International Warbirds John C. Fredriksen,2001-08-01 In depth descriptions and photographs of the aircraft of 21 nations presented with a unique human dimension that goes behind the machines to the people involved. Invaluable for specialists, accessible to enthusiasts, International Warbirds: An Illustrated Guide to World Military Aircraft, 1914-2000 puts the most legendary fighter aircraft of the 20th century developed outside the United States on vivid display. It offers 336 illustrated biographies of the most significant warplanes used in squadron service from World War I to the Balkan conflict, including numerous models from Great Britain, France, Russia, and Japan, as well as notable machines from Israel, Canada, China, India, Brazil, and other nations. Entries span the history and scope of military aircraft from bombers and fighters to transports, trainers, reconnaissance craft, sea planes, and helicopters, with each capsule history combining nuts-and-bolts technical data with the story of that model's evolution and use. Together, these portraits offer an exciting, well-researched tribute to visionary designers and builders as well as courageous pilots and crews across the globe, and tell a vivid tale of how air power became such a decisive factor in modern warfare.

The Hush-Kit Book of Warplanes Joe Coles,2022-12-08 'Irresistible . . . My aviation title of the year' Rowland White 'Stupendously brilliant . . . Completely addictive' James Holland 'The most explosive book about aircraft ever' Jim Moir, aka Vic Reeves From the terror and exhilaration of First World War dogfighting to the dark arts of modern air combat, here is an enthralling ode to that most brutally exciting of machines: the warplane. The Hush-Kit Book of Warplanes is a beautifully designed, highly illustrated collection of the very best articles from Hush-Kit - the world's leading alternative aviation online magazine - combined with a heavy punch of new and exclusive pieces. It contains a wealth of brilliant material, from Top 10 lists and historical deep-dives to interviews with legendary fighter pilots and expert analysis of weapons, tactics and technology. This knowledge and impeccable research is balanced throughout with the irreverent attitude, wicked satire and sharp eye for the absurdities of the aeronautical world that have made the magazine so popular with its readers. The book itself is also a stunning object, featuring first-rate photography alongside original, specially commissioned artwork. Inside it you will find: Interviews with pilots of the F-14 Tomcat, the Mirage, the MiG-25, the English Electric Lightning, the Rafale and the B-52 among others. Comprehensive surveys including 'The Ultimate Biplane Fighters', '10 Incredible Cancelled Military Aircraft' and 'Aviation Myths You Shouldn't Believe'. Fascinating insights into obscure and overlooked warplanes. Unbelievable accounts of the most bizarre moments in aviation history. And much, much more.

Indo-Russian Military and Nuclear Cooperation Jerome M. Conley,2001 In this book Jerome M. Conley argues that strained Indo-American relations stem from a deep nexus of historical factors. Conley begins his examination of the delicate balance of power in the region by looking back to the Moscow-New Delhi deal during the Cold War. He argues that the dialogue between the United States, India, and Russia that was established during this era has persisted only because of American ambivalence, short-term Indian needs, and Russian economic trends. Consequently, the United States must sow the seeds for long-term trust and

cooperation with India to ensure limited and controlled nuclear expansion. This book will appeal to international affairs and security studies scholars, foreign policy historians, and anyone interested in exploring the complexities of regional strategic arms control.

The Arms Production Dilemma Randall Forsberg,1994 The studies show how military strategy, planned forces, and the age of systems in the current inventory affect the domestic demand for new production; how the recent drop in domestic demand affects arms industries; and the extent to which governments and firms in the arms-producing nations are turning to exports to sustain the industries. In the shrinking arms market of the post-Cold War era, countries with advanced arms industries face difficult choices concerning force size, arms production, arms export, and defense industrial capacity. This book explores the links among these issues through a detailed study of the combat aircraft industries in the United States, Russia, Britain, France, Germany, Italy, and Sweden--the seven countries that develop, produce, and export all of the world's technologically advanced weapon systems. The studies show how military strategy, planned forces, and the age of systems in the current inventory affect the domestic demand for new production; how the recent drop in domestic demand affects arms industries; and the extent to which governments and firms in the arms-producing nations are turning to exports to sustain the industries. Stunning changes in Russia's combat aircraft forces, industry, and strategy are detailed here for the first time, as are expected future Russian combat aircraft exports to China. Newly compiled data also show that in the United States and Russia and globally, arms production for export will exceed production for domestic use for the first time in history, starting in 1995. Arms production is thus increasingly dominated by commercial rather than security interests. Ultimately at issue is whether governments will exploit the opportunity offered by the dramatic post-Cold War contraction of the world arms market to reduce their armed forces and constrain international arms trade while shrinking the arms industry--or keep pushing arms exports that generate new threats and justify larger armed forces, more arms production, and bigger arms industries.

Routledge Library Editions: Political Protest Various Authors,2022-07-30 This 26-volume set is a wide-ranging, time- and subject-spanning examination of the phenomenon of political protest. What drives people to take to the streets, and how do their governments respond? These questions and many more are analysed in areas as varied as sixteenth-century German peasant uprisings, revolutionary Russians at the Paris Commune, women protesting nuclear weapons at Greenham Common, and the role Christianity played in protests across the ages. An impressive reference resource, this set also looks at the policing of protests and official responses to them.
