Building the Skyline Jason M. Barr,2016-05-12 The Manhattan skyline is one of the great wonders of the modern world. But how and why did it form? Much has been written about the city's architecture and its general history, but little work has explored the economic forces that created the skyline. In *Building the Skyline*, Jason Barr chronicles the economic history of the Manhattan skyline. In the process, he debunks some widely held misconceptions about the city's history. Starting with Manhattan's natural and geological history, Barr moves on to how these formations influenced early land use and the development of neighborhoods, including the dense tenement neighborhoods of Five Points and the Lower East Side, and how these early decisions eventually impacted the location of skyscrapers built during the Skyscraper Revolution at the end of the 19th century. Barr then explores the economic history of skyscrapers and the skyline, investigating the reasons for their heights, frequencies, locations, and shapes. He discusses why skyscrapers emerged downtown and why they appeared three miles to the north in midtown-but not in between the two areas. Contrary to popular belief, this was not due to the depths of Manhattan's bedrock, nor the presence of Grand Central Station. Rather, midtown's emergence was a response to the economic and demographic forces that were taking place north of 14th Street after the Civil War. *Building the Skyline* also presents the first rigorous investigation of the causes of the building boom during the Roaring Twenties. Contrary to conventional wisdom, the boom was largely a rational response to the economic growth of the nation and city. The last chapter investigates the value of Manhattan Island and the relationship between skyscrapers and land prices. Finally, an Epilogue offers policy recommendations for a resilient and robust future skyline.

Frank Lloyd Wright Barry Bergdoll,Jennifer Gray,2017 Published in conjunction with a major exhibition at The Museum of Modern Art, this catalogue reveals new perspectives on the work of Frank Lloyd Wright, a designer so prolific and familiar as to nearly preclude critical reexamination. Structured as a series of inquiries into the Frank Lloyd Wright Foundation Archives, the book is a collection of scholarly explorations rather than an attempt to construct a master narrative. Each chapter centers on a key object from the archive that an invited author has unpacked-interpreting and contextualizing it, tracing its meanings and connections, and juxtaposing it with other works from the archive, from MoMA, or from outside collections. The publication aims to open up Wright's work to questions, interrogations, and debates, and to highlight interpretations by contemporary scholars, both established Wright experts and others considering this iconic figure from new and illuminating perspectives.

The Mile High Club Kinky Friedman,2001-02-21 The Mile High Club is a novel of intrigue, irreverence, international terrorism, humor, suspense, and cross-dressing, in which the intrepid Kinky Friedman gets more than his leg pulled when he encounters a mysterious vamp on an airplane. It all starts with a casual flirtation, two people on a flight from Dallas to New York. She is gorgeous and mysterious; he is a private detective. When the plane lands, the detective -- our hero Kinky Friedman -- finds that he's been left holding the bag, in this case literally holding a bright pink cosmetic bag. The mysterious woman, having asked the Kinkster to watch her luggage while she visits the dumpster, has taken a powder and somehow has vanished. Confident that he'll find the mystery woman again, Kinky holds on to the bag. Sure enough she does turn up, but not before Kinky has excited the interest of an array of suits from the State Department, been party to a thwarted kidnap attempt by Arab terrorists, and found a dead Israeli agent parked on the toilet of his downtown Manhattan loft. Employing the able-bodied assistance of his

usual sidekicks, the Village Irregulars, Kinky eventually gets to the bottom of all the comings and goings and comings of the many visitors to his loft -- including two late-night visits by the mysterious, and suddenly affectionate, woman from the plane and one not-so-late visit by her angry brother. Before it's over, the bag is gone. Despite the many comparisons made by the critics, citing his resemblance to one great writer after another, the truth is that no other writer combines intriguing mystery with bawdy one-liners quite like Kinky Friedman. Alternately raunchy, offbeat, and hilarious, *The Mile High Club*, complete with a surprise ending, is Kinky at his very considerable best.

Frank Lloyd Wright Alan Hess, 2007 The mid-twentieth century was one of the most productive and inventive periods in Frank Lloyd Wright's career, producing such masterworks as the Guggenheim Museum, Price Tower, Fallingwater, the Usonian Houses, and the Lovness House, as well as a vast array of innovative furniture and object design. With a wide variety of shapes and forms-ranging from honeycombs to spirals-this period defies simplistic definition. Simplicity, democratic designs, and organic forms characterize Mid-Century Modern, and, mentoring such mid-century talents as Richard Neutra and Rudolph Schindler among others, Wright was one of its most influential proponents. *Frank Lloyd Wright: Mid-Century Modern* is a comprehensive examination of an under-explored period in Wright's career, a time dating from roughly 1935 to 1958, during which this master architect was at his most daring and innovative.--Jacket

