Hawker's Secret Projects Christopher Budgen,2023-12-30 Hawker Aircraft Ltd at Kingston was arguably the most successful and long-lasting manufacturer of military aircraft in Great Britain and Europe. In its various evolved manifestations – Hawker Aircraft, Hawker Siddeley Aviation, British Aerospace – its output of war winning aircraft, mainly fighters, was unsurpassed. From the Hart and Hurricane through the Hunter, Harrier and Hawk, the company consistently produced aircraft that the UK fighting services wanted. But some designs, for whatever reason, failed to reach flight or were declined by the services. With their sometimes advanced aerodynamics and technology, these aircraft could have had successful service careers but instead were abandoned, their stories failing to reach mainstream consciousness. Having not received their just dues, the present book seeks to redress this omission. The reasons for failure are many and varied, often financial or political, but in each case the reasons behind the failure of the design are examined. In a wide-ranging investigation that documents the origins of Hawker Aircraft Ltd and its famous Project Office, this work, the third in Christopher Budgen's investigation of the inner workings of Hawker Aircraft, is a fitting tribute to the many who made the company the success it was.

Mikoyan MiG-29 Fulcrum E. Gordon,Yefim Gordon,1999 Developed to meet the Soviet Union's requirement for a dual fighter and ground-attack aircraft, the MiG-29 entered operational service in 1983. Russian author and aviation expert Yefim Gordon interviews Mikoyan design and engineer personnel to reveal the development and operational history of the MiG-29. With access to all design and production records, as well as declassified technical drawings and photographs, Gordon has assembled the ultimate reference to this Cold War fighter, of which an estimated 500 are still believed to be in service around the globe, including in Russia, Bulgaria, Cuba, Czechoslovakia, Hungary, India, Iraq, Iran, Poland and Malaysia.

British Secret Projects Tony Buttler,2000 A large number of fighter projects have been drawn by British companies over the last fifty years, but very few have turned into hardware, and very little has been published about these fascinating might-have-beens. This book makes extensive use of previously unpublished, primary-source material-much recently declassified. It gives an insight into a secret world where the public has had little idea of what was going on, while at the same time presenting a coherent nationwide picture of fighter development and evolution. Particular emphasis is placed on tender design competitions and some of the events that led to certain aircraft either being canceled or produced. Some of the many and varied types included are the Hawker P.1103/P.1136/P.1121 series, and the Fairey Delta III. The book includes many illustrations, plus specially commissioned renditions of might-have-been types in contemporary markings.

Soviet-American Relations, 1953-1960 Victor Rosenberg,2005-06-08 Dwight D. Eisenhower and Nikita Khrushchev presided over a pivotal period in Soviet-American relations. The ongoing Korean War and the lack of an American ambassador in Moscow illustrate the strain in Soviet-American relations at the start of Eisenhower's presidency, but things changed after Stalin died only 44 days later. Stalin's successors began to liberalize both domestic and foreign policy in what became known as the Thaw. There was an increase in diplomatic exchanges, including the first modern summit conferences. Of even greater importance, the Soviet leaders began to reestablish the scientific, cultural, and tourist contacts that had been broken under Stalin. Because political and ideological tensions remained and there were still restrictions on contacts, the Soviet overtures can best be described as a half-offered hand of friendship, and perhaps it was less of a thaw than the end of a blizzard. Nevertheless, these contacts began a process which would help end the Cold War three decades later. This history of relations between the Soviet Union and the United States during the Eisenhower and Khrushchev administrations explores political, social and cultural exchanges, and assesses their impact upon the two countries. Besides diplomatic documents, memoirs from Americans and Soviets, and works of history, it relies upon eyewitness accounts by journalists, tourists and others to paint a detailed picture of the era. Notes are included for each chapter, and there is a bibliography and an index.

Arizona Warplanes Harold A. Skaarup,2010-04-02 This aviation handbook is designed to be used as a quick reference to the classic military heritage aircraft that have been restored and preserved in the state of Arizona. The aircraft include those flown by members of the United States Air Force, the United States Navy, the United States Army, the United States Marine Corps, the United States Coast Guard, the Air and Army National Guard, and by various NATO and allied nations as well as a number previously operated by opposition forces in peace and war. The interested reader will find useful information and a few technical details on most of the military aircraft that have been in service with active flying squadrons both at home and overseas. 100 selected photographs have been included to illustrate a few of the major examples in addition to the serial numbers assigned to American military aircraft . For those who like to actually see the aircraft concerned, aviation museum locations, addresses and contact phone numbers have been included, along with a list of aircraft held in each museum's current inventory or on display as gate guardians throughout the State of Arizona. The aircraft presented in this edition are listed alphabetically by manufacturer, number and type. Although many of Arizona's heritage warplanes have completely disappeared, a few have been carefully collected, restored and preserved, and some have even been restored to flying condition. This guide-book should help you to find and view Arizona's Warplane survivors.

