**MIL' Mi-6/-26** Yefim Gordon,Dmitriy Komissarov,2016-07-31 Developed in the early 1950s to meet a Soviet Army requirement and first flown in June 1957, the Mi-6 was the largest-yet helicopter created in the Soviet Union. Its notable features included a power-plant consisting of two turbo-shaft engines (for the first time on a Soviet helicopter) and stub wings offloading the main rotor in forward flight; the cabin was big enough to accommodate artillery systems and tactical ballistic missiles. Built by two plants, the Mi-6 saw service with the Soviet Air Force (including participation in the Afghan War) and the air arms of several Soviet allies. It also proved valuable as a civil air-lifter during oilfield exploration in Siberia, remaining in service right the way up to 2002.A worthy successor to the Mi-6 appeared in 1977 the Mi-26. With its 20-ton payload, it was (and still is) the worlds largest and most capable transport helicopter. Again, the Mi-26 had both military and commercial uses (the former included participation in several armed conflicts); the type is still in production, being updated to meet modern requirements, and has been exported to several countries in Asia and Latin America.The book describes the history, variants and service career of the Mil big lifters and contains a detailed overview of the scale model kits covering these types which are currently available on the market.

**Mil's Heavylift Helicopters** E. Gordon,Yefim Gordon,Dmitriï Komissarov,Sergey Komissarov,2005 In the early 1950s a need arose in the Soviet Union for a heavy transport and assault helicopter capable of airlifting cargo weighing up to 6 tons (13,230 lbs) - primarily artillery systems. The chief Soviet helicopter maker - OKB-329 headed by Mikhail L. Mil - took on this important task. The prototype of the V-6 (eventually redesignated Mi-6), which first flew in June 1957, was a much larger machine. For the first time not only in the Mil OKB's practice but also in the world helicopter design practice, the powerplant consisted of two gas turbine engines; another peculiarity was the use of auxiliary wing offloading the main rotor in cruise flight. The Mi-6 provided a major boost to the Soviet Air Force's capability. In 1959 it served as the basis for the unconventional Mi-10 capable of straddling bulky loads. In 1967, however, Mil truly amazed the world by bringing out the mighty V-12 capable of lifting a 25-ton (55,110-lb) payload. This machine was destined to remain in prototype form; yet in 1977 the OKB achieved a major success with the smaller but more advanced Mi-26, which remains the world's largest production helicopter and, like the Mi-6, has rendered invaluable service in both civil and military applications. This book covers the development history and design of all the various types in detail and is well illustrated with numerous photos and line drawings.

**Mil Mi-24 Hind Attack Helicopter** Yefim Gordon,Dmitriï Komissarov,2001 The Russian-built Mil Mi-24 is one of the best known and most prolific combat helicopter in the world. This volume includes an introductory explanation of the concept and a detailed development history of the helicopter. Descriptions of existing versions include test beds.

**Mil Mi-24 Hind Gunship** Alexander Mladenov,2012-07-20 With its distinctive double-cockpit design, the Mi-24 'Hind' is arguably the most recognizable war machine of the Cold War, and has achieved near-legendary status in the annals of military history. The first Soviet helicopter to function as both a gunship and an assault transport, it served extensively in Afghanistan, and is now employed by militaries across the world. Written by an expert on the 'Hind', an drawing on manufacturing and military sources, this book presents the Mi-24 in all of its brutal glory, from design and development to deployment and combat. Also included are a number of color plates showing the distinct paint schemes employed by various nations in a range of theaters/ theatres and for different armies.

