**American Military Vehicles of World War I** Albert Mroz,2009-10-21 In World War I the American motor vehicle industry was tested by the sudden appearance of vast transport challenges. The nation's immense manufacturing capabilities and abundant natural resources combined with increased standardization and mass production to enable the industry to meet the military's needs. Motor vehicles and aircraft were quickly cemented as the most influential military tools of the early twentieth century. This book both describes the development and use of a wide range of specialized motor vehicles during World War I and analyzes how their advent indelibly altered modern warfare and transportation.

**Standard Military Motor Vehicles** United States. War Department,1943

**US Army and Marine Corps MRAPs** Mike Guardia,2013-11-20 The Mine Resistant Ambush Protected (MRAP) vehicle is the newest land warfare system in the United States Army and Marine Corps inventory. Designed to meet the challenges of operating in a counterinsurgency environment, the MRAP has taken survivability to a new level. MRAPs are currently manufactured by three companies: BAE Systems, Navistar International Military Group, and Force Protection Inc. Each company manufactures an MRAP according to one of three classifications set by the US Department of Defense: Category I, Category II, or Category III. The Category I MRAPs are designed for urban combat. Category II covers the MRAPs designed for convoy security, medical evacuation, and explosive ordnance disposal. The Category III MRAP performs the same function as Category II but is designed to carry more personnel. Since their introduction in 2007, MRAPs have performed remarkably in the asymmetric warfare environment. Their unique design and survivability characteristics have saved the lives hundreds of soldiers who otherwise would have been lost to landmines or IED attacks. As with any combat system, however, the MRAP is not without its drawbacks.

**Technicals** Leigh Neville,2018-04-19 Over the last 30 years, the 'technical' or armed pick-up truck has become arguably the most ubiquitous military land vehicle of modern warfare. Harking back to the armed Jeeps and Chevrolet trucks of the SAS and Long Range Desert Group in North Africa in World War II, the world's first insurgent technicals were those of the Sahrawi People's Liberation Army in Algeria in the late 1970s, followed by the Chadian use of technical in the so-called Toyota War against Libya. Since then, technicals have seen use in Somalia, Iraq, Afghanistan and Libya, as well as being used by Western and Russian Special Forces. Fully illustrated with commissioned artwork and providing rigorous analysis,

this is the first history of how this deceptively simple fighting vehicle has been used and developed in conflicts worldwide.

**The Kids' Guide to Military Vehicles** Lisa M. Bolt Simons, 2009-07 Describes a wide range of military vehicles, including wheeled and tracked vehicles, ships, airplanes, and unmanned vehicles--Provided by publisher.

*American Wheeled Armoured Fighting Vehicles* Michael Green, 2016-10-31 Numerous wheeled armoured fighting vehicles have seen service in the US armed forces on and off for over 80 years. There have been various changes of policy and twice, after the Second World War and Vietnam, they went out of favour but their use is now well established. This well researched and superbly illustrated book describes all the different types and variants since the first M1 was ordered in 1931. The M8 armoured car was widely used during World War Two but it was not until Vietnam that further wheeled AFVs came into service, notably the M706 armoured car. After a lull the US Marine Corps adopted the Light Armoured Vehicle (LAV) in 1983. The US Army first used armoured Humvees in 1994 and variants remain in service (M1141 and M1116). Other types today include the Guardian (M1117) and the Army version of the LAV names the Stryker. To meet the operational requirements of Iraq and Afghanistan the Mine Resistant Ambush Protected vehicle (MRAP) was ordered in bulk from 2007.

Special Forces Vehicles Pat Ware, 2012-10-24 A highly illustrated guide to the unconventional vehicles that help special forces succeed in asymmetrical warfare, from the author of *The Centurion Tank*. What is the ideal vehicle for special forces operations, for dangerous missions performed by small units of highly trained troops often working in enemy territory, behind enemy lines? And which vehicles have the world's armies selected, adapted and developed since modern special forces established themselves as a key arm of the military during the Second World War? Pat Ware, in this authoritative and highly illustrated book, uses all his expert knowledge of the history of military vehicles to show the fascinating variety of machinery that has been used, from converted Jeeps and Land Rovers to a bizarre collection of even more remarkable, sometimes purpose-built strike vehicles—the Scorpion, Cobra and Supacat Jackal, the LRDG Chevrolet, the Mechem, the Pinzgauer and the Warrior among them. As well as describing the anatomy of the typical special forces vehicle, with particular reference to the iconic SAS Jeeps and the Land Rover “Pink Panther,” he illustrates all of the known special forces vehicles, giving technical data, including information on power units and transmission, type of weapons, auxiliary equipment, armored protection, speed and mobility, and weight. He also explains the nature of special forces and describes their historic origins, with emphasis on units such as the LRDG, the SAS and Popski's Private Army during the Second World War, and he looks at modern special forces and their role.

**Humvee at War** Michael Green, When it entered army service in 1985, AM General's high-mobility multipurpose wheeled vehicle—better known as the Humvee—quickly assumed the status the World War II jeep enjoyed among an earlier generation of soldiers. *Humvee at War* showcases this iconic vehicle in the many roles and configurations it has taken on over the years—ambulance, troop transport, and armament carrier among them.

**German Military Vehicles of World War II** Jean-Denis G.G. Lepage, 2007-03-07 This volume presents a cross-section of the most common transport vehicles produced and used by the German army. Tanks plus auxiliary vehicles such as cars, motorcycles, vans, ambulances, trucks and

tractors made it possible for the troops to keep moving. These lightly armored or unarmored vehicles--aka soft skins--operated behind the front lines, maintaining supply lines, connecting armies with their home bases, and ultimately determining the outcome of battle. Beginning with the development of military vehicles in the early 1930s, this volume discusses the ways in which this new technology influenced and, to some extent, facilitated Hitler's program of rearmament. Nomenclature, standard equipment, camouflage and the combat roles of the various vehicles are thoroughly examined. Individual vehicle types are arranged and discussed by the following classifications: cars and motorcycles; trucks and tractors; half-tracks and wheeled combat vehicles. Accompanied by well-researched, detailed line drawings, each section deals with a number of individual vehicles, describing their design, manufacture and specific use.

**Special Operations Patrol Vehicles** Leigh Neville, 2011-09-20 The patrol vehicles used by Special Operations Forces in Afghanistan and Iraq vary quite dramatically between the theatres as well as amongst the Coalition members, and have been developed and upgraded to meet the demands of the deployment. Covering all the major Coalition nations, Leigh Neville continues his look at the elite forces deployed in Operations Enduring Freedom and Iraqi Freedom, with this analysis of their vehicles. Tracing the evolution of the vehicle types, from their historical precedents, through their designs to their operational developments, he discusses their advantages and disadvantages, along with their tactical employment. From the mine-protected vehicles used to counter the IED threat in Iraq, the use of Strykers as armoured raiding platforms by the US Rangers, to the civilian vehicles adapted for military service by both Coalition troops and Private Military Contractors in the regions, this book uses rare in-theatre photographs and colour artwork to show the variety and inventiveness of the patrol vehicles being used in combat today.

**M8 Greyhound Light Armored Car 1941-91** Steven J. Zaloga, 2012-09-20 The M8 light armored car was the only significant wheeled combat vehicle used by the US Army in World War II. In conjunction with the lightly armed utility version, the M20, it was the staple of the army's cavalry squadrons for use in reconnaissance and scouting. First entering combat in Italy in 1943, it was widely used throughout the campaign in northwest Europe, though its off-road performance was found to be wanting. This title describes the design and development of the M8, covering the many variants that were produced during World War II and afterwards, along with a comprehensive survey of its operational use.
