

Mikoyan Gurevich Mig 3

Dariusz Paduch

The Mikoyan-Gurevich Mig-3 Vol. I Dariusz Paduch, 2022-01-31 The MiG-3 fighter plane, like the history of the creation of the Mikoyan and Gurevich (Микоян и Гуревич) design bureau, is relatively well known to anyone interested in the history of Soviet aviation. Many books and articles have been published about this machine, but information about the circumstances of the birth of the project and the conditions of its creation are very brief and concise. MiG-1 and MiG-3 were the most numerous new generation fighters in Soviet aviation at the time of the German invasion of the USSR. They played a very important role in the first period of the war. Until now, it has been assumed in the literature that this applies mainly to the use of these aircraft during the battle of Moscow, as well as capital's and Leningrad's air defense, but MiGs also took on a large weight of air combat at the front in 1941.

The Mikoyan-Gurevich Mig-3 Vol. II Dariusz Paduch, 2022-04-30 The I-200 fighter project was a compromise between design office's capabilities, realities of the Soviet aviation industry, with its available technologies, and military requirements. According to the brief description of the MiG-3 from 1941, it was, in terms of its purpose, an interceptor, but, interestingly, it could also be used as... an attack aircraft, or a light, fast dive bomber. Both the I-200 prototypes and the later MiG-1 and MiG-3 were single-seat, single-engine, mixed-design low-wing aircraft. Front part of the fuselage, together with the center wing, up to the rear wall of the pilot's cockpit, was made of metal. Only the tail part of the fuselage and wing consoles were wooden. Vertical stabilizer, which was an integral part of the fuselage, was made of wood, too, but horizontal stabilizer was all-metal. Rudders and ailerons had a metal construction and canvas cover. Undercarriage was made of chromansil steel. In front part of the fuselage there was a pilot's cabin with a seat, instrument panel and controls, front fuel tank, main offensive armament, water cooler and other components. Center wing was attached to the front part of the fuselage at seven points, the rear part at four points, while the engine mount was supported by two.

The Mikoyan-Gurevich MiG-1 & MiG-3 In Profile & Scale Erik Pilawskii, 2021-05-02

MiG-3 Aces of World War 2 Dmitriy Khazanov, 2013-05-20 The MiG-1/3 family of fighters was built to satisfy a Soviet Air Force requirement for an advanced, fast, high-altitude fighter. Entering service in the spring of 1941, the problematic MiG-1 had its handling issues rectified with the hasty production of the MiG-3. Many of these were destroyed on the ground when the Germans launched Operation Barbarossa. Nevertheless, enough examples survived to allow pilots such as Stepan Suprun and Aleksandr Pokryshkin to claim a number of victories in the type. This book tells the complete story of the men who made ace in the first examples of the famous MiG fighter.

Mikoyan - Gurevich Massimo Tessitori, 2006-04 En illustreret beretning om udviklinge, produktion og operationer med det russiske fly Mikoyan gurevich MiG-1/MiG-3. Flyene var usædvanlige på grund af den meget store motorkraft i forhold til den slanke og lette fly, som i begyndelsen havde en del vanskeligheder og var svært at flyve.

Mikoyan-Gurevich MiG-21 Alexander Mladenov,2014-06-20 The MiG-21 (NATO reporting name Fishbed) firmly holds the title of the world's most widely built and used jet fighter, with more than 10,000 units rolling off the lines of three plants in the former Soviet Union. The type was also built under license in India and Czechoslovakia, and without license in China until the late 2000s. Designed as a Mach-2 light tactical fighter, its original prototype, the Ye-6/1, was first flown in 1958. The first production variant of the type, designated the MiG-21F, appeared in 1960 and its improved sub-variant, the MiG-21F-13 (Type 74, NATO reporting name Fishbed-C), was made available for export by 1961. It was a simplified daytime short-range, clear-weather interceptor and tactical fighter.

Mikoyan-Gurevich MiG-21 Pilot's Flight Operating Instructions Nato,2008-09 The Mikoyan-Gurevich MiG-21 is known in NATO circles as the 'Fishbed'. Designed as a Mach 2.0 interceptor, the plane holds the distinction of being produced in greater numbers than any other jet aircraft. The Fishbed flew in combat in Vietnam, where it held its own against the F-105 Thunderchief. During the 1973 Arab-Israeli War, 17 Israeli aircraft were shot down, for a loss of six Egyptian MiG-21s. The plane also flew in combat in the Indo-Pakistani War of 1971, during the Soviet invasion of Afghanistan, and in Yugoslavia. Today, over 28 of the world's air forces continue to fly MiG-21s. Originally printed by NATO, this English-language handbook provides a glimpse inside the cockpit of this incredible plane. The manual was recently declassified and is here reprinted in book form. Care has been taken to preserve the integrity of the text