A Supposedly Fun Thing I'll Never Do Again David Foster Wallace, 2009-11-23 These widely acclaimed essays from the author of *Infinite Jest* -- on television, tennis, cruise ships, and more -- established David Foster Wallace as one of the preeminent essayists of his generation. In this exuberantly praised book -- a collection of seven pieces on subjects ranging from television to tennis, from the Illinois State Fair to the films of David Lynch, from postmodern literary theory to the supposed fun of traveling aboard a Caribbean luxury cruiseliner -- David Foster Wallace brings to nonfiction the same curiosity, hilarity, and exhilarating verbal facility that has delighted readers of his fiction, including the bestselling *Infinite Jest*.

Frank Lloyd Wright from Within Outward Frank Lloyd Wright, 2009 *Frank Lloyd Wright: From Within Outward* features a lifetime of achievement by this titan of American architecture through newly commissioned contemporary photography, archival photography, and wonderfully detailed drawings of more than 200 projects, including such masterworks as the S. C. Johnson & Sons Administration Building in Wisconsin, the Guggenheim Museum in New York, and Taliesin West, Wright's desert home in Arizona, as well as less-known projects designed for Baghdad, Iraq, and beyond. The book is richly accompanied by authoritative text from some of the most important Frank Lloyd Wright scholars and writers at work today, and presents a timely reevaluation of the work and life of Frank Lloyd Wright within the context of social spaces, in the spirit of the exhibition.

Tall Buildings and the City Kheir Al-Kodmany, 2020-07-09 The chaotic proliferation of skyscrapers in many cities around the world is contributing to a decline in placemaking. This book examines the role of skyscrapers and open spaces in promoting placemaking in the city of Chicago. Chicago's skyscrapers tell an epic story of transformative architectural design, innovative engineering solutions, and bold entrepreneurial spirit. The city's public plazas and open spaces attract visitors, breathe life, and bring balance into the cityscape. Using locational data from social media platforms, including Twitter, Facebook, and Instagram, along with imagery from Google Earth, fieldwork, direct observations, in-depth surveys, and the combined insights from architectural and urban design literature, this study reveals the roles that socio-spatial clusters of skyscrapers, public spaces, architecture, and artwork play to enhance placemaking in Chicago. The study illustrates how Chicago, as the birthplace of skyscrapers, remains a leading city in tall

building integration and innovation. Focusing on some of the finest urban places in America, including the Chicago River, the Magnificent Mile, and the Chicago Loop, the book offers meaningful architectural and urban design lessons that are transferable to emerging skyscraper cities around the globe.

The Magnificent Mile Lights Festival Ellen S. Farrar, 2008 Chicago's North Michigan Avenue, known as The Magnificent MileAA(R), has a long and rich tradition of celebrating the holiday season in grand style. Today the illumination of this world-famous avenue with more than one million white lights is considered by many the official start of the holiday season. The Magnificent Mile Lights FestivalAA(R) draws some one million visitors each November. Millions more watch the televised broadcast. The development of North Michigan Avenue, known in its humble early days as Pine Street, and the creation of its holiday and tree-lighting traditions are largely attributed to a dedicated group of entrepreneurs and business leaders, known as the Greater North Michigan Avenue Association. Over the years, this line of visionary Chicagoans recognized the avenue's potential and committed to making North Michigan Avenue a world-class street with world-class holiday traditions. The North Michigan Avenue district now features 56 hotels, 275 restaurants, 460 retail locations, and numerous educational, cultural, and health care institutions--and more than 18 million visitors annually. It is one of the great avenues of the world, offering one of the most iconic holiday images when it is aglow.

Hopi Runners Matthew Sakiestewa Gilbert, 2018-10-10 In the summer of 1912 Hopi runner Louis Tewanima won silver in the 10,000-meter race at the Stockholm Olympics. In that same year Tewanima and another champion Hopi runner, Philip Zeyouma, were soundly defeated by two Hopi elders in a race hosted by members of the tribe. Long before Hopis won trophy cups or received acclaim in American newspapers, Hopi clan runners competed against each other on and below their mesas—and when they won footraces, they received rain. *Hopi Runners* provides a window into this venerable tradition at a time of great consequence for Hopi culture. The book places Hopi long-distance runners within the larger context of American sport and identity from the early 1880s to the 1930s, a time when Hopis competed simultaneously for their tribal communities, Indian schools, city athletic clubs, the nation, and themselves. Author Matthew Sakiestewa Gilbert brings a Hopi perspective to this history. His book calls attention to Hopi philosophies of running that connected the runners to their villages; at the same time it explores the internal and external forces that strengthened and strained these cultural ties when Hopis competed in US marathons. Between 1908 and 1936 Hopi marathon runners such as Tewanima, Zeyouma, Franklin Suhu, and Harry Chaca navigated among tribal dynamics, school loyalties, and a country that closely associated sport with US nationalism. The cultural identity of these runners, Sakiestewa Gilbert contends, challenged white American perceptions of modernity, and did so in a way that had national and international dimensions. This broad perspective linked Hopi runners to athletes from around the world—including runners from Japan, Ireland, and Mexico—and thus, *Hopi Runners* suggests, caused non-Natives to reevaluate their understandings of sport, nationhood, and the cultures of American Indian people.

