*Integration of GIS and Remote Sensing* Victor Mesev, 2008-03-11 In an age of unprecedented proliferation of data from disparate sources the urgency is to create efficient methodologies that can optimise data combinations and at the same time solve increasingly complex application problems. Integration of GIS and Remote Sensing explores the tremendous potential that lies along the

interface between GIS and remote sensing for activating interoperable databases and instigating information interchange. It concentrates on the rigorous and meticulous aspects of analytical data matching and thematic compatibility - the true roots of all branches of GIS/remote sensing applications. However closer harmonization is tempered by numerous technical and institutional issues, including scale incompatibility, measurement disparities, and the inescapable notion that data from GIS and remote sensing essentially represent diametrically opposing conceptual views of reality. The first part of the book defines and characterises GIS and remote sensing and presents the reader with an awareness of the many scale, taxonomical and analytical problems when attempting integration. The second part of the book moves on to demonstrate the benefits and costs of integration across a number of human and environmental applications. This book is an invaluable reference for students and professionals dealing not only with GIS and remote sensing, but also computer science, civil engineering, environmental science and urban planning within the academic, governmental and commercial/business sectors.

Tanzi,2022-07-18T00:00:00+02:00 Il private banking è un settore che nel corso del tempo ha adottato un approccio ampio ai bisogni della clientela fino a sentire l'esigenza di cambiare pelle e lessico e adottare il termine wealth management. Oggi le spinte al cambiamento provengono dal processo di digitalizzazione e dalle regole del gioco europee che promuovono la trasparenza sul fronte degli investimenti sostenibili. Per ragioni diverse, entrambe queste forze vanno nella direzione di favorire un approccio al cliente orientato al lungo termine. Questo approccio è intrinseco all'attività di pianificazione finanziaria, capace di creare valore sia sul fronte degli investimenti finanziari, anche alternativi, sia sul fronte più allargato della pianificazione patrimoniale.
