled as a reconnaissance aircraft, it fared poorly as a dogfighter - and it was typically the loser when pitted against Western aircraft like the F-14 Tomcat and F-15 Eagle.From the Sinai Peninsula?to the Soviet-Afghan War?to Operation Desert Storm, *Foxbat Tales* is the definitive operational and combat history of the MiG-25.

**Mig-25** Cees Van Groningen,2014 In June 1965, in the heat of the cold war, a Russian plane in the West enters the airspace of the State of Texas in the United States. At this incident, in which the Russian with his plane crashes, is Justus Vora. The CIA is trying to cover up the accident and challenges Vora. Vora, along with a friendly journalist, seeks the truth and wants to denounce the misdeeds of the CIA. This is a report of a bizarre and mysterious incident.

Mikoyan MiG-25 Foxbat Yefim Gordon,2007-08 This latest Red Star title examines the history, development, and operational career of the MiG-25 both with the air forces of the Soviet Union and in those countries to which the aircraft was exported.

*F-15C Eagle vs MiG-23/25* Douglas C. Dildy,Tom Cooper,2016-04-21 Designed following the relatively poor performance of America's multi-role fighters during the Vietnam War, the F-15 Eagle was conceived as a dedicated air superiority fighter. But, having trained for 15 years in the Eagle it wasn't Eastern Bloc operated MiGs that the F-15 eventually came up against, but pilots of Saddam Hussein's Iraqi airforce. This book analyses the combat between the American and Soviet 'Cold War fighters' in a balanced manner, examining how the technical abilities of the aircraft combined with the different levels of training available to opposing pilots and groundcrews allowed the F-15s to destroy the Iraqi offensive abilities within weeks of the First Gulf War starting. Packed with artwork, illustrations and photographs, this book places the reader in the cockpit during one of the last major dogfighting air wars in modern history.

*MiG-25 'Foxbat', MiG-31 'Foxhound'* E. Gordon,Yefim Gordon,1997 These volumes are packed with authoritative text, detailed photographs & drawings.

The book covers the complete history of that amazing aircraft that set a bunch of records in aviation. It comes with hundreds of photographs most of the in color, but with some rare B&W too that makes it a precious tool for the aviation enthusiast and also the modeler. The book also includes the conflicts that MiG-25 took place, and Victor Belenko's great defection in Japan that made the aircraft's secrets known to the West world.Plenty of schematics also exist in the book.A must have book in your aviation library

**Canadian MiG Flights** Harold Skaarup,2008-05 This book is a collection of there I was stories highlighting the experiences of Canadian Forces pilots who have had the opportunity of a lifetime to fly in the combat aircraft operated by former adversaries. Technical descriptions of key Soviet-built fighter jets such as the MiG-15, MiG-21, MiG-23, MiG-25, MiG-29, Sukhoi Su-22 and Su-27 are included for general reference. The Canadian Fighter pilots mentioned in the story have generously provided their observations and comments on their specific experiences of flight in aircraft such as the MiG-29 (NATO codenamed Fulcrum), Sukhoi Su-22 (codenamed Fitter) and Su-27 (codenamed Flanker), both in Canada and overseas. The stories as told first hand by the pilots who contributed them should provide interesting reading for aviation enthusiasts of all ages. An Annex listing aircraft known to have been brought to the West by defecting pilots since 1949 is also included. The Annex

briefly describes pilots and aircraft and the circumstances that brought the various defectors to the west, including the MiG-15 flown to South Korea by Lieutenant No Kum-Sok and the MiG-25 flown to Japan by Lieutenant Viktor Belenko. Brief details of Soviet-built aircraft later flown in NATO opposition force flight test programs are also included.

**Call-Sign KLUSO** Rick Tollini, 2021-04-01 A US Air Force Captain tells the story of his life and service during Operation Desert Storm in this thrilling military memoir. A pilot all his life, Rick "Kluso" Tollini turned his childhood dream into a reality when he became a fighter pilot for the US Air Force. In Call Sign KLUSO, Rick "Kluso" Tollini puts the fraught minutes above the Iraqi desert that made him an ace into the context of a full life; exploring how he came to be flying a F-15C in Desert Storm, and how that day became a pivotal moment in his life. He recounts his training, preparation, and missions, as well as the life of a fighter pilot in a combat zone. He also explores life as an air force veteran, and his turn to Buddhism as he comes to terms with his actions in combat. Rick's first experience of flying was in a Piper PA-18 over 1960s' California as a small boy, and his love of flying through his teenage years was fostered by his pilot father, eventually blossoming into a decision to join the Air Force as a pilot in his late twenties. Having trained to fly jets he was assigned to fly the F-15 Eagle with the "Dirty Dozen," the 12th Tactical Fighter Squadron, at Kadena AB, Japan, before returning Stateside to the 58th Tactical Fighter Squadron "The Gorillas." Throughout training, Reagan's fighter pilots expected to face the Soviet Union, but Rick's first combat deployment was Desert Storm.

