Shade and the Skinwalkers (Shade Series Book 2) Marilyn Peake, 2017-12-02

Water from the Moon Jean-Francois Vernay, 2007 Author of six novels,

Christopher John Koch (born in 1932) is one of Australia's leading novelists who enjoys worldwide recognition. Koch's writing has its finger on the pulse of today's changing society. Not only does his work fall within a universal stream but it also stands out as a production of its own, built like a puzzle with distinct pieces. Through fiction, Koch explores other genres - the fairy tale, drama, poetry - to the point of producing multi-faceted works which challenge classification. In spite of the constant renewal of his settings for action, one notices the presence of a main thread which runs through Koch's fiction: the antipodean and ambiguous relationship between illusion and reality. This theoretically-informed monograph provides a book-by-book analysis of the novelist's oeuvre and gives a full picture of his Weltanschauung. It is valuable reference for scholars in Australian Studies, as well as those researching postcolonial, psychoanalytic and literary theories.

Shade Series: Books 1-3 Boxed Set Marilyn Peake, 2024-02-20 Shade: Girl on a hero's journey, going from smart-ass to badass. This boxed set contains the first three books in the YA Paranormal Mystery / YA Urban Fantasy Shade series. Although this series deals with a number of serious issues—drug and alcohol abuse, cutting, and disturbing world events—it's primarily about a teenaged girl finding out who she really is and that she's capable of so much more than she ever thought possible. And there's lots of magic! Shade (Shade Series Book 1): Finalist, Young Adult Fiction category, 2015 National Indie Excellence Book Awards. Shade learns she's a ghost whisperer when her mother moves them into an old house with a ghost in the attic. This is right before Shade's junior year of high school. With her full name of Galactic Shade Griffin, she's a target for bullies. Nevertheless, Shade powers through, rescuing several girls in her high school who have gone missing with the help of the ghost in the attic. Shade and the Skinwalkers (Shade Series Book 2): Semi-Finalist, Young Adult category, 2019 Kindle Book Awards. At the beginning of her senior year of high school, Shade's mother moves them once again, this time to a trailer park in Roswell, New Mexico. Shade is thrown into a world inhabited not only by ghosts, but also by witches, faeries and shapeshifters. She and her best friend, Kai Zahnii, must fight the evil skinwalkers alongside magical creatures Shade never knew existed. Shade and the Castle by the Sea (Shade Series Book 3): Semi-Finalist, Young Adult category, 2020 Kindle Book Awards. Graduating high school, Shade is accepted into a college for the magically gifted, which introduces her to students with a wide range of magical abilities. Falling deeply in love with a merman, everything seems idyllic and magical. That is, until Shade discovers a horrible secret about the college, one that will haunt her dreams and waking moments.

A First Course in Scientific Computing Rubin Landau, 2011-10-30 This book offers a new approach to introductory scientific computing. It aims to make students comfortable using computers to do science, to provide them with the computational tools and knowledge they need throughout their college careers and into their professional careers, and to show how all the pieces can work together. Rubin Landau introduces the requisite mathematics and computer science in the course of realistic problems, from energy use to the building of skyscrapers to projectile motion with drag. He is attentive to how each discipline uses its own language to describe the same concepts and how computations are concrete instances of the abstract. Landau covers the basics of computation, numerical analysis, and programming from a computational science perspective. The first part of the printed book uses the problem-solving environment Maple as its context, with the same material covered on

the accompanying CD as both Maple and Mathematica programs; the second part uses the compiled language Java, with equivalent materials in Fortran90 on the CD; and the final part presents an introduction to LaTeX replete with sample files. Providing the essentials of computing, with practical examples, *A First Course in Scientific Computing* adheres to the principle that science and engineering students learn computation best while sitting in front of a computer, book in hand, in trial-and-error mode. Not only is it an invaluable learning text and an essential reference for students of mathematics, engineering, physics, and other sciences, but it is also a consummate model for future textbooks in computational science and engineering courses. A broad spectrum of computing tools and examples that can be used throughout an academic career. Practical computing aimed at solving realistic problems. Both symbolic and numerical computations. A multidisciplinary approach: science + math + computer science. Maple and Java in the book itself; Mathematica, Fortran90, Maple and Java on the accompanying CD in an interactive workbook format.

