- 🔍 **Osa-class Missile Boat** Zdzislaw Krygier,2018-11-05 Progression in development of Osa-class missile boats revolutionized naval warfare. Even though those ships were considered very small marine vessels, they constituted one of the most numerous boat types in the history of shipbuilding. There were more than 400 units built in total.
- 🔍 **From Monitor to Missile Boat** George Paloczi-Horvath,1996 This volume is a study of a key of warship history, the specialist coastal defence ship. From its origin in the monitors of the American Civil War, the type grew into miniature battleships, intended to give countries with no overseas ambitions a credible naval defence. Because of the constraints of size and draught, these ships became very sophisticated concepts, and this text explores their design philosophy.
- 🔍 **The Boats of Cherbourg** Abraham Rabinovich,1997 The story of the revolutionary missile boat used by Israel in the Yom Kippur War.
- 🔍 **US Patrol Torpedo Boats** Gordon L. Rottman,2011-12-20 ALSO AVAILABLE AS AN E-BOOK. Motor torpedo boat development began in the early 1900s, and the vessels first saw service during World War I. However, it was not until the late 1930s that the US Navy commenced the development of the patrol torpedo or PT boat. The PT boat was designed for attacking larger warships with torpedoes using its ‘stealth’ ability, high-speed and small size to launch and survive these attacks – although they were employed in a wide variety of other missions, including rescuing General MacArthur and his entourage from the Philippines. This book examines the design and development of these unique craft, very few of which survive today, and goes on to examine their role and combat deployment in World War II.
- 🔍 **Naval Fast Strike Craft and Patrol Boats** Roy McLeavy,1979
- 🔍 **From Ice-Breaker to Missile Boat** Moshe Tzalel,2000-06-30 As a small nation in a hostile region, Israel has made defense a top priority. Tzalel takes a critical look at the naval branch of Israel’s defense forces to consider its history, its performance, and its overall importance to maintaining national security. From a motley collection of illegal immigrant ships operated prior to the birth of the state, the Israelis have since the 1960s established a modern navy. However, Tzalel argues, the modernization and expansion of the Israeli navy has been driven more by an excess of funds and the lack of clearly defined priorities than by any real necessity. Like most small countries, Israel has no need to command the sea during peace or in wartime. The author examines each step of naval development by direct correlation to the perceived need for each new phase and the circumstances that led naval and military leaders to make specific choices, and he discusses the benefits of these choices on the field of battle. He hopes to map the complex relationship between the navy men, the Israeli government, and public sentiment. Although the nation has managed to create a new and impressive class of warship, the Sa’ar FAC(M) and its larger derivatives, Tzalel contends that the military logic behind such naval construction was faulty and that the nation’s submarine flotilla constitutes a sheer waste of monetary and human resources.
- 🔍 **Employing Land-Based Anti-Ship Missiles in the Western Pacific** Terrence K. Kelly,Anthony Adler,Todd Nichols,Lloyd Thrall,2013-10-08 Land-based anti-ship missiles (ASMs) feature prominently in the capabilities of many island nations in the Western Pacific, but the United States currently lacks such systems. This report illustrates the potential strategic advantages of the United States working with partners to build a coalition ASM capability, particularly in the event of a conflict with China, and includes an assessment of logistical challenges and positioning approaches.
- 🔍 **US Navy Cold War Guided Missile Cruisers** Mark Stille,2020-02-20 Faced with an increasingly formidable anti-ship cruise missile threat from the Soviet Union in the early days of the Cold War, and with the recent memory of the kamikaze threat from World War II, the USN placed a great priority on developing air defence cruise missiles and getting them to sea to protect the fleet. The first of these missiles were sizable, necessitating large ships to carry them and their sensors, which resulted in the conversion of a mix of heavy and light cruisers. These ships, tasked with protecting carrier groups and acting as flagships, entered service from 1955 and served until 1980. The cruisers served in the front lines of the Cold War and many saw combat service, engaging in surface actions from Vietnam to the Persian Gulf. Complementing the conventionally-powered missile cruisers was a much smaller number of expensive nuclear-powered cruisers, including the Long Beach, the USN’s largest-ever missile cruiser. Until replaced by the Ticonderoga and Burke classes of Aegis ships, the USN’s 38 missile cruisers were the most capable and important surface combatants in the fleet and served all over the globe during the Cold War. Using specially commissioned artwork and meticulous research, this illustrated title explores the story of these cruisers in unparalleled detail, revealing the history behind their development and employment.

