Unfinished Business Haruo Iguchi, 2020-03-23

Ayukawa Yoshisuke (1880–1967) was the founder of the Nissan conglomerate and the leader of the Manchuria Industrial Development Corporation, one of the linchpins of Imperial Japan's efforts to economically exploit its overseas dependencies. Despite his close association with the Japanese government from the 1920s to the 1950s, Ayukawa was a proponent of free trade and global economic interdependence. He sought to lessen state control of Japan's economy by trying to attract foreign—especially American—capital and technology in the years surrounding World War II. In the postwar era in particular, Ayukawa actively pushed the growth of small- and medium-sized firms, yet his efforts were ultimately unsuccessful. In *Unfinished Business*, through exploring the reasons for Ayukawa's failure, Haruo Iguchi illuminates many of the economic problems of today's Japan.

The Lonely Egotist (Yaoi Novel) Hikaru

Masaki, 2009-03-25 Designer Minami Kusaga's first project with his new employer Tomato Design is a big one—planning the interiors for a successful chain of hotels, owned by the mysterious and attractive Shinya Asakura. Tomato Design's continued success rides on the rookie Minami satisfying his client, but just as Asakura's hotels aren't your average homes away from home—they're love hotels, where couples can enjoy themselves in luxurious privacy—Shinya Asakura is definitely not your ordinary entrepreneur. He's not just a fan of Minami's work, he's after Minami himself! Asakura's aggressive seduction tactics paint a portrait of a man who has—and gets—everything he wants in life. Minami is overwhelmed and confused by his attentions, and unable to resist them. Suddenly every phone call and every meeting with Asakura

draws Minami deeper into his web of control, leaving Minami torn between the new feelings Asakura inspires in him and his loathing of the hotelier's selfish, relentless behavior—but is he really as awful as he seems? Can Minami keep his client happy while staying out of his bed? Can he resist Asakura's charms—or does he even want to?

Solid State NMR Spectroscopy for Biopolymers Hazime Saitô, Isao Ando, Akira Naito, 2006-08-05 “Biopolymers” are polymeric materials of biological origin, including globular, membrane, and fibrous proteins, polypeptides, nucleic acids, po- saccharides, lipids, etc. and their assembly, although preference to respe- ive subjects may be different among readers who are more interested in their biological significance or industrial and/or medical applications. Nevert- less, characterizing or revealing their secondary structure and dynamics may be an equally very important and useful issue for both kinds of readers. Special interest in revealing the 3D structure of globular proteins, nucleic acids, and peptides was aroused in relation to the currently active Structural Biology. X-ray crystallography and multidimensional solution NMR sp- troscopy have proved to be the standard and indispensable means for this purpose. There remain, however, several limitations to this end, if one intends to expand its scope further. This is because these approaches are not always straightforward to characterize fibrous or membrane proteins owing to extreme difficulty in crystallization in the former, and insufficient spectral resolution due to sparing solubility or increased effective molecular mass in the presence of surrounding lipid bilayers in the latter.

Expressive Japanese Senko K. Maynard, 2005-02-28 Feelings play an enormous part in our lives, but their expression is often neglected in foreign language education. How do I communicate happiness, surprise, or

anger? How do others communicate these emotions to me? Such questions become increasingly relevant as we become more competent in the language we are learning. Expressive Japanese is the first detailed guide to emotion words and expressive strategies for students of the language. Words connoting feelings, such as *kanashii* (sad), are important in everyday Japanese conversation, but communicating emotions effectively also requires the use of expressive strategies, such as *Nani?* (What the heck?), *Yattaa!* (I did it!), or *Hottoite!* (Leave me alone!). Introductory chapters examine the characteristics, constraints, and history of expressive Japanese and discuss linguistic variations and styles and how these play a part in conveying emotion and empathy. There follow more than seventy entries that draw on hundreds of authentic examples taken from a variety of sources, including television dramas, comics, interviews, novels, essays, newspaper articles, and web sites. In these examples, students will find playful and creative uses of expressions that do not usually appear in language textbooks. English cues and key Japanese expressions are indexed at the back of the volume, making this a handy reference for anyone who possesses a grasp of the fundamentals of elementary Japanese. Based on extensive research by a prominent linguist and teacher, Expressive Japanese brings learners into the world of real human interaction and effectively illustrates how native speakers use language to convey identity and a sense of self as well as to communicate feelings and emotion.