Aircraft Design Projects Lloyd R. Jenkinson,Jim Marchman,2003-04-28 Written with students of aerospace or aeronautical engineering firmly in mind, this is a practical and wide-ranging book that draws together the various theoretical elements of aircraft design - structures, aerodynamics, propulsion, control and others - and guides the reader in applying them in practice. Based on a range of detailed real-life aircraft design projects, including military training, commercial and concept aircraft, the experienced UK and US based authors present engineering students with an essential toolkit and reference to support their own project work. All aircraft projects are unique and it is impossible to provide a template for the work involved in the design process. However, with the knowledge of the steps in the initial design process and of previous experience from similar projects, students will be freer to concentrate on the innovative and analytical aspects of their course project. The authors bring a unique combination of perspectives and experience to this text. It reflects both British and American academic practices in

teaching aircraft design. Lloyd Jenkinson has taught aircraft design at both Loughborough and Southampton universities in the UK and Jim Marchman has taught both aircraft and spacecraft design at Virginia Tech in the US. * Demonstrates how basic aircraft design processes can be successfully applied in reality * Case studies allow both student and instructor to examine particular design challenges * Covers commercial and successful student design projects, and includes over 200 high quality illustrations

The Cuban Missile Crisis Len Scott,R. Gerald Hughes,2015-04-10 This volume brings together a collection of leading international experts to revisit and review our understanding of the Cuban Missile Crisis, via a critical reappraisal of some of the key texts. In October 1962, humankind came close to the end of its history. The risk of catastrophe is now recognised by many to have been greater than realised by protagonists at the time or scholars subsequently. The Cuban missile crisis remains one of the mostly intensely studied moments of world history. Understanding is framed and informed by Cold War historiography, political science and personal experience, written by scholars, journalists, and surviving officials. The emergence of Soviet (later Russian) and other national narratives has broadened the scope of enquiry, while scrutiny of the operational, especially military, dimensions has challenged assumptions about the risk of nuclear war. The Cuban Missile Crisis: A Critical Reappraisal brings together world leading scholars from America, Britain, France, Canada, and Russia to present critical scrutiny of authoritative accounts and to recast assumptions and interpretations. The book aims to provide an essential guide for students of the missile crisis, the diplomacy of the Cold War, and the dynamics of historical interpretation and reinterpretation. Offering original ideas and agendas, the contributors seek to provide a new understanding of the secrets and mysteries of the moment when the world went to the brink of Armageddon. This book will be of great interest to students of the Cuban missile crisis, Cold War Studies, nuclear proliferation, international history and International Relations in general.

Sukhoi Su-57-Op/HS Yefim Gordon,Dmitriy Komissarov,2021 As early as 1979, Soviet aircraft designers started work on a program called I-90, a fighter for the 1990s. Two Soviet aircraft design bureaus took on the task, Mikoyan and Sukhoi. Work began in 1983 but with the dissolution of the Soviet Union the project stalled. In 2002 the Russian government kicked off a new program under which Sukhoi began development of what was then known as PAK FA (Future Tactical Aviation Aircraft System). Known in house as the T-50, this aircraft strongly resembled the American F-22 Raptor in overall appearance. The first prototype took to the air on January 29, 2010 and in 2017 the fighter was allocated the service designation Su-57. In 2018 the aircraft had its combat debut when four of the prototypes were briefly deployed to Syria during the Russian campaign against the IS terror network in that country. Production was officially launched in May 2019, with the Russian Air Force having 70-plus on order. This work charts the development and trials history of the 1.44, Su-47 and Su-57, as well as other project versions that did not make it to the hardware stage. It is illustrated with numerous previously unpublished photos and drawings.

Luftwaffe Secret Projects Walter Schick,Ingolf Meyer,1997 Designs from Germany's aerodynamics engineers detail proposed military aircraft, including wing span and area, aspect ratio, length, height, weight, speed, and armament.