- 🔍 **Ships, Aircraft, and Weapons of the United States Navy** United States. Navy Department,1980
- 🔍 **Directed Energy and Fleet Defense: Implications for Naval Warfare**,2000 The introduction of directed energy weapons into twenty-first century naval forces has the potential to change naval tactics as fundamentally as the transition from sail to steam. Recent advances in directed energy technologies have made the development of both high-energy laser and high-power microwave weapons technically feasible. This study examines the potential adaptation of such weapons for the defense of naval forces. This study considers options for using directed energy systems on naval vessels in the context of the U.S. maritime strategy and emerging threats in international politics. The framework for this study is an integrated system of microwave devices, high-energy lasers, and surface-to-air missiles which are evaluated in terms of their ability to enhance anti-ship cruise missile defense, tactical air defense, and fast patrol boat defense. This study also examines collateral capabilities, such as non-lethal defensive measures and countersurveillance operations. The global proliferation of increasingly sophisticated weapons and the expanding demands placed on its ever-smaller navy require the United States to reassess its current approach to fleet operations. This study concludes that directed energy technology has made sufficient progress to warrant the development of sea-based weapons systems for deployment in the first two decades of the next century. For operational and technical reasons, a Nimitz class aircraft carrier may be the preferred platform for the initial implementation of directed energy weapons. If successful, the robust self-defense capability provided by directed energy weapons will permit a fundamental shift in carrier battle group operations from a massed, attrition oriented defense to a more dynamic, dispersed offense.
- 🔍 **From Monitor to Missile Boat** George Paloczi-Horvath,1996 The coastal defense ship is explored in this the first comprehensive study of a previously ignored aspect of warship history.
- 🔍 **Warships** Rob Scott Colson,2013-01-15 Readers are taken through the history of warships from the time of sails to modern day battleships. Clear text explains new advances in engineering and design. Facts and statistics will keep readers absorbed from cover to cover.
- 🔍 **Transition to Triumph** G. M. Hiranandani,2000
- 🔍 **Swift Boat Down** James Steffes,2023-01-09 A Swift Boat is sunk by two rockets from an unidentified aircraft near the border between North and South Vietnam. It is June 15/16th, 1968, around midnight, and now five sailors are dead or missing. Two survivors and several witnesses report seeing lighted aircraft that move and hover like helicopters flying in the area. U.S. jets are scrambled to the scene and report hits on enemy aircraft. The following night the jets return hunting the elusive helicopters and in the confusion, one American cruiser and one Australian frigate, are hit by air-to-air missiles. The result is two dead and eleven wounded aboard the Australian ship and minor damage to the American cruiser. An investigation, based on pieces of U.S. missiles found on the two ships, determine that it was “friendly fire”. This sailor was aboard another Swift Boat, PCF-12, patrolling south of the sunken boats position. Ordered to the scene to assist in the rescue, PCF-12 came under attack by helo type aircraft, identified as hostile, receiving one rocket and machine gun fire. This Swift Boat returned a deadly barrage of 50 caliber machine gun and other small arms fire causing the two helos to break contact and run away. The crew believes that one of the helos was damaged or shot down by this hail of gunfire. The investigation findings were “friendly fire” mostly because of the lack of wreckage of the helos and the pieces of Sparrow missiles found on board USS Boston and HMAS Hobart. News accounts attempted to connect the two incidents by blaming the same pilots for attacking the ships and sinking the Swift Boat. This book uses official records, logs, and message traffic to back up eye witness testimonies that refute the “friendly fire” decision. There are many people affected by this story. Those of us that were there have carried pieces of this incident in our memories for 37 years. Families and friends of the dead and missing have wondered about the truth behind the decision of “friendly fire” vs “hostile fire”. This book will answer many of those questions and put many lives at rest again. James W. Steffes ENC, USN Retired
- 🔍 **The U.S. Navy’s “Interim” LSM(R)s in World War II** Ron MacKay, Jr.,2016-04-12 The Interim LSM(R) or Landing Ship, Medium (Rocket) was a revolutionary development in rocket warfare in World War II and the U.S. Navy’s first true rocket ship. An entirely new class of commissioned warship and the forerunners of today’s missile-firing naval combatants, these ships began as improvised conversions of conventional amphibious landing craft in South Carolina’s Charleston Navy Yard during late 1944. They were rushed to the Pacific Theatre to support the U.S. Army and Marines with heavy rocket bombardments that devastated Japanese forces on Okinawa in 1945. Their primary mission was to deliver maximum firepower to enemy targets ashore. Yet LSM(R)s also repulsed explosive Japanese speed boats, rescued crippled warships, recovered hundreds of survivors at sea and were deployed as antisubmarine hunter-killers. Casualties were staggering: enemy gunfire blasted one, while kamikaze attacks sank three, crippled a fourth and grazed two more. This book provides a comprehensive operational history of the Navy’s 12 original Interim LSM(R)s.
- 🔍 **Born Arming** A. F. Mullins,1987 A Stanford University Press classic.
- 🔍 **The System States Rebellion** Dietmar Arthur Wehr,2019-11-13 This omnibus edition includes all three books of the System States Rebellion series with over 200,000 words of military SF action. Included in this ebook are the following novels; Rumors of Glory; Rumors of Honor and Rumors of Salvation. The first book, Rumors of Glory, can still be downloaded individually and is free. After centuries of peaceful expansion under the auspices of the Federation of Planetary States, some of the more developed colonies have had enough of the economic exploitation by Earth-chartered companies and attempt to secede. The rebellion soon expands in both scope and violence beyond the expectations of both sides. As the war drags on year after year, it takes an unexpected turn and puts not only human civilization at risk but human existence as well. This ebook has both space and ground battles, high level strategy, personal triumphs and tragedies.