Linguistic Emotivity Senko K. Maynard, 2002-07-26
Linguistic Emotivity explores expressive and emotive meanings in Japanese from the perspective of the Place of Negotiation theory. The Place of Negotiation theory provides a framework for understanding how linguistic

signs function in the place of communication (in cognitive, emotive, and interactional places). The theory finds the indexicality of a sign fundamental and views meanings as being negotiated among interactants who share not only information but, more significantly, feelings. Using analytical tools recognized in conversation and discourse analyses, the book analyzes emotive topics (vocatives, emotive nominals, quotative topics, etc.) and emotive comments (da and ja-nai, interrogatives, stylistic shifts, etc.) in contemporary Japanese discourse. It argues for the importance of emotivity in Japanese, in the context of the Japanese culture of pathos. Linguistic Emotivity challenges the traditional view of language that privileges logos, form, information, and abstraction, and instead, it proposes a philosophical shift toward pathos, expression, emotion, and linguistic event/action.

The Manchurian Crisis and Japanese Society, 1931-33 Sandra Wilson, 2003-08-27 This book explores the reactions to the Manchurian crisis of different sections of the state, and of a number of different groups in Japanese society, particularly rural groups, women's organizations and business associations. It thus seeks to avoid a generalized account of public relations to the military and diplomatic events of the early 1930s, offering instead a nuanced account of the shifts in public and popular opinion in this crucial period.

Sayonara Zetsubou-Sensei Koji Kumeta, 2013-07-16 From the savage mind of Koji Kumeta-a twisted trip of deliciously wicked proportions One of Zetsubou-sensei's new students-a genius storyteller-can melt even her teacher's black heart. Meanwhile, Chiri, the obsessive-compulsive girl who longs to marry Zetsubou-sensei, is thrilled when the morose young man actually invites her

somewhere. Has Zetsubou-sensei asked Chiri out on a date, or is he planning a murder-suicide? Either option may involve flowers! Includes special extras after the story!

This is a biennial symposium, which started as AMiRE 2001 at the Heinz Nixdorf Institute of the University of Paderborn, Germany, in 2001, and was followed by AMiRE 2003 at Queensland University of Technology, Brisbane, Australia, in 2003. After these successful symposia, AMiRE 2005 is held under the sponsorship of the Faculty of Engineering, University of Fukui and under the co-sponsorship of the IEEE Robotics and Automation Society. It is funded by the Fukui Convention Bureau and the University of Fukui. Each full-length paper submitted to the symposium was independently reviewed by 3 referees from the world's

front-line researchers, and 55 papers were accepted for oral presentation. We acknowledge generous support for those who gave excellent reviews in order to maintain the high standards of the symposium despite a very tight schedule.

Annual Reports on NMR Spectroscopy ,1997-06-24
NMR is used in all areas of modern science, and its applications continue to grow. In 1995 we celebrated the 50th anniversary of the discovery of NMR Spectroscopy and almost 30 years since the appearance of the first volume of Annual Reports on NMR Spectroscopy. During these years, a large and diverse collection of topics have been covered, and the contents of Volume 34 are no exception. This volume consists of six chapters covering a wide range of polymer science topics. Each chapter demonstrates the unique ability of NMR to provide information of both general and special interests.

Minami Nanami Wants to Shine, Vol. 1 Yuki Yaku,2022-03-22 From the pages of the hit light novel series Bottom-Tier Character Tomozaki comes a spin-off manga by the original author where beloved classmate Mimimi is the star! Whether doing high jumps or blending with a crowd, Minami Nanami has always been flexible both physically and socially. But when her friend Aoi outshines her at her track-and-field specialty, Mimimi starts to wish for something more, a light to claim as her own. As she contemplates her talents, her mom asks if she'll model in a local ad for her makeup company. Faced with an unfamiliar challenge, can Mimimi find herself in this dazzling new world?

Modern Magnetic Resonance Graham A. Webb,2007-05-26 A comprehensive collection of the applications of Nuclear Magnetic Resonance (NMR), Magnetic Resonance Imaging (MRI) and Electron-Spin Resonance (ESR). Covers the wide ranging disciplines in which these techniques are used: * Chemistry; * Biological Sciences; * Pharmaceutical Sciences; * Medical uses; * Marine Science; * Materials Science; * Food Science. Illustrates many techniques through the applications described, e.g.: * High resolution solid and liquid state NMR; * Low resolution NMR, especially important in food science; * Solution State NMR, especially important in pharmaceutical sciences; * Magnetic Resonance Imaging, especially important for medical uses; * Electron Spin Resonance, especially important for spin-labelling in food, marine and medical studies.
