*The Guided-Missile Frigate Orp Kosciuszko* Witold Koszela,2019-02-28 The rocket missile ORP Gen. T. Kosciuszko is currently one of the more valuable Polish Navy ships. Belonging to the American type Oliver Hazard Perry, together with the twin ship ORP Gen. K. Pulaski, he went under the white-and-red flag under an agreement between the governments of the United States and the Republic of Poland. The ship was built as USS Wadsworth with a tactical number FFG 9 at the Todd Pacific Shipyards in San Pedro, California.

**Project 11356/M Guided Missile Frigate** Hugh Harkins,2021-05-11 The Project 11356/M Guided Missile Frigate/Guard Ship was initially developed by Severnoye Design Bureau in Russia to meet an Indian Navy requirement that emerged as the Talwar and Teg Class respectively. The basic design, which was, in 2009, selected for service with the Russian Federation Black Sea Fleet as the Project 11356M, could conduct the full spectrum of Frigate related missions - anti-air warfare, anti-submarine warfare and surface strike etc., courtesy of advanced mission sensors and weapon systems.The volume sets out to detail the Project 11356/M design, sensors, incorporated weapon systems and entry into service with the Indian and Russian Federation navies. All technical data relating to the respective ship platforms, sensors, weapon systems and components have been furnished by the respective design bureaus, builders and operators, as has the imagery/graphics.

**Warship 12** Henk Visser,2021-10-25 Both Tromp-class frigates entered service in 1975/76. Their primary task was area air defence. They acted as flagships for the COMNLTG (Commander Netherlands Task Group). Because of their large radome (wich housed a 3D radar antenna) the ships had the nickname Kojak after the bald-headed actor in the famous action crime tv-series.

**Navy Frigate (FFG(X)) Program** Ronald O'Rourke,2019-10-21 The FFG(X) program is a Navy program to build a class of 20 guided-missile frigates (FFGs). The Navy wants to procure the first FFG(X) in FY2020, the next 18 at a rate of two per year in FY2021-FY2029, and the 20th in FY2030. The Navy's proposed FY2020 budget requests \$1,281.2 million for the procurement of the first FFG(X). The Navy's FY2020 budget submission shows that subsequent ships in the class are estimated by the Navy to cost roughly \$900 million each in then-year dollars. The Navy intends to build the FFG(X) to a modified version of an existing ship design-an approach called the parent-design approach. The parent design could be a U.S. ship design or a foreign ship design. At least four industry teams are reportedly competing for the FFG(X) program. Two of the teams are reportedly proposing to build their FFG(X) designs at the two shipyards that have been building Littoral Combat Ships (LCSs) for the Navy-Austal USA of Mobile, AL, and Fincantieri/Marinette Marine (F/MM) of Marinette, WI. The other two teams are reportedly proposing to build their FFG(X) designs at General Dynamics/Bath Iron Works, of Bath, ME, and Huntington Ingalls Industries/Ingalls Shipbuilding of Pascagoula, MS. On June 20, 2019, the Navy released its Request for Proposals (RFP) for the Detail Design and Construction (DD&C) contract for up to 10 ships in FFG(X) program (the lead ship plus 9 option ships). Responses to the RFP are due by August 22, 2019. The Navy plans to award the contract in July 2020.

**US Navy Frigates of the Cold War** Mark Stille,2021-06-24 Though they were never the most glamorous of warships, found US Navy frigates were frequently found on the frontlines of the Cold War at sea. These warships were the descendants of World War II's destroyer escorts, designed primarily to escort convoys. They specialized in anti-submarine warfare, but were intended to be numerous, tough, versatile, and well-armed enough to show US naval power around the world, performing roles that varied from intercepting drug-smugglers to defending aircraft carriers. When the Cold War turned hot, frigates were often there. It was a US Navy frigate, Harold E. Holt, that conducted the US Navy's first hostile boarding action since 1826 during the SS Mayaguez incident. Frigates were at the forefront of operations in the Persian Gulf during the Tanker War, with the frigate USS Stark suffering a notorious Exocet attack by Iraqi warplanes, and proving the Oliver Hazard Perry-class's legendary toughness. This book explains how the technology and design of frigates changed during the Cold War, how the classes were modified to keep up to date, and explores the many varied missions they performed during the Cold War and since.

*No Higher Honor* Bradley Peniston,2013-01-15 Like its World War II namesake of Leyte Gulf fame, USS Samuel B. Roberts (FFG 58) was a small combatant built for escort duty. But its skipper imbued his brand-new crew with a fighting spirit to match their forebears, and in 1988 when the guided missile frigate was thrust into the Persian Gulf at the height of the Iran-Iraq War, there was no better ship for the job. Forbidden to fire unless fired upon, Captain Paul Rinn and his crew sailed amid the chaos in the Gulf for two months, relying on wit and nerve to face down fighter jets and warships bent on the destruction of civilian vessels. Their sternest test came when an Iranian mine ripped open the ship's engine room, ignited fires on four decks, and plunged the ship into darkness. The crew's bravery and cool competence was credited with keeping the ship afloat, and its actions have become part of Navy lore and a staple of naval leadership courses ever since. This is the first book to record the Roberts' extraordinary tale. After years of research and interviews with crewmembers, journalist Bradley Peniston chronicles the crew's heroic efforts to save the ship as they fought flames and flooding well into the night. The author also describes the frigate's origins, its operational history, and the crew's training. Peniston's personal approach to the subject not only breathes life into the historical narrative but gives readers an opportunity to get to know the individuals involved and understand the U.S. retaliation to the mining and the battle that evolved, setting the stage for conflicts to come.

