Mi-24 D/W Krzysztof Barcz, Dariusz Warszawski, 2010-01-05 * Includes free decals in 1:72, 1:48 and 1:35 scales * Packed with 145 color photos The Mil Mi-24 is a large helicopter gunship and low-capacity troop transport produced by Mil Moscow Helicopter Plant and operated from 1972 by the Soviet Air Force, its successors, and over thirty other nations. The body is heavily armored and can resist impacts from .50 caliber (12.7 mm) rounds from all angles, including the titanium rotor blades. The cockpit is an even more heavily armored titanium tub and can resist impact from 37mm cannon rounds. Considerable attention was given to making the Mi-24 fast. The airframe was streamlined, and fitted with retractable tricycle undercarriage landing gear to reduce drag. The wings provide considerable lift at high speed, up to a quarter of total lift. This Monograph covers this assault helicopter. Included are 145 color photos, many of them close-ups, featuring markings and codes, and Techmod decals to cover 3 aircraft in 1:72, 1:48 and 1:35 scales, making this an ideal publication for the modeler. Mi-28. Night Hunter and Others Jakub

Fojtik, 2017-03-19 The Mil Design Bureau, led by Mikhail Leonteyevich Mil, was one of the leading Soviet plants promoting combination of helicopters and firepower. Mil was personally involved in the development of a prewar A-7 autogyro equipped with a machine gun for its own defense and two more for destroying ground targets. However, this type did not reach mass production. But Mil continued thinking about arming the rotorcraft, especially during his practice design of several Bratukhin helicopters, of which some models were intended for artillery spotting and clearly showed that helicopters could play an important role in the army and could be a part of front line units. When the Mi-1 helicopter was test flown for the first time on 20th of September 1948, it was clear that a very versatile type was born. It became the first mass produced Soviet helicopter with a wide variety of special variants for both civil and military applications. It had just entered the regular service with the Soviet Army, when US forces began using their Bell OH-13s for attack missions in Korean War.

Introduction to Kiribati Gilad James, PhD, 2020-11-30 Kiribati is a small, low-lying island nation located in the central Pacific

Ocean. It spans an area of approximately 3.5 million square kilometers and consists of 33 atolls and islands, with the majority of its land area located less than two meters above sea level. Due to its vulnerability to rising sea levels and the devastating impacts of climate change, Kiribati has been described as a bellwether for the impacts of global warming on low-lying island nations. The population of Kiribati is estimated to be around 119,500, with the majority of the population living on the main island of South Tarawa. Kiribati is a diverse nation, with a varied cultural heritage and a mix of Christianity and traditional beliefs. Its economy is largely based on subsistence agriculture and fishing, although the government has recently introduced policies aimed at attracting foreign investment and developing industries such as tourism and mining. Kiribati has also faced numerous challenges, including the loss of land to erosion, overfishing, and limited access to healthcare and education.

The Night Stalkers Michael J. Durant, Steven Hartov, Robert L. Johnson, 2006-12-28 From the New York Times bestselling authors of *In the Company of Heroes* comes a thrilling account of military aviation for history buffs and “for those who love vivid tales of battlefield heroics” (Publishers Weekly). In the world of covert warfare, Special Operations pilots are notoriously close-lipped about what they do. They don’t talk about their missions to anyone outside their small community. But now, Michael J. Durant and Steven Hartov shed fascinating light on the mysterious elite commandos known as SOAR (Special Operations Aviation Regiment) and take readers into a shadowy world of combat they have only imagined.

The Whirlwind War Frank N. Schubert, 1995 CMH Publication 70-30. Edited by Frank N. Schubert and Theresa L. Kraus. Discusses the United States

Army's role in the Persian Gulf War from August 1990 to February 1991. Shows the various strands that came together to produce the army of the 1990s and how that army in turn performed under fire and in the glare of world attention. Retains a sense of immediacy in its approach. Contains maps which were carefully researched and compiled as original documents in their own right. Includes an index.

U.S. Marines In Vietnam: The Landing And The Buildup, 1965 Dr. Jack Shulimson, Maj. Charles M. Johnson, 2016-08-09 This is the second volume in a series of chronological histories prepared by the Marine Corps History and Museums Division to cover the entire span of Marine Corps involvement in the Vietnam War. This volume details the Marine activities during 1965, the year the war escalated and major American combat units were committed to the conflict. The narrative traces the landing of the nearly 5,000-man 9th Marine Expeditionary Brigade and its transformation into the III Marine Amphibious Force, which by the end of the year contained over 38,000 Marines. During this period, the Marines established three enclaves in South Vietnam's northernmost corps area, I Corps, and their mission expanded from defense of the Da Nang Airbase to a balanced strategy involving base defense, offensive operations, and pacification. This volume continues to treat the activities of Marine advisors to the South Vietnamese armed forces but in less detail than its predecessor volume, U.S. Marines in Vietnam, 1954-1964; The Advisory and Combat Assistance Era.

Airmobility 1961-1971 Ltg John J.

Tolson, 2011-09-26 This is the exciting story of the development of U.S. airmobile power from

theory to practice, involving air transport, fixed wing aircraft, and attack helicopters culminating in Vietnam War operations. It includes analysis of airmobile combat operations; doctrinal and interservice disputes; equipment descriptions; and the organization of combat and support units. It also includes data about airmobility in South Vietnam's army and it features personal reflections of the author, who was at the center of airmobility development and who commanded large airmobile units. John J. Tolson in June 1939 participated in the first tactical air movement of ground forces by the U.S. Army. He was in all combat jumps of the 503d Parachute Infantry Regiment during World War II, became an Army aviator in 1957, and served as Director of Army Aviation and Commandant of the Army Aviation School. From April 1967 to July 1968 he commanded the 1st Cavalry Division (Airmobile), Vietnam. (Includes many maps and photographs)