Mikoyan-Gurevich Mig-21 Theodore Gianna,2023-02-14 The MiG-21 was the first supersonic fighter from the Soviet Union. It was first built in the mid-1950s, around the same time as the US Century Series jet fighters, the F-100, F-101, F-102, F-104, F-105, and F-106. However, the MiG 21 would outlive all those fighters. The three largest MiG factories in the USSR manufactured the MiG-21s in many variants. The Moscow Gorki plant (no.21) saw the most extensive production; 5,278 units. The second facility, also in Moscow, was the 'Znamya Truda' (Moscow Aircraft Production Association)

plant, which produced 3,203 units, and the no. 31 plant in Tbilisi, Georgia, built 1,677 units. Production lasted 27 years, from 1959 until 1986. MiG fighters for internal and export use totaled an amazing 10,158 MiG-21s built, including the last of a great breed, 2,030 MiG-21bis fighters, and 1,133 MiG-21 UM 'Mongol' training versions. It was the most mass-produced supersonic fighter aircraft in aviation history, and it still holds that title. Although the MiG-21 was an excellent jet fighter, one aircraft had its measure, the McDonnell Douglas F-4 Phantom. The air battles that took place between the two rival jets during the long Vietnam conflict are legendary. This book devotes a section on the MiG's operations in the Vietnam War.

OKB MiG Piotr Butowski, Jay Miller, 1991 This is the first English- language book to provide such detailed insight into the once highly secretive world of Soviet military aircraft production, and into the elite MiG design bureau. The most thorough and authoritative history of its kind ever published.

Early MiG Fighters in Action Hans-Heiri Stapfer, 2006 Until the collapse of the Soviet Union in 1991, the MiG Design Bureau had a near monopoly on the supply of fighter aircraft to the Soviet Air Force and the nations within Moscow's sphere of influence. Yet the early designs of Mikoyan and Gurevich are not widely known; the MiG-1 was the fastest fighter in the world in 1940 and the improved MiG-3 was more than a match for the Bf 109F at high altitude. Other early designs included high-altitude fighter prototypes, rocket-powered aircraft, and the MiG-9, the first pure jet-powered Soviet fighter. Updated with seven pages of new material.

MiG-23 Flogger in the Middle East Tom Cooper, 2018-05 This is a detailed history of the operational service of this Soviet-manufactured interceptor and its fighter-bomber variants in service with Algerian, Egyptian, Iraqi, Libyan, and Syrian air forces, since 1974.

LaGG & Lavochkin Aces of World War 2 George Mellinger, 2012-10-20 This book examines the LaGG family of fighters, that were amongst the first modern piston-engined interceptors made available to the Red Air Forces in early 1941 and proved far better fighters than their radial-engined predecessors. Despite technical maladies and political interference from Moscow, the LaGG-3 matured into an effective fighter when flown to its strengths at low level. Many early Soviet aces were weaned on the LaGG-3, and if they survived the early massacres of 1941-42, they went on to fly the Lavochkin family of fighters. Indeed, the Lavochkin La-3, -5 and -7 were the fighters of choice for Heroes of the Soviet Union such as Ivan Kozhedub, who claimed 62 kills.

Mikoyan Gurevich Mig-21 Fishbed - Warbirdtech Gordon Yefim, Peter Davison, 2007-02 The photos in this edition are black and white. The Mikoyan-Gurevich MiG-21 Fishbed, a lightweight air-combat fighter, is one of the most famous military aircraft in the world. No other warplane has been manufactured in such large numbers (over 10,000 in the Soviet Union and about 2,000 in China and India) since World War II. Nor has any other fighter served with so many air forces (the current count is 56). This global success was the MiG design bureau's fourth in succession in the immediate postwar era. Powered by one Tumansky R-11F-300 rated at 12,675 lb (w/ afterburner), the MiG-21 was easy to maintain, tough in the harshest environments, and very affordable. It was designed to climb fast to high altitudes, at all heights, and to excel in close combat. This book covers all MiG-21 upgrades and

variants, as well as combat and armament specifications. Over 300 photos are used to illustrate the story of the MiG-21. It features technical diagrams and gives a comprehensive development history. Other topics include design, development, structural detail, international production, trials, comparisons, and much more.

The MiG-21 Holger Müller, Motorbuch, 2019-01-28 This book presents a detailed look at the design and development of the legendary MiG-21, including its powerplant, armament, upgrades, and variants. The Mikoyan-Gurevich MiG-21 was the standard fighter/interceptor aircraft of the Warsaw Pact and it stood up to its western counterparts for decades. This single-engine, supersonic jet fighter entered service in 1959, and in addition to the Soviet Union, almost every eastern European military operated the Mach 2 fighter, including East Germany (which flew more than 500 aircraft of this type), Poland, Romania, Yugoslavia, and others. With approximately 11,000 of all types built, the MiG-21 has been produced in greater numbers than almost any other combat aircraft in history, and has also seen combat with such countries as Vietnam, China, Syria, Iraq, Angola, and others.