**Options for Combining the Navy's and the Coast Guard's Small Combatant Programs** Eric Jackson Labs,United States. Congressional Budget Office,2009 As part of their long-term procurement strategies, the Navy and the Coast Guard are each in the process of developing and building two types of small combatants. The Navy is building two versions of its new littoral

combat ship, and the Coast Guard is building replacements for its existing classes of high-endurance cutters and medium-endurance cutters. Although all four types of ship are about the same size, they are designed to perform different missions. If the Navy's and Coast Guard's plans for their small combatant programs are fully implemented, the two services combined will spend over \$47 billion over the next 20 years purchasing 83 of those ships. In light of the many pressures on the budgets of the Navy and the Coast Guard, some policymakers and analysts have questioned whether the services could combine their small combatant programs in ways that still meet their requirements but save money. This Congressional Budget Office (CBO) paper, prepared at the request of the Ranking Member of the Senate Budget Committee, examines three alternatives that might allow the Navy and the Coast Guard to consolidate their small combatant programs.-- Preface.

*As I Remember* James Alden Barber Jr.,2013-05-17 About The Book A professional naval officer reflects on a long and varied career in this memoir intended for family only. In his time Captain Barber has been a warrior, a scholar, a seafarer and a teacher. Here he recounts the experiences of a career that has been full, sometimes exciting, and always rewarding.

British Destroyers & Frigates Norman Friedman,2012-10-22 “A comprehensive survey of the design history and development of the Royal Navy's greyhounds of the sea.”—WARSHIPS Magazine Since World War II, the old categories of destroyer and frigate have tended to merge, a process that this book traces back to the radically different “Tribal” class destroyers of 1936. It deals with the development of all the modern destroyer classes that fought the war, looks at the emergency programs that produced vast numbers of trade protection vessels—sloops, corvettes and frigates—then analyzes the pressures that shaped the post-war fleet, and continued to dominate design down to recent years. Written by America's leading authority and featuring photos and ship plans, it is an objective but sympathetic view of the difficult economic and political environment in which British designers had to work, and benefits from the author's ability to compare and contrast the US Navy's experience. Norman Friedman is renowned for his ability to explain the policy and strategy changes that drive design decisions, and his latest book uses previously unpublished material to draw a new and convincing picture of British naval policy over the previous seventy years and more. Includes photos

*US Navy Cold War Guided Missile Cruisers* Mark Stille,2020-02-20 Faced with an increasingly formidable anti-ship cruise missile threat from the Soviet Union in the early days of the Cold War, and with the recent memory of the kamikaze threat from World War II, the USN placed a great priority on developing air defence cruise missiles and getting them to sea to protect the fleet. The first of these missiles were sizable, necessitating large ships to carry them and their sensors, which resulted in the conversion of a mix of heavy and light cruisers. These ships, tasked with protecting carrier groups and acting as flagships, entered service from 1955 and served until 1980. The cruisers served in the front lines of the Cold War and many saw combat service, engaging in surface actions from Vietnam to the Persian Gulf. Complementing the conventionally-powered missile cruisers was a much smaller number of expensive nuclear-powered cruisers, including the Long Beach, the USN's largest-ever missile cruiser. Until replaced by the Ticonderoga and Burke classes of Aegis ships, the USN's 38 missile cruisers were the most capable and important surface combatants in the fleet and served all over the globe during the Cold War. Using specially commissioned artwork and meticulous research, this illustrated title explores the story of these cruisers in unparalleled detail, revealing the history behind their development and employment.

*Missiles: Defense Programs, Threats and Types* Maik Schiffer,2020-04-22 The United States has been developing and deploying ballistic missile defenses (BMD) to defend against enemy missiles continuously since the late 1940s. Chapter 1 gives a brief history of the BMD Program. For over half a century, the Department of Defense (DOD) has funded efforts to defend the United States from ballistic missile attacks. The Missile Defense Agency (MDA) developing missile defense capabilities to defend the United States, deployed forces, and regional allies from missile attacks. Chapter 2 addresses for fiscal year 2018 (1) the progress MDA made in achieving delivery and testing goals and (2) the extent to which MDA made progress in developing and delivering integrated regional BMDS capabilities. Chapter 3 discusses (1) the challenges MDA and the defense intelligence community face in meeting the agency's threat assessment needs and (2) the extent to which MDA engages the defense intelligence community on missile defense acquisitions. Foreign countries have made advancements in their nuclear weapons and ballistic missile programs. Chapter 4 reports on the current status of North Korea's nuclear weapons and ballistic missile programs, while chapter 5 provides information on Iran's ballistic missile capabilities. Members of Congress and Pentagon officials have placed a growing emphasis on U.S. programs to develop hypersonic weapons as a part of an effort to acquire the capability for the United States to launch attacks against targets around the world in under an hour. Chapter 6 focuses, primarily, on the Pentagon's ongoing program to develop ballistic missile-based conventional prompt strike systems. The Navy undertook a conceptual design phase for the FFG(X) Guided Missile Frigate program that enabled industry to inform FFG(X) requirements, identify opportunities for cost savings, and mature different ship designs. Chapter 7 addresses the FFG(X) acquisition approach and contracting plans. Chapter 8 provides background information and issues for Congress on the Aegis ballistic missile defense (BMD) program, which is carried out by the Missile Defense Agency (MDA) and the Navy, and gives Navy Aegis cruisers and destroyers a capability for conducting BMD operations.
