Modern Japanese Grammar Workbook Naomi McGloin, M. Endo Hudson, Fumiko Nazikian, Tomomi Kakegawa, 2014-05-09 The Modern Japanese Grammar Workbook is an innovative book of exercises and language tasks for all learners of Japanese. The book is divided into two parts: Section A provides exercises based on essential grammatical structures Section B practises everyday functions (e.g. making introductions, apologizing, expressing needs). All sentences are written both in Romanization and in the Japanese script and a comprehensive answer key at the back enables the learner to check on their progress. Key features of the book include: Exercises graded on a 3-point scale according to their level of difficulty Cross-referencing to the related Modern Japanese Grammar Topical exercises drawn from realistic scenarios to help learners develop their vocabulary and practical communication skills Opportunities to practise both written and spoken Japanese. Modern Japanese Grammar Workbook is an ideal practice tool for learners of Japanese at all levels. No prior knowledge of grammatical terminology is assumed and it can be used both independently and alongside the Modern Japanese Grammar (ISBN 978-0-415-57201-9), which is also published by Routledge.

Norms, Interests, and Power in Japanese Foreign Policy Y. Sato, 2008-10-13 This edited volume puts forth a theoretically and empirically rigorous analysis of Japanese foreign policy. Nine case studies on Japan's security, economic, and environmental policies in this volume examine how norms do or

do not guide Japanese foreign policy and how they interact with interests and power.

Non-CO2 Greenhouse Gases: Scientific Understanding, Control and Implementation J. van Ham, A.P.M. Baede, L.A. Meyer, R. Ybema, 2013-06-29 In the climate change discussion, non-CO2 greenhouse gases (NCGGs) received official political recognition for the first time in 1997, when agreement was reached on the Kyoto Protocol. As a result methane, nitrous oxide, HFCs, PFCs and SF6 now provide attractive options for detailing the national targets for the reduction of greenhouse gas emissions meant to control climate change. This book is the second volume in this area and addresses three main topics. Firstly, it documents progress with respect to our knowledge of the sources and sinks of NCGGs. Information on this subject is essential in order to reduce the uncertainties in national emissions inventories which serve as the reference values for commitments of countries in the framework of the Kyoto Protocol. Secondly, this volume deals with the control options for the NCGGs and contains a wealth of information in this area. Emerging technologies here provide business opportunities, in particular in connection with the flexible mechanisms for mitigation projects in developing countries which have been agreed in Kyoto. Thirdly, the book treats the policy implementation of mitigation options for greenhouse gas emissions. Tools for control policies, both on the national and international level, and for different sectors of industry are discussed. National integrated approaches, including the ones

Smeulders, John Robert Wisniewski, 2012-12-02 The First International Nitrogen Conference provided an opportunity for researchers and decision-makers to exchange information on environmental pollution by nitrogen compounds on three scales: global, continental/regional and local. The main topics were air, ground water and surface water pollution; emission sources, atmospheric chemistry, deposition processes and effects; disturbance of nitrogen cycles, critical loads and levels; assessments, policy development and evaluation; target groups and abatement techniques; and new approaches leading to an integrated abatement strategy. The peer-reviewed papers from the Conference presented in this volume will provide readers with a comprehensive review of the transport, deposition and impact on ecosystems of nitrogen.