Cuban Missile Crisis Jonathan Colman,2016-02-15 October 1962, The Cuban Missile Crisis: the confrontation that brought the world closer to nuclear catastrophe than ever before or since. Both John F. Kennedy and Nikita Khrushchev were determined to avoid nuclear war, but events could easily have spiraled out of control with cataclysmic results. Drawing on an extensive body of research, including primary sources released only in the last few years, this work places the crisis in a broader international and chronological context than previously possible. Discover how America was responsible for causing the conflict and Cuba's role as an important actor rather than a superpower pawn.

Project Cancelled Derek Wood,1986 Om de mange projekter - hvoraf adskillige lovende - der måtte opgives som følge af en række efter forfatterens mening højst tvilsomme politiske og kommercielle beslutninger, der efter 2. verdenskrig har kostet England dyrt.

F-104 Starfighter Units in Combat Peter E. Davies,2014-11-20 This title covers the technical characteristics of the F-104 Starfighter, one of the most widely-used and popular aircraft in history. Although built in small numbers for the USAF, the F-104C fought and survived for almost three years in Vietnam. There, it was engaged in some of the war's most famous battles including the legendary operation Bolo, where seven North Vietnamese MiGs were destroyed without the loss of a single US fighter. This small, tough and very fast fighter, dubbed 'The Missile with a Man in It', was called upon to do things it was not specifically designed for, and did them admirably. Featuring illustrations and photographs detailing the variety of nose-paint schemes and weapons configurations, this comprehensive appraisal of the F-104 Starfighter is ideal for modelling and aviation enthusiasts alike.

Sukhoi S-37 and Mikoyan Mfi Yefim Gordon,2001 Conceived in the early 1980s to ease the threat posed by the American ATF program, these fighters were developed as the Soviet Union's fifth-generation fighters. This book gives a detailed account of how Russia's two leading fighter aircraft designers competed for the order and how a third contender never made it to the hardware stage. It deals with the way these aircraft were conceived, designed, built, and flown.

Out of the Cold Michael R. Fitzgerald,Allen Packwood,2013-10-10 Featuring first hand accounts by international politicians and diplomats along with analyses by leading scholars, this unique collection of essays provides insights from multiple perspectives to foster better understanding of international relations during and after the Cold War. Experts from both sides of the iron curtain shed light on the origins, struggles, ending, and legacy of the conflict that dominated the second half of the twentieth century and that still affects current East-West relations, the securing and dismantling of weapons of mass destruction, and the instability of many regions. With a particular focus on diplomatic relations, the book looks at the origins of the conflict from Yalta to Korea, the prelude to Détente from Cuba to Vietnam, followed by the move from Détente to dialogue. It then addresses such issues as strategic weapons, the impact of the war on scientific research, intelligence, and the fall of the Berlin Wall. Lastly, it examines the legacy of the Cold War across regions of the world, including Europe, Japan, India, China, and the lessons to be drawn for today's diplomatic relations and intelligence. With contributions from Howard Baker, Jr., Sir Anthony Brenton, Susan Eisenhower, Grigoryi Karasin, Alexander Likhotal, Kishan Rana, Ying Rong, and more, the volume presents a truly international treatment of a subject of global dimensions and importance.

Students of politics and international relations will find it invaluable as will Foreign Service practitioners, and instructors teaching the Cold War and foreign affairs.

Khrushchev Geoffrey Swain,2015-12-03 This concise, approachable introduction to Khrushchev explores the innovative theme of Khrushchev as reformer, arguing that the 'bumbling' nature of those reforms only partly reflected Khrushchev's uncertainty about how to act. Swain provides a cogent account of Khrushchev's political career and of his wider role in Soviet and world politics.

Soviet Spyplanes of the Cold War Yefim Gordon,2013-11-04 Spy in the Sky' matters have long been a source of interest and fascination for aircraft enthusiasts, historians and modellers and none more so than the elusive and secretive Soviet types of the Cold War era. Yefim Gordon presents us here with a range of such types, presenting a collection of photographs, profiles and line drawings together with supplementary text detailing the history of each craft, encompassing the various developmental milestones, successes and pitfalls experienced along the way.??The Soviet Union's two dedicated spyplane types, the Yakovlev Yak-25RV 'Mandrake' (the Soviet equivalent of the Lockheed U-2) and the MiG-25R 'Foxbat' are profiled, supplemented by details garnered from a host of original sources.??Well-illustrated histories and structural analyses are set alongside detailed descriptions of the various plastic scale model kits that have been released, along with commentary concerning their accuracy and available modifications and decals.??With an unparalleled level of visual information - paint schemes, models, line drawings and photographs - it is simply the best reference for any model-maker setting out to build a variant of this iconic craft.
