Spirits and Animism in Contemporary Japan Fabio Rambelli,2019-05-23 This book draws attention to a striking aspect of contemporary Japanese culture: the prevalence of discussions and representations of “spirits” (tama or tamashii). Ancestor cults have played a central role in Japanese culture and religion for many centuries; in recent decades, however, other phenomena have expanded and diversified the realm of Japanese animism. For example, many manga, anime, TV shows, literature, and art works deal with spirits, ghosts, or with an invisible dimension of reality. International contributors ask to what extent these are cultural forms created by the media for consumption, rather than manifestations of “traditional” ancestral spirituality in their adaptations to contemporary society. Spirits and Animism in Contemporary Japan considers the modes of representations and the possible cultural meanings of spirits, as well as the metaphysical implications of contemporary Japanese ideas about spirits. The chapters offer analyses of specific cases of “animistic attitudes” in which the presence of spirits and spiritual forces is alleged, and attempt to trace cultural genealogies of those attitudes. In particular, they present various modes of representation of spirits (in contemporary art, architecture, visual culture, cinema, literature, diffuse spirituality) while at the same time addressing their underlying intellectual and religious assumptions.

Thinking with Animation Joff P. N. Bradley,Catherine Ju-yu Cheng,2021-08-09 This volume brings together scholars based predominantly in Asia to contribute provocative and experimental essays on the dynamic relationship between animation and philosophy. In an inventive and playful philosophical way, they address not only the mainstay of

Japanese animation, but also Korean film, picture books and Mickey Mouse to understand what we might call film-philosophy in Asia. In thinking animation with concepts from the technicolour philosophies of Deleuze, Guattari, Stiegler, Benjamin, Kristeva and Heidegger, the book sees animation not as a representation of a philosophical idea per se, but conceptualizes it as a philosophical thinking-device. In the images themselves, what is at work is not just the thinking of a particular director or manga artist, but, rather, thinking as such, through and by the images themselves. The scholars in this collection are committed to thinking images themselves as thought-experiments and thinking machines.

Transcendence and Spirituality in Japanese Cinema Melissa Croteau, 2022-11-14 This book explores significant representations of Shinto and Buddhist sacred space, spiritual symbols, and religious concepts that are embedded in the secular framework of Japanese films aimed at general audiences in Japan and globally. These cinematic masterpieces by directors Akira Kurosawa, Hayao Miyazaki, Hirokazu Kore-eda, and Makoto Shinkai operate as expressions of and, potentially, catalysts for transcendence of various kinds, particularly during the Heisei era (1989–2019), when Japan experienced severe economic hardship and devastating natural disasters. The book's approach to aesthetics and religion employs the multifaceted concepts of *ma* (structuring intervals, liminal space-time), *kū* (emptiness, sky), *mono no aware* (compassionate sensibility, resigned sadness), and *musubi* (generative interconnection), examining the dynamic, evolving nature of these ancient principles that are at once spiritual, aesthetic, and philosophical. Scholars and enthusiasts of Japanese cinema (live action and anime), religion and film, cinematic aesthetics, and the relationship between East Asian religions and the arts will find fresh perspectives on these in this book, which moves beyond conventional notions of transcendental style and essentialized approaches to the multivalent richness of Japanese aesthetics.