**Russian-Soviet Unconventional Wars in the Caucasus, Central Asia, and Afghanistan [Illustrated Edition]** Dr. Robert F. Baumann,2015-11-06 [Includes 12 maps and 4 tables] In recent years, the U.S. Army has paid increasing attention to the conduct of unconventional warfare. However, the base of historical experience available for study has been largely American and overwhelmingly Western. In Russian-Soviet Unconventional Wars in the Caucasus, Central Asia, and Afghanistan, Dr. Robert F. Baumann makes a significant contribution to the expansion of that base with a well-researched analysis of four important episodes from the Russian-Soviet experience with unconventional wars. Primarily employing Russian sources, including important archival documents only recently declassified and made available to Western scholars, Dr. Baumann provides an insightful look at the Russian conquest of the Caucasian mountaineers (1801-59), the subjugation of Central Asia (1839-81), the reconquest of Central Asia by the Red Army (1918-33), and the Soviet war in Afghanistan (1979-89). The history of these wars—especially as it relates to the battle tactics, force structure, and strategy employed in them—offers important new perspectives on elements of continuity and change in combat over two centuries. This is the first study to provide an in-depth examination of the evolution of the Russian and Soviet unconventional experience on the predominantly Muslim southern periphery of the former empire. There, the Russians encountered fierce resistance by peoples whose cultures and views of war differed sharply from their own. Consequently, this Leavenworth Paper addresses not only issues germane to combat but to a wide spectrum of civic and propaganda operations as well.

The Whirlwind War Frank N. Schubert,1995 CMH Publication 70-30. Edited by Frank N. Schubert and TheresaL. Kraus. Discusses the United States Army's role in the Persian Gulf War from August 1990 to February 1991. Shows the various strands that came together to produce the army of the 1990s and how that army in turn performed under fire and in the glare of world attention. Retains a sense of immediacy in its approach. Contains maps which were carefully researched and compiled as original documents in their own right. Includes an index.

**Mil Mi-8/17/171 Hip** Jakub Fojtik,2019-04-19 This publication covers the legendary soviet multipurpose type, the Mi-8 Hip helicopter. As a very first book it describes not only the history and status of the original Mi-8 variants powered by TV2-117 engines starting with the V-8 prototype and the Mi-8MT (for export known as Mi-17) models powered by TV3-117 engines, but also the Mi-8AMT (Mi-171) family up to the latest Mi-8AMTSh-VN special operations variant. Each version is introduced by its development and production history and by the service and export. A separate chapter is dedicated to the detailed description of all Mi-8/17/171 family upgrades done by Belorussian, Bulgarian, Chinese, Czech, Finnish, French, Israeli, Lithuanian, Polish, Serbian, Slovak, South African, Turkish, UAE, UK, Ukrainian, US, Yugoslavian and of course Russian companies. All known special variants and demonstrators are described in detail as well. The publication includes list of export production and also list of re-exports giving to the reader a full idea of the world footprint of the Hip. A detailed technical description is attached highlighting variants' deviations. All variants and

upgrades are lavishly illustrated by mostly color pictures including strip-down and walk-around pictures of the helicopter and its systems. Essential reading for aviation enthusiasts & scale aeromodellers.

**Helicopters** Stanley S. McGowen, 2005-05-24 First envisioned by Leonardo da Vinci and first deployed in World War II, the helicopter is now a universal icon of modern warfare, a key component of combat planning around the world, and one of the military's most versatile and effective tools. *Helicopters: An Illustrated History of Their Impact* covers the development of helicopters from a concept in Leonardo da Vinci's mind to the first successful machines in the early 1900s to the latest tilt-rotor designs. Time and again, in a story of constant innovation, designers answered the concerns of military planners with more maneuverable, more capable rotorcraft. With expert analysis and specific details of every significant model ever used, *Helicopters* shows how these once denigrated machines became essential to a variety of missions (reconnaissance, transport, attack, support, evacuation, urban combat, quick strikes behind enemy lines, and more). In addition, the book looks at the impact of rotorcraft beyond the military, including their ever-widening role in emergency medical care, police work, traffic control, agriculture, news reporting, and more.