*Soviet Spyplanes of the Cold War* Yefim Gordon, Dmitriy Komissarov, 2013-11-04 "A good look at the MiG-25 recce birds...Definitely recommended!"—Cybermodeler "Spy in the Sky" matters have long been a source of fascination for aircraft enthusiasts, historians, and modelers, and none more so than the elusive and secretive Soviet types of the Cold War era. Here, Yefim Gordon presents a range of such types, in a collection of photographs, profiles, and line drawings together with supplementary text detailing the history of each craft, encompassing the various developmental milestones, successes, and pitfalls experienced along the way. The Soviet Union's two dedicated spyplane types, the Yakovlev Yak-25RV "Mandrake" (the Soviet equivalent of the Lockheed U-2) and the MiG-25R "Foxbat" are profiled, supplemented by details garnered from a host of original sources. Well-illustrated histories and structural analyses are set alongside detailed descriptions of the various plastic scale model kits that have been released, along with commentary concerning their accuracy and available modifications and decals. With an unparalleled level of visual information—paint schemes, models, line drawings and photographs—it is simply the best reference for any model-maker setting out to build a variant of this iconic craft.

**Mikoyan MiG-31: Famous Russian Aircraft** Yefim Gordon, Dmitriy Komissarov, 2020 As early as 1965, when the MiG-25 interceptor was in the midst of its test program, the Mikoyan Design Bureau started work on an even more capable two-seat interceptor meant to provide adequate protection for the huge expanses of Siberia and the Soviet Far East. Though superficially resembling a MiG-25 with tandem cockpits, the aircraft was soon designated the MiG-31. Initially dubbed Super Foxbat in the West but soon renamed Foxhound, the MiG-31 first flew on 16 September 1975 and, after a five-year trials program, achieved initial operational capability in 1980. Full-scale deliveries began in 1982 to units covering the Moscow Air Defense Zone, the Arctic and the Far East. One of the effects was that the SR-71s now stayed away from the Soviet borders. Efforts to improve the Foxhound began right away. In-flight refueling capability was added in 1989 to overcome the problem of inadequate range. Next, the MiG-31B, featuring upgraded avionics and better weapons, entered production in 1990; existing MiG-31s were brought up to the new standard (except for IFR capability) as the MiG-31BS. The radically improved 'Generation 4+' MiG-31M featuring a new WCS and new R-37 ultra-long-range AAMs first flew in 1985 but never entered production because of funding shortages. Today, the MiG-31s remains one of modern Russia's key air defense assets, and new versions keep appearing. The book gives the complete development and service history of this remarkable aircraft and is richly illustrated with color photos and color artwork throughout.

**MiG Pilot** John Barron, 1980 An account of the defection of a Soviet pilot who escaped to the

West in Russia's most advanced secret fighter plane.

**MiG Pilot** John Barron, 1981

**Jet Fighters** Jim Winchester, 2011-12-15 Presents illustrations, historical notes, facts, and specifications for jet fighters, ranging from the earliest designs of the mid twentieth century to some of the most modern fighters in use today.

**The Defector** Chris Hadfield, 2023-10-10 From a New York Times bestselling author, astronaut, and fighter pilot comes a full-throttle, adrenaline-laced espionage page-turner (Jack Carr, New York Times bestselling author) and Cold War thriller perfect for fans of Top Gun and The Hunt for Red October. Israel, October 1973. As the Yom Kippur War flares into life, a state-of-the-art Soviet MiG fighter plane plummets to an unexpected landing. NASA Flight Controller and former US test pilot Kaz Zemeckis watches from the ground—unaware that its arrival will pull him into a high-stakes game of spies, lies, and secrets that hold the key to Cold War air and space supremacy. For within that plane is a Soviet pilot pleading to defect, offering a prize beyond value: the workings of the Soviets' mythical Foxbat MiG-25, the fastest, highest-flying fighter plane in the world. But trusting him is risky, and Kaz must tread a careful line. As Kaz accompanies the defector into the United States, to the military's most secret test site, he must hope that, with skill and cunning, the game plays out his way. Rich with insider detail and political intrigue drawn from real events, The Defector is a propulsive thriller from a growing master of the genre, filled with the nerve-shredding rush of aerial combat as it could only be told by one of the world's best fighter pilots. Wondering what to do until Top Gun 3 arrives? Don't worry, Hadfield's got it covered." —Rowland White "Brimming with detail and realism and full of pulse-pounding action." —Mark Greaney Hadfield's writing is superb. Fans of The Apollo Murders will seek out this one, but newcomers will also thoroughly enjoy it." —Booklist Praise for The Apollo Murders "A Cold War thriller packed with cosmic action." —New York Times "An exciting journey into an alternate past." —Andy Weir, author of The Martian "Propulsive . . . a space race thrill ride." —Newsweek "An intelligent and surprising nail-biter that Tom Clancy fans will relish." —Publishers Weekly (starred review)

