MKII helmets of the Second World War and their use in the Italian Campaign Daniele Piselli, 2020-01-06 The collecting of MKII helmets from the second world war has seen a considerable increase in interest among collectors recently. The enthusiast approaching this sector of militaria collecting for the first time has very few tools available that can at least point him in the right direction. So, taking stock of the knowledge I have acquired and with the help of various collector friends, I thought it might be useful to publish this guide on MKII helmets in the second world war and their use during the Italian Campaign. There is certainly a lot more to discover but this is a starting point. A tip, before making a purchase, always ask the opinion of other collectors because a trained eye can definitely help you in this jungle of post war use, fakes, tampering... and beautiful helmets that still know how to tell their story. A big thank you goes to Francesco Braneschi, it is also thanks to him that this research came about, to his passion and to our constant exchanges of opinion on this sector of the militaria. In an attempt to understand something more I cannot fail to thank Marco Visani, super adviser with his infinite bibles. A thankyou also to those who contributed with their time, photographs, information, and much more: Alessandro Zentile, Antonio Bonanno, Aaron Delaney, Brendon Ellis, Cristian Rubiola, David Yeomans, Dennis van Vugt, Fabio Ortolani, Francesco Saverio Giovagnoli, Giovanni Righini, Ivo Beute, Leonardo Biserni, Mark Kozowy, Massimo Costa, Paolo Zamma, Peter Young, Steven Britton and the Boys of the Combat Road association. Thank you. And finally, thank you to Fabio Roncella for his essay on the battle of Montegabbione, our roots are in history. Buona lettura! Daniele Piselli

Canon EOS 7D Mark II Jeff Revell, 2015 The Canon EOS 7D Mark II—a major update to the very popular 7D from 2009—is a powerful camera intended for everyone from beginners to advanced amateurs to professionals alike. With boosts in technology that significantly improve autofocus, video, and frame rate (the camera can shoot an astounding 10 frames per second!), the 7D Mark II is poised to be a big hit this fall. This book, in the popular From Snapshots to Great Shots series, is for anyone who upgrades from a point-and-shoot or for anyone who wants to jump into photography with the control and capabilities of a powerful DSLR. There's the manual, of course, as well as competing books, and while they all explain, often in 400+ pages, what the camera can do, none of them shows exactly how to use the camera to create great images! This book has one goal: to teach Canon EOS 7D Mark II owners how to make great shots using their camera. Everything in the book is in service of creating a great image. Starting with the top ten things needed to know about the camera, photographer Jeff Revell then carefully guides readers through the modes of the camera. Users get practical advice from a pro on which settings to use when, great shooting tips, and even end-of-chapter assignments. The Canon EOS 7D Mark II will be available at the end of November

Battlecruisers John Roberts,1997 This second volume in the ShipShape series covers the development of one of the largest, fastest and most charismatic warship types. Combining the armament of a battleship with the speed of a cruiser in some of the largest hulls then built, these ships were the cutting edge of early 20th-century naval technology. The brainchild of Admiral Fisher, the concept of this class began as large, fast armoured cruisers for trade protection, but the last-minute decision to equip them with 12-inch guns led them to be seen as a high-speed element of the battle fleet. The British battlecruisers fought in numerous battles in World War I, such as the battles of the Falklands, Heligoland Bight and Dogger Bank. But it is for the battle of Jutland in 1916, when three battlecruisers exploded and sank in one day, that these ships are best remembered.