The Other End of the Spear John J. McGrath, 2011-09-16 This book looks at several troop categories based on primary function and analyzes the ratio between these categories to develop a general historical ratio. This ratio is called the Tooth-to-Tail Ratio. McGrath's study finds that this ratio, among types of deployed US forces, has steadily declined since World War II, just as the nature of warfare itself has changed. At the same time, the percentage of deployed forces devoted to logistics functions and to base and life support functions have increased, especially with the advent of the large-scale use of civilian contractors. This work provides a unique analysis of the size and composition of military forces as found in historical patterns. Extensively illustrated with charts, diagrams, and tables. Dietary Reference Intakes for Vitamin A, Vitamin K, Arsenic, Boron, Chromium, Copper, Iodine, Iron, Manganese, Molybdenum, Nickel, Silicon, Vanadium, and Zinc Institute of Medicine, Food and Nutrition Board, Standing Committee on the Scientific Evaluation of Dietary Reference Intakes, Subcommittee of Interpretation and Uses of Dietary Reference Intakes, Subcommittee on Upper Reference Levels of Nutrients, Panel on Micronutrients, 2002-07-19 This volume is the newest release in the authoritative series issued by the National Academy of Sciences on dietary reference intakes (DRIs). This series provides recommended intakes, such as Recommended Dietary Allowances (RDAs), for use in planning nutritionally adequate diets for individuals based on age and gender. In addition, a new reference intake, the Tolerable Upper Intake Level (UL), has also been established to assist an individual in knowing how much is too much of a nutrient. Based on the Institute of Medicine's review of the scientific literature regarding dietary micronutrients, recommendations have been formulated regarding vitamins A and K, iron, iodine, chromium, copper, manganese, molybdenum, zinc, and other potentially beneficial trace elements such as boron to determine the roles, if any, they play in health. The book also: Reviews selected components of food that may influence the bioavailability of these compounds. Develops estimates of dietary intake of these compounds that are compatible with good nutrition throughout the life span and that may decrease risk of chronic disease where data indicate they play a role. Determines Tolerable Upper Intake levels for each nutrient reviewed where adequate scientific data are available in specific population subgroups. Identifies research needed to improve knowledge of the role of these micronutrients in human health. This book will be important to professionals in nutrition research and education.

**Mil Mi-24 Attack Helicopter** Michael Normann, 2020-01-28 The Mil Mi-24 Soviet/Russian gunship and attack helicopter has been in continuous

combat service since its first appearance in the early 1970s. Its impressive performance, ability to transport fully armed troops, and imposing armament soon earned the Mi-24 the nickname Crocodile and have made the big helicopter an opponent that is still feared to this day. The Mi-24's technical, developmental, and operational details, as well as upgrades and variants, all are discussed here. Included are discussions of all versions, armament, radio, radar warning and navigational equipment, and defense systems. Tactics and operations are also presented, with special emphasis on the Mi-24's service in Afghanistan from 1979 to 1989. Worldwide use by over 30 countries includes the air forces of Angola, Brazil, Cuba, India, Iraq, North Korea, Syria, Vietnam, Yemen, and others.

**Russian Gunship Helicopters** Yefim Gordon, Dmitry Komissarov, 2013-11-04 Features; \* Profiles of iconic types such as the Mil Mi-24 'Hind', the Mil-28 and the Kamov Ka-52 'Alligator'. \* Summary of design histories and careers \* Colour reference for paint schemes \* Critical review of available kits \* Over 180 colour and black and white illustrations, including 20 full colour side-views and a range of various 3-view line-drawings. With profiles of a host of exciting designs, accompanied by a descriptive narrative history of the various types, this volume combines practical information with reflective historical analysis, making for a visually rich volume providing modellers with all they need to know about the most exciting Russian Gunship helicopter designs and associated model kits. This edition deals primarily with the three principal attack helicopter types of the present-day Russian Army; The Mil Mi-24 'Hind' otherwise known as 'the Flying Crocodile' has been produced in large numbers with many versions and variants produced. It has been supplied to a host of countries and seen considerable combat action in conflicts both in the Soviet Union and abroad. It still forms the backbone of army aviation in Russia and remains at the forefront of national exposure. The Mil-28 is a more contemporary type and is broadly the equivalent of the McDonnell Douglas AH-64 Apache. The Kamov Ka-52 'Alligator' NATO name 'Hokum-B' also features. This helicopter is in service with the Army and is entering service also with the Russian Navy. Well-illustrated histories and structural analyses are supplemented with detailed descriptions of the various plastic scale model kits which have been released, along with commentary concerning their accuracy and available modifications and decals. This level of detail and insight is sure to prove invaluable to a wide community of model-makers, both at home and overseas.