**Mig-23 Mf** Krzysztof Barcz, Dariusz Warsaw, 2010-01-05 \* Includes free decals and masking foil \* Packed with color photos The Mikoyan-Gurevich MiG-23 is a swing-wing fighter aircraft, designed by the Mikoyan-Gurevich bureau in the Soviet Union. It is considered to belong to the Soviet Third Generation aircraft category along with similar-aged Russian-produced fighters such as the MiG-25 Foxbat. It was the first Soviet fighter with a look-down/shoot-down radar and beyond visual range missiles, and the first MiG production fighter plane to have intakes at the sides of the fuselage. Production started in 1970 and reached large numbers with over 5,000 aircraft built. Today the MiG-23 remains in limited service with various export customers. This album of detailed photographs is invaluable for the modeler or enthusiast alike. About the Series This is a classic series of highly illustrated books on the best machines of war, with several hundred photographs of each aircraft or vehicle. With close-up views of the key features of each machine, including its variations, markings and modifications, customizing and creating a model has never been easier. Includes extra features such as decals and masking foil.

**Mikoyan MiG-31** E. Gordon, Yefim Gordon, 2005 The MiG-31 Foxhound long-range interceptor flew in prototype form as the Ye-155MP in 1975 and entered production in 1979, with the first regiments becoming operational in 1982. It has also been sold to China, and it remains in service in significant numbers. Yefim Gordon, the doyen of Russian aviation writers, continues to amass an outstanding archive of previously unpublished materials. Though the MiG-31 was covered to some extent in the now out-of-print and sought-after Aerofax on the MiG-25 and -31, this new book will be close to a definitive work on this important aircraft and include an enormous amount of newly released and acquired information and a splendid array of unpublished photographs (including detailed walk-around shots) and drawings. The narrative of course includes detailed discussion of the background to the project, its development, versions, service, weaponry, and comparisons with its contemporaries such as the F-14 Tomcat. The aircraft is a favorite with enthusiasts and modelers, and the extensive coverage, both technical and operational, backed up by high-quality images and

drawings, will have wide appeal.

**Flight Craft 8: Mikoyan MiG-31** Yefim Gordon, Dmitriy Komissarov, 2011-10-30 The MiG-31 started life as an advanced derivative of the famous MiG-25P interceptor, becoming the first Soviet fourth-generation combat aircraft. First flown in 1975, it differed from its progenitor primarily in having a crew of two (pilot and weapons systems operator), a highly capable passive phased-array radar \_ a world first \_ and new R-33 long-range missiles as its primary armament. The maximum speed was an impressive Mach 2.82, the cruising speed being Mach 2.35. The type entered service in 1981; more than 500 copies were built between 1981 and 1994. The powerful radar and other avionics allowed the MiG-31 to operate as a 'mini-AWACS' scanning the airspace and guiding other interceptors to their targets; a flight of three such aircraft in line abreast formation could cover a strip 800 km (500 miles) wide. To this day the MiG-31 remains one of the key air defence assets of the Russian Air Force. The book describes the MiG-31's developmental history, including upgrade programmes, and features a full and comprehensive survey of the various MiG-31 model-making kits currently available on the market.

**Soviet Cold War Fighters** Alexander Mladenov, 2017-04-20 Beautifully illustrated with many rare and unpublished photographs, Soviet Cold War Fighters looks at the main development periods of Soviet fighter designs and covers all the important features and developments for each - a total of four generations of fighter were developed from the late 1940s to the early 1980s - that witnessed the most iconic and powerful fighters such as the legendary MiG-15, MiG-21, Tu-128, Su-9, MiG-23, MiG-25 reach for the skies, followed by the modern day MiG-29, MiG-31 and Su-27, which strike fear in the West for their phenomenal weaponry and blistering performance. All aircraft are described in detail with facts and figures, including their weapons and instances of combat employment, as well as explaining how the Cold War drastically changed Soviet fighter design to counter the West. Researched and written by Alexander Mladenov, a leading aviation journalist, this is a highly detailed testament to leading Soviet fighter design and development.