Sub 4:00 Chris Lear, 2004-08-25 For more than three decades, not one American schoolboy had run a sub-4:00 mile. Then, in January 2001, Alan Webb clocked a 3:59.86 mile, the fastest indoor U.S. high school

mile ever. Just a few months later, the young track star achieved legendary status: he ran a 3:53.46 mile-a full 2 seconds faster than former record holder Jim Ryun. Everywhere Webb was hailed as America's Next Great Miler. In Sub 4:00, noted track writer Chris Lear follows Webb to college at the University of Michigan. As we witness Webb's freshman track season-watching him struggle with injuries, interpersonal conflicts, the politics of the collegiate track world, and his own aspirations to become the best miler ever-we get an unprecedented behind-the-scenes view of the life of one of the nation's most promising track athletes with a new chapter describing the latest developments in Webb's fascinating career.

A Theory of Architecture Nikos A. Salingaros,2021-04-02 More than a decade in the making, this is a textbook of architecture, useful for every architect: from first-year students, to those taking senior design studio, to graduate students writing a Ph.D. dissertation in architectural theory, to experienced practicing architects. It is very carefully written so that it can be read even by the beginning architecture student. The information contained here is a veritable gold mine of design techniques. This book teaches the reader how to design by adapting to human needs and sensibilities, yet independently of any particular style. Here is a unification of genuine architectural knowledge that brings a new clarity to the discipline. It explains much of what people instinctively know about architecture, and puts that knowledge for the first time in a concise, understandable form. Dr. Salingaros has experience in the organization of the built environment that few practicing architects have. The later chapters of this new book touch on very sensitive topics: what drives architects to produce the forms they build; and why architects use only a very restricted visual vocabulary. Is it personal inventiveness, or is it something more, which perhaps they are not even aware of? There has not been such a book treating the very essence of architecture. The only other author who is capable of raising a similar degree of passion (and controversy) is Christopher Alexander, who happens to be Dr. Salingaros' friend and architectural mentor. "Surely no voice is more thought-provoking than that of this intriguing, perhaps historically important, new thinker?" From the Preface by His Royal Highness, Charles, The Prince of Wales "A New Vitruvius for 21st-Century Architecture and Urbanism?" Dr. Ashraf SalamaChair, Department of Architecture and Urban Planning, Qatar University, Doha, Qatar "Architecture, Salingaros argues, is governed by universal and intuitively understood principles, which have been exemplified by all successful styles and in all civilizations that have left a record of themselves in their buildings. The solution is not to return to the classical styles... the solution is to return to first principles and build within their constraints... " Dr. Roger Scruton Philosopher, London, UK "A fundamental text, among the most significant of the past several years." Dr. Vilma Torselli Architect and Author, Milan, Italy "A Theory of Architecture demonstrates how mathematics and the social sciences offer keys to designing a humane architecture. In this brilliant tome Salingaros explains why many modern buildings are neither beautiful nor harmonious and, alternatively, how architects and patrons can employ scale, materials and mathematical logic to design structures which are exciting, nourishing, and visually delightful." Duncan G. Stroik Professor of Architecture, University of Notre Dame, Indiana "Salingaros explores ways to clarify and formalize our understanding of aesthetic forms in the built

environment, using mathematics, thermodynamics, Darwinism, complexity theory and cognitive sciences. Salingaros' remarkable observations suggest that concepts of complexity and scale can someday provide a full-bodied explanation for both the practice and the appreciation of architecture." Kim Sorvig Architecture & Planning, University of New Mexico See this book's Wikipedia entry http://en.wikipedia.org/wiki/A_Theory_of_Architecture Nikos A. Salingaros is an internationally known urbanist and architectural theorist who has studied the scientific bases underlying architecture for thirty years. Utne Reader ranked him as "One of 50 visionaries who are changing your world", and Planetizen as 11th among "The top 100 urban thinkers of all time". He is Professor of Mathematics at the University of Texas at San Antonio.
