*1999: A Space Odyssey* John K Balor,2018-08-03 Part of the premise of the online discussion transcribed in this book is how Gerry Anderson's television series 'Space: 1999' can be understood in relation to Stanley Kubrick's '2001: A Space Odyssey' by looking at both narratives through the perspective of systems theory. As a result of doing so, an engaged debate concerned with the political and philosophical subtext of both stories developed. This book gives a full account of the debate with summaries of ideas and insights. The book has been developed on an idealistic basis. It is sold at the lowest price the publisher was willing to accept. A free e-book version can be downloaded at [www.lulu.com](http://www.lulu.com).

*Harvey and the Moon Bus* Jill Stanton-Huxton,2018-01-30 “Harvey is a grey cat with big green eyes and a long bushy tail, who loves wearing his favourite pair of blue dungarees. What a lovely sunny morning, Harvey thought, just the sort of day for an adventure.” A beautifully-illustrated story about anthropomorphic animals who have a fantasy adventure together. An underlying theme and moral message which is the importance of helping people. A fantastical adventure story for children 5-7 years old. Harvey sees his friends, Chester and Nelly, heading for the corner shop and boarding the Moon Bus, so he decides to join them. Harvey sits next to a grumpy grey rabbit. The Moon Bus takes off and flies through space and lands on the Moon and they all head off to The Moon Rock Sweet Emporium in Moon Crater Alley. Harvey loses Chester and Nelly – so when he sees the grey rabbit heading for a nearby circus tent he decides to follow him, where he meets a small mouse called Gretel. But they only have 15 minutes to reach the Moon Bus before it leaves for the day! Gretel tells him the magic mats on the Helter Skelter will take them to the Moon Bus really quickly. The magic mat flies over the cobbled streets towards a huge crater but Gretel falls out of Harvey’s pocket and starts plummeting to the ground. Harvey manages to grab her safely. As the Moon Bus is about to take off, Harvey uses the last of his three wishes to catch it and jumps on board.. They look out of the window and see the grey rabbit running along the runway after the Moon Bus... But will he catch it in time?

**Mindscan** Robert J. Sawyer,2005-03-10 Hugo Award-winning author Robert J. Sawyer is back with Mindscan, a pulse-pounding, mind-expanding standalone novel, rich with his signature philosophical and ethical speculations, all grounded in cutting-edge science. Jake Sullivan has cheated death: he's discarded his doomed biological body and copied his consciousness into an android form. The new Jake soon finds love, something that eluded him when he was encased in flesh: he falls for the android version of Karen, a woman rediscovering all the joys of life now that she's no longer constrained by a worn-out body either. But suddenly Karen's son sues her, claiming that by uploading into an immortal body, she has done him out of his inheritance. Even worse, the original version of Jake, consigned to die on the far side of the moon, has taken hostages there, demanding the return of his rights of personhood. In the courtroom and on the lunar surface, the future of uploaded humanity hangs in the balance. Mindscan is vintage Sawyer -- a feast for the mind and the heart. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Seeing Is Believing Richard Vance Goodwin,2022-07-19 How might film reveal God? In its most basic form, film is a series of images displayed over time. Of course, film has developed greatly since the Lumière brothers by adding components such as sound, special effects, digital recording, and more to create an increasingly complex artistic medium. Historically, film studies has often focused on the narrative aspect of film as it seeks to tell a story. More recent studies, however, have turned attention to other elements of film, such as the musical score. Yet, film remains, in a sense, a series of images. In this Studies in Theology and the Arts (STA) volume, theologian Richard Goodwin considers how the images that constitute film might be a conduit of God's revelation. By considering works by Carl Theodor Dreyer, Stanley Kubrick, Paul Thomas Anderson, Robert Bresson, Martin Scorsese, Terrence Malick, and more, Goodwin argues that by inviting emotional responses, film images can be a medium of divine revelation. Blessed are those who have seen God... through film. The Studies in Theology and the Arts series encourages Christians to thoughtfully engage with the relationship between their faith and artistic expression, with contributions from both theologians and artists on a range of artistic media including visual art, music, poetry, literature, film, and more.

**2001** Arthur Charles Clarke,Stanley Kubrick,1968

*Discovering Kubrick's Symbolism* Nicole M. Berg,2020-07-29 Bringing to light the long-shrouded symbolism and startling spiritual depth that renowned director Stanley Kubrick packed into every detail of his iconic films, this book excavates the subtle ways Kubrick calls attention to universal truths and shocking realities still pervading our society. It cites the master director's use of encoded graphic symbols, signifying light effects, doppelgangers, esoteric color-coding, and framing techniques that communicate Kubrick's underlying topics. Beginning with an exploration of the inspirational themes of his classic science fiction film 2001: A Space Odyssey, including the multilayered meaning of the Monolith, this book traces the themes and symbols encrypted in the films that followed during the director's impressive career. It reveals the oblique methods Kubrick used to underscore a wide range of humanitarian alarms covered in films as diverse as A Clockwork Orange, Barry Lyndon, The Shining, Full Metal Jacket, and Eyes Wide Shut, and the fascinating links these films have to one another. Surprising revelations discovered in Dr. Strangelove, Spartacus, Lolita, and Paths of Glory are also unveiled for the first time.

Kubrick's 2001 Leonard F. Wheat,2000-06-21 Acclaimed in an international critics poll as one of the ten best films ever made, Stanley Kubrick's 2001: A Space Odyssey has nonetheless baffled critics and filmgoers alike. Its reputation rests largely on its awesome special effects, yet the plot has been considered unfathomable. Critical consensus has been that Kubrick himself probably didn't know the answers. Leonard Wheat's Kubrick's 2001: A Triple Allegory reveals that Kubrick did know the answers. Far from being what it seems to be—a chilling story about space travel—2001 is actually an allegory, hidden by symbols. It is, in fact, a triple allegory, something unprecedented in film or literature. Three allegories—an Odysseus (Homer) allegory, a man-machine symbiosis (Arthur Clarke) allegory, and a Zarathustra (Nietzsche) allegory—are simultaneously concealed and revealed by well over 200 highly imaginative and sometimes devilishly clever symbols. Wheat decodes each allegory in rich detail, revealing the symbolism in numerous characters, sequences, and scenes. In bringing Kubrick's secrets to light, Wheat builds a powerful case for his assertion that 2001 is the grandest motion picture ever filmed.

**Future Visions: One Hundred Years of Culture and Society Through the Lens of Science Fiction Cinema** Ivan Litvinenko,2020-11-11 Imagining the future has been a significant part of the mass culture and a way for our collective consciousness to process the world around us and our expectations of what's to come. Science fiction was one of the first genres to emerge as soon as the moving image was made possible a little more than a hundred years ago. Over the XX century, as we have seen technology advancing faster than ever, sci-fi has always been exceptional at pushing the boundaries of what is possible, both visually and conceptually.This book showcases the evolution of the genre by taking a closer look at some of the most visionary science fiction films, the themes and ideas they raise, and how they correlate with the context they were released into. It is an attempt at providing a comprehensive analysis of the relation between the imaginary worlds of the future and the fears and aspirations of the general public. Ranging from the earliest attempts at imagining the future to the epic space operas, it lists the undisputed classics of science fiction, providing an entertaining read for the die-hard fans of the genre, and an educational overview of the must-see titles for people want to learn more about sci-fi and how it became what it is now.
