Restoring Tropical Forests Stephen D. Elliott, David Blakesley, Kate Hardwick, 2013 Restoring Tropical Forests is a user-friendly guide to restoring forests throughout the tropics. Based on the concepts, knowledge and innovative techniques developed at Chiang Mai University's Forest Restoration Research Unit, this book will enable

improvements in existing forest restoration projects and provide a key resource for new ones. The book presents three aspects of the restoration of tropical forest ecosystems: the concepts of tropical forest dynamics and regeneration that are relevant to tropical forest restoration, proven restoration techniques and case studies of their successful application, and research methods to refine such techniques and adapt them to local ecological and socio-economic conditions.

Climbing the Mountain Allan Moffat, John

Smailes, 2017-09-27 Allan Moffat is one of the legends of Australian motor sport. His extraordinary driving career, which lasted from the mid-1960s to the late 1980s, coincided with the heyday of touring car racing. His achievements included 32 Australian Touring Car wins, four of them at Bathurst, and four Championships. His Trans Am Mustang, surely the definitive racing touring car of all time, claimed more than 100 victories. But Moffat's impact went well beyond the winner's podium. He brought a new level of business professionalism to motor racing, pioneering the use of sponsorship in a way that would change the sport forever. Moffat, intense, reserved and driven, has been known as a man of few words. For years motor-sport fans have wanted to hear his story, and now Allan is telling it for the first time. His book is the compelling account of a young Canadian who moved to Australia with his family as a boy and became one of our greatest racing drivers. It's a tale of the epic rivalry with Peter Brock, which surprisingly culminated in a driving partnership and huge mutual respect, and it's about nostalgia for the glory days of motor sport in this country, when the concept of Holden versus Ford really did divide the nation, and when Mount Panorama was the true Mecca for hundreds of thousands, if not millions, of Australians. Filled with intense rivalries, huge

egos, on-course stories and incidents, and all against the backdrop of our motor sport history over more than forty years, this is THE book for all fans of Australian motor racing.

Stirling Engine Design Manual William Martini, 2013-01-25 For Stirling engines to enjoy widespread application and acceptance, not only must the fundamental operation of such engines be widely understood, but the requisite analytic tools for the stimulation, design, evaluation and optimization of Stirling engine hardware must be readily available. The purpose of this design manual is to provide an introduction to Stirling cycle heat engines, to organize and identify the available Stirling engine literature, and to identify, organize, evaluate and, in so far as possible, compare non-proprietary Stirling engine design methodologies. This report was originally prepared for the National Aeronautics and Space Administration and the U. S. Department of Energy.
