**Leader of the Pack** Mark W. Allen,2011-05-04 *Leader of the Pack* recounts the incredible history of USS Batfish, a record-setting American World War II fleet submarine. Batfish entered the pantheon of military lore during its famous sixth patrol in February 1945, where it sank a record three Japanese submarines in seventy-six hours. In addition to offering a rousing and meticulously researched account of the famous sixth patrol, author and military historian Mark W. Allen unravels a nautical mystery that had gone unresolved for over sixty years: the identity of the first Japanese submarine sunk by Batfish skipper John K. Fyfe. Controversy has surrounded the identity of the first submarine almost since the day of the sinking, but *Leader of the Pack*, through a diligent recreation of the events that unfolded in the days leading up to the sixth patrol, solves the mystery once and for all. Lastly, Allen shares a personal story, never told before in such detail, of Batfish's rescue of three downed aviators who were forced to ditch their B-25 Mitchell bomber after it was hit by enemy anti-aircraft fire during a bombing mission on the Japanese homeland.

**US Grenade Launchers** Gordon L. Rottman,2017-09-21 In an effort to provide the US infantryman with more firepower to cover the range gap between the hand grenade and the light mortar, the 40mm M79 grenade launcher – a shoulder-fired, single-shot weapon – entered service with US forces in 1961. Reliable, easy to use, and lethally effective, the M79 soon became an iconic symbol of the Vietnam War and had a profound influence

on small-unit tactics. As the Vietnam conflict continued, it was joined on the front line by experimental models such as the magazine-fed T148E1, as well as two launchers intended to be fitted under the barrel of the new M16 assault rifle: Colt's XM148 and AAI Corporation's M203. The M203 remains in US Army service today, while the US Marine Corps now also fields the M32 multiple grenade launcher – like the M79, a standalone weapon. Featuring full-colour artwork, this is the story of the rugged and formidable grenade launchers that equipped the United States and its allies in Vietnam and beyond from the 1960s to the present day.

*The American Lab* C. Bruce Tarter, 2018-08-01 Behind the scenes of the Lawrence Livermore National Laboratory, the quintessential American lab. Nobel laureate Ernest O. Lawrence and renowned physicist Edward Teller founded the Lawrence Livermore National Laboratory in 1952. A new ideas incubator, the Lab was at the heart of nuclear testing and the development of supercomputers, lasers, and other major technological innovations of the second half of the twentieth century. Many of its leaders became prominent figures in the technical and defense establishments, and by the end of the 1960s, Livermore was the peer of Los Alamos National Lab, a relationship that continues today. In *The American Lab*, former Livermore director C. Bruce Tarter offers unparalleled access to the inner workings of the Lab. Touching on Cold War nuclear science and the technological shift that occurred after the fall of the Berlin Wall, he traces the Lab's evolution from its founding under University of California management through its transfer to private oversight. Along the way, he highlights important episodes in that journey, from the invention of Polaris, the first submarine-launched ballistic missile, to the Lab's controversial role in the Star Wars program. He also describes Livermore's significant responsibilities in stockpile stewardship, the program

that ensures the safety and reliability of the US nuclear arsenal. The book portrays the lab's extensive work on thermonuclear fusion, a potential source of unlimited energy; describes the development of the world's largest laser fusion installation, the National Ignition Facility; and examines a number of smaller projects, such as the Lab's participation in founding the Human Genome Project. Finally, it traces the relationship of the Lab to its federal sponsor, the Department of Energy, as it evolved from partnership to compliance with orders, a shift that affected all of the national laboratories. Drawing on oral histories, internal laboratory documents, and the author's personal experiences from more than fifty years as a Lab employee, *The American Lab* is an illuminating history of the Lab and its revolutionary work.

**A Bride Without a Blessing** David Brodsky, 2006 David Brodsky uses form and source criticism to date *Massekhet Kallah* and the first two chapters of *Kallah Rabbati* - which form a commentary on *Massekhet Kallah* - to the mid-amoraic period (circa late third and early fifth centuries CE respectively), and to locate their redaction in Babylonia. This makes these two sources the only known rabbinic texts whose final redaction took place in Babylonia during the amoraic period, and establishes them as the closest extant relatives of the Babylonian Talmud. Parallels between these two sources and the Babylonian Talmud elucidate the nature of oral transmission and of the redactional processes of Babylonian rabbinic material during this critical period, and, thereby, of the Babylonian Talmud itself. In addition, the author deciphers *Massekhet Kallah's* peculiar asceticism: a concern with men's inappropriate use of or interactions with their wives, charity, vows, and even with the group's own transmitted traditions. *Massekhet Kallah* fears the physical and at times cosmic effects of such inappropriate behavior. Brodsky finds that these items were all deemed consecrated, removed from the realm of normal interaction. To have mundane interaction with them was a powerful and dangerous act. Brodsky explores the fascinating gender and theological implications of this unique asceticism.

**The Sources of the Synoptic Gospels: Volume 2, St Luke and St Matthew** Wilfred L. Knox, 1957-01-02 This book, which was originally published in

1957, seeks to take Gospel criticism beyond Form-criticism. The study of the Lucan material in this second volume shows that the Synoptic gospels are compilations of sources first written down thirty years closer to the time of the events than is commonly supposed.