Simple and Free Jen Hatmaker, 2022-03-29 Why do we pursue more when we'd be happier with less? In this updated edition of *7*, New York Times bestselling author Jen Hatmaker tells the story of how she and her family tried to combat overindulgence—and what they learned along the way about living a truly meaningful life. *Simple and Free* is the true story of how Jen Hatmaker (along with her family) identified seven areas of excess—food, clothes, spending, media, possessions, waste, and stress—and made seven simple choices to fight back against the modern-day diseases of greed, materialism, and overindulgence. So, what's the payoff from living a deeply reduced life? It's the discovery of a greatly increased connection with God—a call toward simplicity and generosity that transcends social experiment to become a radically better life. In this new edition, written not just for readers of faith but for everyone who craves a gentler, simpler life, Hatmaker shares how sustainability and generosity still impact and challenge her today. Annotated throughout with new reflections from the author, this book offers thoughtful insights on the vastly different world of *Simple and Free* from back when it was first published as *7*, and considers the dramatically different space Hatmaker occupies now. *Simple and Free* is funny, raw, and not a guilt trip in the making. Come along and discover what Jesus' version of rich, blessed, and generous might look like in your life.

Vegas Hustler Clancy O'Hara, 2000-09 Clancy O'Hara was born a Pisces on March 3, 1955. The same year as Rock and Roll and Disneyland. He was friends with Quentin Tarantino and Quentin's success with *Pulp Fiction* inspired Clancy to write this hard boiled crime novel. The characters are real life X-Men. They think of themselves as mutants and they conspire to rob a Las Vegas casino. Clancy published the award winning *Pulp: A Fiction Magazine* and won an honorable mention in Year's Best Fantasy and Horror for his short story *The Asylum Choir*.

7: An Experimental Mutiny Against Excess (Updated and Revised) Jen Hatmaker, 2020-03-03 Why do we pursue more when we'd be happier with less? This is the story of how New York Times bestselling author Jen Hatmaker and her family tried to combat overindulgence—and what they learned about living a truly meaningful life along the way. Do you feel trapped in the machine of excess? Jen Hatmaker was. Her friends were. And some might say that our culture is. Jen once considered herself unmotivated by the lure of prosperity, but after she was called “rich” by an undeniably poor child, evidence to the contrary mounted and a social experiment turned spiritual journey was born. *7* is the true story of how Jen (along with her husband and her children) took seven months, identified seven areas of excess, and made seven simple choices to fight back against the modern-day diseases of materialism and overindulgence: food, clothes, possessions, media and technology, spending, waste, and stress. So, what's the payoff from living a deeply reduced life? It's the discovery of a greatly increased God—a call

toward Christ-like simplicity and generosity that transcends a social experiment to become a radically better life. Revised and updated to reflect newer challenges of modern life, 7 is funny, raw, and not a guilt trip in the making, so come along and consider what Jesus' version of rich, blessed, and generous might look like in your life.

A Survey of Computational Physics Rubin H. Landau, José Páez, Cristian C. Bordeianu, 2011-10-30 Computational physics is a rapidly growing subfield of computational science, in large part because computers can solve previously intractable problems or simulate natural processes that do not have analytic solutions. The next step beyond Landau's First Course in Scientific Computing and a follow-up to Landau and Páez's Computational Physics, this text presents a broad survey of key topics in computational physics for advanced undergraduates and beginning graduate students, including new discussions of visualization tools, wavelet analysis, molecular dynamics, and computational fluid dynamics. By treating science, applied mathematics, and computer science together, the book reveals how this knowledge base can be applied to a wider range of real-world problems than computational physics texts normally address. Designed for a one- or two-semester course, A Survey of Computational Physics will also interest anyone who wants a reference on or practical experience in the basics of computational physics. Accessible to advanced undergraduates Real-world problem-solving approach Java codes and applets integrated with text Companion Web site includes videos of lectures
