*Early Exploration of the Moon* Tom Lund,2018-12-26 Luna 2, launched by the USSR in 1959, was the first spacecraft from Earth to land on the moon. That first voyage was followed by increasingly capable lunar exploration spacecraft from Russia and the United States. A total of 36 successful lunar exploration missions were conducted from 1959 to the last Apollo manned exploration in 1972 and the final travels of the Lunokhod lunar rover in 1973. Of all the missions, that of Apollo 17 was the pinnacle of manned space exploration. Apollo 17 astronauts traveled 21 miles on the lunar surface in a dune buggy-type vehicle, stopping frequently to explore and gather samples. The spacecraft that enabled lunar exploration were ingenious, and reflected the best efforts of talented people working with the technology of the day. This book showcases the engineering involved in those incredible machines. The spacecraft covered, and their missions, are listed below. From the United States: • Ranger - Photography en route to lunar impact • Lunar Orbiter - Photography of front and back side of moon • Surveyor - Soft landing, photography, and soil analysis • Apollo - Manned exploration. Lunar Rover expanded range From the USSR: • Luna 2 - Photography en route to lunar impact • Luna 3 - Photography of back side of moon on flyby • Luna 9 and 13 - Soft landing, photography, and soil analysis • Luna 10, 11, 12, 14 - Photography from lunar orbit • Luna 16, 20, 24 - Soft landing, return of soil sample to Earth • Lunokhod-1, -2 - Lunar roving vehicle driven from Earth • L1 - Planned manned lunar flyby but only flew unmanned • L3 - Planned manned lunar landing but never flew to moon To tell the story of these spacecraft, Tom Lund draws on over 40 years' work on aircraft and spacecraft systems. He was technical lead for the landing radars for the Surveyor and Apollo spacecraft, and his practical experience is augmented by master's degrees in electrical engineering, physics, and business administration.

Apollo Zack Scott,2019-05-07 Illustrations, infographics, and little-known facts about NASA's Apollo program and the 1969 moon landing. July 20, 1969, marked one of the greatest achievements of mankind-the moon landing. In his infographic-packed book, Apollo: A Graphic Guide to Mankind's Greatest Mission, Zack Scott recounts the entire journey of the Apollo space program. Unlike previous books on this topic, Apollo illustrates the tiniest details of how man came to walk on the moon, paying particular attention to many of the lesser-known facts about the mission. Artful infographics throughout focus on a wide range of details for space-lovers to obsess over-astronaut weights, mission insignia and spacecraft call signs, fuel consumption stats, splashdown sites around the world, and much, much more. A fresh, lively approach to the subject, Apollo is the perfect combination of science, design, math, and space.

Rocket Ranch Jonathan H. Ward,2015-06-26 Jonathan Ward takes the reader deep into the facilities at Kennedy Space Center to describe NASA's first computer systems used for spacecraft and rocket checkout and explain how tests and launches proceeded. Descriptions of early operations include a harrowing account of the heroic efforts of pad workers during the Apollo 1 fire. A companion to the author's book Countdown to a Moon Launch: Preparing Apollo for Its Historic Journey, this explores every facet of the facilities that served as the base for the Apollo/Saturn missions. Hundreds of illustrations complement the firsthand accounts of more than 70 Apollo program managers and engineers. The era of the Apollo/Saturn missions was perhaps the most exciting period in American space exploration history. Cape Canaveral and Kennedy Space Center were buzzing with activity. Thousands of workers came to town to build the facilities and launch the missions needed to put an American on the

Moon before the end of the decade. Work at KSC involved much more than just launching rockets. It was a place like none other on Earth. Technicians performed intricate operations, and hazards abounded everywhere, including lightning, fire, highly-toxic fuels, snakes, heat, explosives, LOX spills, and even plutonium. The reward for months of 7-day workweeks under intense pressure was witnessing a Saturn V at liftoff. For anyone who ever wished they had worked at Kennedy Space Center during the Apollo era, this book is the next best thing. The only thing missing is the smell of rocket fuel in the morning.
